Find cell phones' area online by cell tower triangulation utilizing LAC (Location Area Code) and Celled from PC, iPhone or Android phone. Cell tower triangulation utilizes the LAC and Cellid to focus the position of a

cellular smartphone. With information from no less than three cell towers, this strategy can ascertain a handset's area exactly. Each one base station covers a certain region, the more cell towers in your general vicinity, the more precise result it delivers. So the thickness of cell towers decides the precision. For the most part, the thickness is higher in the urban zones particularly at downtown. While in country territories, where there are less cell towers, the result is less precise. Governmental Tracking of Cell Phones and Vehicles Richard M. Thompson, 2011 Law enforcement's use of cell phones and GPS devices to track an individual's movements brings into sharp relief the challenge of reconciling technology, privacy, and law. Beyond the Constitution, a miscellany of statutes and cases may apply to these tracking activities. The primary debate surrounding cell phone and GPS tracking is not whether they are permitted by statute but rather what legal standard should apply: probable cause, reasonable suspicion, or something less. This report will briefly survey Fourth Amendment law as it pertains to the government's tracking programs. It will then summarize federal electronic surveillance statutes and the case law surrounding cell phone location tracking. Next, the report will describe the GPS-vehicle tracking cases and review the pending Supreme Court GPS tracking case, *United States v. Jones*. Finally, the report will summarize the geolocation and electronic surveillance

legislation introduced in the 112th Congress.

Urbanism on Track Jeroen Schaick, Stefan C. Spek, 2008 Tracking technologies such as GPS, mobile phone tracking, video and RFID monitoring are rapidly becoming part of daily life. Technological progress offers huge possibilities for studying human activity patterns in time and space in new ways. Delft University of Technology (TU Delft) held an international expert meeting in early 2007 to investigate the current and future

possibilities and limitations of the application of tracking technologies in urban design and spatial planning. This book is the result of that expert meeting.

Priests of Our Democracy

Marjorie Heins, 2013-02-04 In the early 1950s, New York City's teachers and professors became the targets of massive investigations into their political beliefs and associations. Those who refused to cooperate in the questioning were fired. Some had undoubtedly been communists, and the Communist Party-USA certainly made its share of mistakes, but there was never evidence that the accused teachers had abused their trust. Some were among the most brilliant, popular, and dedicated

educators in the city. *Priests of Our Democracy* tells of the teachers and professors who resisted the witch hunt, those who collaborated, and those whose battles led to landmark Supreme Court decisions. It traces the political fortunes of academic freedom beginning in the late 19th century, both on campus and in the courts. Combining political and legal history with wrenching personal stories, the book details how the anti-communist excesses of the 1950s inspired the Supreme Court to recognize the vital role of teachers and professors in American democracy. The crushing of dissent in the 1950s impoverished political discourse in ways that are still being felt, and First Amendment academic freedom, a product of that period, is in peril today. In compelling terms, this book shows why the issue should matter to every American.

Workplace Privacy Jonathan Remy Nash, Samuel Estreicher, 2010-01-01 Employers everywhere today must delicately balance the need to maintain a safe and proper workplace with employees rights and the risk of liability. The fact that new technologies make it easier for employers to monitor their employees whereabouts, communications, and activities only serves to make the issue more acute. Now, in this collection of essays by outstanding scholars and practitioners in U.S. labour law and practice, employers and their legal counsel will find a broad array of important contributions to the law and study of workplace privacy. Based on papers delivered at the 58th annual labour conference of the New York University Center on Labor and Employment Law, this book reflects and analyzes recent developments, providing the best comprehensive work on U.S. workplace privacy. How far should

employers be allowed to go in monitoring employers? Where do employers rights to run their businesses end and employees privacy rights begin? Is the existing law sufficient to resolve recurring conflicts? These are among the big questions tackled in these articles. Among the many specific issues covered are the following: use of global positioning systems (GPS) in tracking employees; background checking for job applicants; email monitoring; physical monitoring of employees; scope and lawfulness of so-called lawful activity laws; employer involvement in employees nonworkplace behaviour (e.g., drug testing); employees rights of association; regulation of fraternizing and dating among employees; employee privacy issues in employer-union bargaining; privacy issues in public sector employment; privacy issues and threats of terrorism; and efforts by employers to verify employees nationality and immigration status. Authors pay special attention to fast-break developments such as in the extraterritorial reach of the European Union s data protection directive and the current status of the U.S. National Labor Relations Board s Register-Guard decision. A special feature is a very early draft of a chapter of the forthcoming Restatement (Third) of Labor and Employment Law made available through the graces of the American Law Institute on the U.S. common law of employee privacy rights. As always, this important annual publication offers definitive current scholarship in its theme area of labour and employment law. As such, it will be of inestimable value to practitioners, government

officials, academics, and others interested in developments in employment and labour relations law and practice.

Jacqueline R. Kanovitz, Jefferson L. Ingram, and Christopher J. Devine provide a comprehensive, well-organized, and up-to-date analysis of constitutional issues that affect the U.S. justice system. Privacy in the Digital Age Nancy S. Lind, Erik T. Rankin, 2015-06-19 A collection of expert essays examines the privacy rights that have been lost in the post-9/11 era—giving students and others the knowledge they need to take back their constitutional protections. This timely two-volume collection shares information every citizen should have, tackling the erosion of privacy rights engendered by the ability of digital technology to intercept, mine, and store personal data, most often without the knowledge of those being

monitored. Examining its subject through the lens of Fourth Amendment rights, the work focuses on technological advances that now gather personal data on an unprecedented scale, whether by monitoring social media, tracking cell phones, or using thermal imaging to watch people's movement. It also examines the possible impact of the widespread gathering of such data by law enforcement and security agencies and by private corporations such as Google. Organized by hot-button topics confronting U.S. citizens in the post-9/11 era, the work reviews the original intent of the Fourth Amendment and then traces the development and erosion of interpretations of that amendment in the 21st century. Topical essays offer a comprehensive treatment and understanding of current Fourth Amendment issues, including those that have been brought before the courts and those relative to the continuing governmental and societal emphasis on security and public safety since the Columbine shootings in 1999 and the events of September 11, 2001.
