Find cell phones' area online by cell tower triangulation utilizing LAC (Location Area Code) and Celled from PC, iphone or Androide phone. Cell tower triangulation utilizes the LAC and Cellid to focus the position of a cellular smartphone. With information from no less than three cell towers, this strategy can ascertain a handset's area exactly. Each one base station covers a certain region, the more cell towers in your general vicinity, the more precise result it delivers. So the thickness of cell

towers decides the precision. For the most part, the thickness is higher in the urban zones particularly at downtown. While in country territories, where there are less cell towers, the result is less precise. Buy Now & Give Me an Opportunity To Grow Your Knowledge!

#### Governmental Tracking of Cell Phones and Vehicles

Richard M. Thompson, 2011 Law enforcement's use of cell phones and GPS devices to track an individual's movements brings into sharp relief the challenge of reconciling technology, privacy, and law. Beyond the Constitution, a miscellany of statutes and cases may apply to these tracking activities. The primary debate surrounding cell phone and GPS tracking is not whether they are permitted by statute but rather what legal standard should apply: probable cause, reasonable suspicion, or something less. This report will briefly survey Fourth Amendment law as it pertains to the government's tracking programs. It will then summarize federal electronic surveillance statutes and the case law surrounding cell phone location tracking. Next, the report will describe the GPS-vehicle tracking cases and review the pending Supreme Court GPS tracking case, *United States v. Jones*. Finally, the report will summarize the geolocation and electronic surveillance legislation introduced in the 112th Congress.

*Safety Essentials for Business and Leisure Travel* David Birkett, Kay Danes, 2021-04-26 At this moment in time, when the world is only just beginning to recover from the global impact of the COVID-19 pandemic, the research in this book makes for essential reading. It will serve to help re-establish confidence and reduce anxiety in business and leisure travellers who are planning to embark on new travel experiences in a world impacted by longer-lasting armed conflicts, increased global violence, and higher frequencies of natural disasters. This book blends in-depth academic research around global risk mitigation with unique perspectives on business and leisure travel safety, narrated by authors who have extensive knowledge of security and risk mitigation systems. Each page contains easy-to-follow advice for domestic and international travel, but differs from other books, in that it addresses the 'hard' issues of travel safety (such as theoretical research around risk mitigation), in lieu of setting the focus solely on the 'soft'

issues (like itinerary planning) which tend to be the focus of many travel publications today. Moreover, unique to this book is an extreme travel section adapted to business and leisure travellers, which makes for compelling reading and deals with kidnapping, risk mitigation and contingency planning. It incorporates the real-life experiences of one of the authors, who survived torture and abduction, and whose experiences now inform pre-deployment training for Australian Defence Force personnel for operations in armed conflict. This book blends the female and male voice into a narrative that combines the perspectives of professional security experts with common sense travel advice. The research that has gone into this book is essential reading for anyone who intends to embark on business or leisure travel, either in their own country or overseas, or who is interested in studying travel from an academic viewpoint.
