The core belief that Popular Science and our readers share: The future is going to be better, and science and technology are the driving forces that will help make it better.

Tractor Beams Holly Duhig,2017-12-15 The first time the term tractor beam was used was in 1931. Since then, tractor beams have been used in many science fiction books, movies, and TV shows to draw in spacecraft, people, and objects in space. This science fiction technology has become science fact. In 2015, scientists used sound waves to move tiny objects. Through reading about this and other modern technology, readers are engaged with incredible STEM information as well as their imaginations as they also learn the connections between this technology and popular science fiction.

*Community Journalism* Jock Lauterer,2009-11-20 No matter how ambitious they may be, most novice journalists don't get their start at the New York Times. They get their first jobs at smaller local community newspapers that require a different style of reporting than the detached, impersonal approach expected of major international publications. As the primary textbook and sourcebook for the teaching and practice of local journalism and newspaper publishing in the United States, Community Journalism addresses the issues a small-town newspaper writer or publisher is likely to face. Jock Lauterer covers topics ranging from why community journalism is important and distinctive; to hints for reporting and writing with a community spin; to design, production, photojournalism, and staff management. This third edition introduces new chapters on adjusting to changing demographics in the community and best practices for community papers. Updated with fresh examples throughout and considering the newest technologies in editing and photography, this edition of Community Journalism provides the very latest of what every person working at a small newspaper needs to know.

Obstacle Race Training Margaret Schlachter,2014-04-15 The beauty of obstacle course racing is that it gets you out of your everyday routine and lets you experience life. If you are stuck in a cubicle or trapped in an urban jungle—congested traffic and crowds are your daily obstacles. Running an obstacle course race gives you the chance to get back to nature—to roll in it, get dirty, and tap into your primal self so you can experience life—in the raw, unedited and real. Margaret Schlachter, the creator of Dirt In Your Skirt blog, is one the leading competitors in obstacle course racing today. She put together this simple guide to make your obstacle race experience everything it's supposed to be—a test of your true self. She describes first-hand her training methods in learning to climb a rope, scale a wall, flip a tire, throw a spear, and carry a sandbag. More importantly, she provides guidance on how to get yourself mentally and spiritually prepared for the big day—and how to dig deep within yourself during a race to find the last ounce of strength to carry you across that finish line. Every weekend thousands of competitors run obstacle races all over the world. Winning or losing is secondary. More important for them is the ability to meet the physical and mental challenges and achieve personal success by completing the race. Obstacle Race Training is an invaluable resource that enables every competitor to experience their maximum level of success.
