**The World Trading System at Risk** Jagdish N. Bhagwati, 2014-07-14 Jagdish Bhagwati, one of the world's leading economists, offers a fascinating overview of the perils and promise facing the world trading system. That system is now being subjected to powerful centrifugal forces. Concerns with unfair trade are rampant, managed trade is increasingly popular, and regionalism is spreading. The United States, the traditional bulwark of multilateralism, has recently resorted to aggressive, unilateral tactics in trade policy. To a consideration of these developments, Bhagwati brings a unique blend of economic theory, historical scholarship, and familiarity with the institutions of world trade. Bhagwati refutes facile but fashionable criticisms of the General Agreement on Tariffs and Trade (GATT). Warning of the dangers of flouting the GATT's provisions, he shows that its underlying conception of trading by rules will be undermined if we extend accusations of unfair trade practices to areas as diverse as retail distribution systems, infrastructure spending, saving rates, and workers' rights. He challenges the economic and cultural stereotypes of Japan that fuel the sentiments supporting managed trade and aggressive unilateralism. In addition, he provides novel suggestions for rebuilding the GATT and with it the world trading system itself--suggestions that should prove useful at the Uruguay Round and beyond. **Trading Blocs, U.s. Exports, And World Trade** Penelope Hartland-thunberg, 2019-09-18 This book points out that although the total trade volume of the blocs that involve less-developed countries (LDCs) has increased, this is due at least as much to a particular bloc-member's economic growth as it is a result of the trading bloc.

**Trading Blows** James Shoch, 2001 For the past two decades, trade policy has been high on the American political agenda, thanks to the growing integration of the United States into the global economy and the wealth of debate this development has sparked. Although scholars have explored ma

Termites in the Trading System Jagdish Bhagwati, 2008-07-14 Jagdish Bhagwati, the internationally renowned economist who uniquely combines a reputation as the leading scholar of international trade with a substantial presence in public policy on the important issues of the day, shines here a critical light on Preferential Trade Agreements, revealing how the rapid spread of PTAs endangers the world trading system. Numbering by now well over 300, and rapidly increasing, these preferential trade agreements, many taking the form of Free Trade Agreements, have re-created the unhappy situation of the 1930s, when world trade was undermined by discriminatory practices. Whereas this was the result of protectionism in those days, ironically it is a result of misdirected pursuit of free trade via PTAs today. The world trading system is at risk again, the author argues, and the danger is palpable. Writing with his customary wit, panache and elegance, Bhagwati documents the growth of these PTAs, the reasons for their proliferation, and their deplorable consequences which include the near-destruction of the non-discrimination which was at the heart of the postwar trade architecture and its replacement by what he has called the spaghetti bowl of a maze of preferences. Bhagwati also documents how PTAs have undermined the prospects for multilateral freeing of trade, serving as stumbling blocks, instead of building blocks, for the objective of reaching multilateral free trade. In short, Bhagwati cogently demonstrates why PTAs are Termites in the Trading System.

*Trading free* Patrick Low, 1993 In this volume, Patrick Low, makes a strong case that since WWII, too much emphasis has been focused on trade negotiations as a zero-sum game. He then offers a provocative look at new alternatives to issues and clarifies the debate going on among policymakers today.

*Trading Blocs* Kerry A. Chase, 2009-09-08 Global commerce is rapidly organizing around regional trading blocs in North America, Western Europe, Pacific Asia, and elsewhere--with potentially dangerous consequences for the world trading system. Professor Kerry Chase examines how domestic politics has driven the emergence of these trading blocs, arguing that businesses today are more favorably inclined to global trade liberalization than in the past because recent regional trading arrangements have created opportunities to restructure manufacturing more efficiently. *Trading Blocs* is the first book to systematically demonstrate the theoretical significance of economies of scale in domestic pressure for trading blocs, and thereby build on a growing research agenda in areas of political economy and domestic politics. Chase has written a superb book that provides us with an innovative and compelling explanation for the development of trading blocs. --Vinod Aggarwal, Director, Berkeley APEC Study Center, University of California, Berkeley Kerry A. Chase is Assistant Professor of Political Science at Tufts University.

**The New Global Trading Order** Dennis Patterson, Ari Afilalo, 2008-03-31 The international institutions that have governed global trade since the end of World War II have lost their effectiveness, and global trade governance is fractured. The need for new institutions is obvious, and yet, few proposals seem to be on offer. The key to understanding the global trading order lies in uncovering the relationship between trade and the State, and how the inner constitution of Statecraft drives the architecture of the global order and requires structural changes as the State traverses successive cycles. The current trade order, focused on the liberalization of trade in goods and services and the management of related issues, is predicated on policies and practices that were the product of a global trading order of the 20th-century modern nation-states. Today, a new form of the State - the post-modern State - is evolving. In this book, the authors propose a new trade norm - the enablement of global economic opportunity - and a new

institution - the Trade Council - to overhaul the global trading order.

**Trading Blocs** Jagdish N. Bhagwati, Pravin Krishna, Arvind Panagariya, 1999 The recent proliferation of free trade areas and customs unions in the world trading system has led to a revival of interest in the economic analysis of Preferential Trade Agreements (PTAs). The principal theoretical question of the 1950s and 1960s (Viner) was whether PTAs encourage or discourage the worldwide nondiscriminatory freeing of trade. The essays in this volume present the central contributions to the analytical approaches developed to examine these questions. -- Provided by publisher.

**The Post-Cold War Trading System** Sylvia Ostry, 2008-04-15 With the end of the Cold War, the search for a new international and economic order has begun. In this comprehensive account, Sylvia Ostry provides a critical analysis of an international trade system in the throes of rapid and far-reaching change. With keen historical awareness, Ostry examines the role of key economic power brokers, particularly the United States, in the reconstruction and reconfiguration of an international economy after World War II. She argues that U.S. policy efforts were so successful that they led to an unprecedented renewal of economic growth, living standards, and education levels in postwar Europe and Japan. Ironically, those same policy successes unintentionally fostered the relative decline of U.S. dominance on the world trade scene as the reduction of trade and investment barriers prompted friction and conflict between different kinds of capitalist systems. Identifying the historical and legal issues key to postwar trade policy, Ostry has commandingly charted our economic course through the last half of this century and, perhaps, into the next. Sylvia Ostry knows this subject as few others do, both as a scholar of international trade issues and a major player in the ongoing negotiations that have created the rules of the trade game. The Post-Cold War Trading System is a fine summary of where we've been and where we ought to be going.—Peter Passell, economic scene columnist for The New York Times

**Commodity Trading, Globalization and the Colonial World** Christof DeJung, 2018-01-31 Commodity Trading, Globalization and the Colonial World: Spinning the Web of the Global Market provides a new perspective on economic globalization in the nineteenth and twentieth centuries. Instead of understanding the emergence of global markets as a mere result of supply and demand or as the effect of imperial politics, this book focuses on a global trading firm as an exemplary case of the actors responsible for conducting economic transactions in a multicultural business world. The study focuses on the Swiss merchant house Volkart Bros., which was one of the most important trading houses in British India after the late nineteenth century and became one of the biggest cotton and coffee traders in the world after decolonization. The book examines the following questions: How could European merchants establish business contacts with members of the mercantile elite from India, China or Latin America? What role did a shared mercantile culture play for establishing relations of trust? How did global business change with the construction of telegraph lines and railways and the development of economic institutions such as merchant banks and commodity exchanges? And what was the connection between the business interests of transnationally operating capitalists and the territorial aspirations of national and imperial governments? Based on a five-year-long research endeavor and the examination of 24 public and private archives in seven countries and on three continents, Commodity Trading, Globalization and the Colonial World: Spinning the Web of the Global Market goes well beyond a mere company history as it highlights the relationship between multinationally operating firms and colonial governments, and the role of business culture in establishing notions of trust, both within the firm and between economic actors in different parts of the world. It thus provides a cutting-edge history of globalization from a micro-perspective. Following an actor-theoretical perspective, the book maintains that the global market that came into being in the nineteenth century can be perceived as the consequence of the interaction of various actors. Merchants, peasants, colonial bureaucrats and industrialists were all involved in spinning the individual threads of this commercial web. By connecting established approaches from business history with recent scholarship in the fields of global and colonial history, Commodity Trading, Globalization and the Colonial World: Spinning the Web of the Global Market offers a new perspective on the emergence of global enterprise and provides an important addition to the history of imperialism and economic globalization.
