**Introduction to Latvia** Gilad James, PhD, Latvia is a small country located in northern Europe, bordered by Estonia, Russia, Belarus, and Lithuania. After over 50 years of Soviet rule, Latvia gained its independence in 1991 and joined the European Union in 2004. The country is known for its picturesque countryside, dense forests, and stunning beaches along its 500-kilometer coastline. Latvia's capital city, Riga, is a UNESCO World Heritage site famous for its well-preserved medieval architecture, lively nightlife, and cosmopolitan atmosphere. The country has a population of around 1.9 million, with most people living in urban areas. The official language is Latvian, a Baltic language spoken by the majority of the population, but many people also speak English, Russian, and German. The Latvian economy has undergone significant growth and transformation since independence. The country is a member of the eurozone and has a highly skilled workforce, making it an attractive destination for foreign investors. The economy is based on a mixture of industries, with a strong focus on manufacturing, agriculture, and services. The country is also known for its IT sector, and Riga is home to a number of international technology companies. Latvia has a rich cultural heritage, with a history that dates back to the 12th century. The country celebrates many festivals and holidays throughout the year, including the Latvian Song and Dance Festival, which takes place every five years and attracts thousands of performers and visitors. Overall, Latvia is a vibrant and diverse country with a range of cultural, economic, and natural attractions that make it an intriguing destination for tourists, expats, and investors alike.

**Theory and Engineering of Complex Systems and Dependability** Wojciech Zamojski,Jacek Mazurkiewicz,Jarosław Sugier,Tomasz Walkowiak,Janusz Kacprzyk,2015-06-14 Building upon a long tradition of scientific conferences dealing with problems of reliability in technical systems, in 2006 Department of Computer Engineering at Wrocław University of Technology established DepCoS-RELCOMEX series of events in order to promote a comprehensive approach to evaluation of system performability which is now commonly called dependability. Contemporary complex systems integrate variety of technical, information, software and human (users, administrators and management) resources. Their complexity comes not only from involved technical and organizational structures but mainly from complexity of information processes that must be implemented in specific operational environment (data processing, monitoring, management, etc.). In such a case traditional methods of reliability evaluation focused mainly on technical levels are insufficient and more innovative, multidisciplinary methods of dependability analysis must be applied. Selection of submissions for these proceedings exemplify diversity of topics that must be included in such analyses: tools, methodologies and standards for modelling, design and simulation of the systems, security and confidentiality in information processing, specific issues of heterogeneous, today often wireless, computer networks, or management of

transportation networks. In addition, this edition of the conference hosted the 5th CrISS-DESSERT Workshop devoted to the problems of security and safety in critical information systems.
