Worlds in Play Suzanne De Castell,Jennifer Jenson,2007 Worlds in Play, a map of the «state of play» in digital games research today, illustrates the great variety and extreme contrasts in the landscape cleft by contemporary digital games research. The chapters in this volume are the work of an international review board of seventy game-study specialists from fields spanning social sciences, arts, and humanities to the physical and applied sciences and technologies. A wellspring of inspiring concepts, models, protocols, data, methods, tools, critical perspectives, and directions for future work, Worlds in Play will support and assist in reading not only within, but across fields of play - disciplinary, temporal, and geographical - and encourage all of us to widen our focus to encompass the omni-dimensional phenomenon of «worlds in play.»

Memoirs of a Greyhound Bus Driver Grady Hall Morgan,2005-03
New York Cab Driver and His Fare Charles Vidich,2017-09-29 Using information derived from research and interviews with cab drivers, Vidich has written a basic work on New York City cab drivers (hacks) that also provides passengers (fares) with a survival manual. Cab drivers are quoted by newspaper columnists, politicians, and at dinner parties; yet a hard look at the profession and its role in the transportation system of the city has been completely lacking. Vidich brings out in clear language the conflicts between the cab driver's position as a dispenser of a public service and his needs as a working person subjected to violence and pressure. It is difficult to imagine a more enjoyable introduction to an industry whose members are a folk tradition. At the same time, this book provides insight into the history and sociology of an important urban institution. It is a book about cab drivers everywhere; and cab drivers and fares in all cities have a new handbook in this volume.

Train Driver Roger Taylor,2009
Driver Behaviour and Training: Dr. Lisa Dorn,2017-07-05 Research on driver behaviour over the past two decades has clearly demonstrated that the goals and motivations a driver brings to the driving task are important determinants for driver behaviour. The importance of this work is underlined by statistics: WHO figures show that road accidents are predicted to be the number three cause of death and injury by 2020 (currently more than 20 million deaths and injuries p.a.). The objective of this second edition, and of the conference on which it is based, is to describe and discuss recent advances in the study of driving behaviour and driver training. It bridges the gap between practitioners in road safety, and theoreticians investigating driving behaviour, from a number of different perspectives and related disciplines. A major focus is to consider how driver training needs to be adapted, to take into account driver characteristics, goals and motivations, in order to raise awareness of how these may contribute to unsafe driving behaviour, and to go on to promote the development of driver training courses that considers all the skills that are essential for road safety. As well as setting out new approaches to driver training methodology based on many years of empirical research on driver behaviour, the contributing road safety researchers and professionals consider the impact of human factors in the design of driver training as well as the traditional skills-based approach. Readership includes road safety researchers from a variety of different academic backgrounds, senior practitioners in the field of driver training from regulatory authorities and professional driver training organizations such as the police service, and private and public sector personnel who are concerned with improving road safety.

School Bus Wisdom Barry Dorshimer,2012-01-30 The purpose of this book, SCHOOL BUS WISDOM, is to aid the new school bus driver as well as the seasoned school bus driver in keeping their attitude, skills, safety performance and their interaction with students positive, professional, and sharp. Every School Bus driver who transports a part of that precious cargo of 24 million students to and from schools across this vast nation every day, of each school year, will benefit from this book. This book has a massive audience: Every School District throughout this country, as well as the contractors who serve School Districts which do not operate their own School Transportation. The audience also includes Parents and Guardians of students who ride a School Bus and the combination of material would be valuable information for the students themselves. Much of the information found in this book is not included in current school bus driving manuals or training materials. This is a collection of thoughts and ideas to help school bus drivers achieve positive results. This safety tool would make an excellent gift for all school bus drivers who qualify for a

safety award at the end of the school year. Read a blog about the book through this link: <http://schoolbuswisdom.com/blog/>

How's My Driving? Steve Dziadik,2022-10-17 How do YOU see your driving safety? The primarily goal of this book is to encourage an increase in the level of defensive driving awareness for the reader. The author utilizes some of his family's unfortunate driving experiences, wherever possible, for added emphasis. The benefit to the reader is an opportunity to feel the pain his family felt and learn from it. His chapter on Automobile Insurance 101 will break coverages down in a way that is palatable, as well as useful. Finding out AFTER a crash what protection should have been in place is tragic. Driving safely is no accident. Understanding and practicing that phrase will result in a safer and happier commuting life for everyone!

In the Driver's Seat Ron Goor,Nancy Goor,1982 Photographs and text present a driver's-eye-view of operating an eighteen-wheeler, combine, train, blimp, front-end loader, Concorde jet, crane, race car, tank and other vehicles.
