Handbook of Concierge Medical Practice Design Maria K. Todd, 2014-12-10 In concierge medicine, physicians develop amenities-rich membership programs and collect a monthly or annual membership fee to pay for the amenities in addition to the medical services rendered. *Handbook of Concierge Medical Practice Design* examines the many considerations physicians must make prior to transitioning their practices into concierge services. Maria K. Todd, a recognized expert in concierge medicine, branding, consulting, healthcare, marketing, medical tourism, planning, and physician practice administration, explains how to set up a concierge practice. She describes how this new business model affects workflow and outlines financial considerations—including managed care payer relations, the hybrid practice, and predictive modeling—to uncover the hidden factors that affect bottom-line performance. The book supplies readers with models for creating a business plan and a strategy for transforming a practice into a concierge practice. It concludes by covering the legal aspects of creating a concierge practice. It includes patient acquisition and retention strategies as well as detailed plans for adding additional doctors and physician extenders, such as nurse practitioners and physician assistants. The book provides sample employment contracts and advice on how to select and work with consultants. It includes chapters on business process re-engineering, workflow

management, financial considerations, competitive analysis, developing a business plan, and how to market the new practice.

Life Transitions in America Francesco Duina, 2014-02-12 We celebrate, talk about, and worry a great deal about transitions in life. Going to college, having a first child, losing a job, and retiring constitute just a few of the pivotal moments in the lives of many. Sociologists and psychologists have devoted considerable attention to life transitions. Yet we know very little about whether there exists a common thread to our understandings of life transitions in general. How do journalists, leading politicians, sport icons, bestselling authors, government agencies, Hallmark cards, popular TV shows, and other "voices" of popular culture talk about transitions in life? Do these voices provide a coherent picture of how we make sense of life transitions? In this book, Francesco Duina shows how the dominant American discourse articulates two basic approaches to transitions in life. The first approach depicts transitions as exciting, individualistic opportunities for new beginnings: the past is cast aside, the future is wide open, and the self has the opportunity to recreate itself anew. The second paints transitions as having to do with continuity, our connections to others, and the life-cycle, with an emphasis on acceptance and adaptation. Though contrasting, the two approaches ultimately complement each other. Their analysis reveals a great deal about American culture and society, and will be of great interest to

students of the life course and the sociology of culture.

Science Fiction: The Year's Best (2006 Edition) Joe Haldeman, Alastair Reynolds, 2014-01-08 Horton's elegiac anthology of 15 mostly hard SF stories illuminates a broad spectrum of grief over love thwarted through time, space, human frailty or alien intervention, from the gentle melancholy of Michael Swanwick's Triceratops Summer, which posits tame Technicolored time-warped dinosaurs in Vermont, to newcomer Leah Bobet's Bliss, an agonizing riff on near-future drug addiction. Several selections address current political-social issues, like Mary Rosenblum's Search Engine, which extrapolates today's technology to chilling, Big Brotherly results. The long closing story, Alastair Reynolds's Understanding Space and Time, however, presents a ray of cosmic hope: the sole survivor of a plague that decimated humanity is rescued and healed by intergalactic entities and lives out millennia while seeking ultimate truths, returning to see mankind regenerated. This anthology reflects the concerns of the genre today—and the apparent inability of our society to do anything about them. -- Publishers Weekly

Transitions Greta Manville,2011-06-24 Words to a writer are as exotic as spices to a gourmet cook. Writers savor the feel of the perfect verb. Writers work and rework sentences and paragraphs until each word feels right as it rolls off the tongue or the pen (or the computer). Consider yourself invited to turn the page and meet the writers who are about to entertain you. You will know them as they lead you on their adventures. They will coax you to remember a crazy character, will perhaps make you cry. And, just maybe, as they draw your rapt at-tention with their short stories, essays, and poetry, you will realize, Hey, I think I can write stories . . . I think I should join the AAUW Creative Writers group. Well wait for your call. Special thanks go to writer and editor Greta Manville, the groups most published author, and to the members who joined me on the editing team: Vivian Wood, the groups most lettered colleague, and Bonnie Boyce-Wilson, who organized our efforts. Medical Travel Brand Management Frederick J. DeMicco, Ali A. Poorani, 2022-10-27 This new volume, which complements the editors' earlier volume Medical Travel Brand Management: Success Strategies for Hospitality Bridging Healthcare (H2H), explores the multitude of medical travel services and discusses the integration of traveling medical guests with destination providers, hospitality/healthcare professionals, and travel service providers. The editors also address the impact the COVID-19 pandemic has made on the

travel industry, which has motivated them to bring together major players, renowned authors, practitioners, and researchers to create this book to help prepare the medical tourism market to not only recover from the devastating effects of the pandemic but also to provide tools and cases that will help to structure successful destinations for medical travel. From chapters on branding to assessing accreditation and post-care quality metrics, Drs. DeMicco, Poorani, and their fellow contributors take the reader through the critical phases of the medical travel journey: pre-visit, travel, on-site care, discharge and follow-up care. The authors address critical issues facing medical, health, and wellness travel from both macro and micro perspectives. Presentations of best practices and strategies demonstrate how some destinations have built, renewed, or engaged various stakeholders to construct or enhance their medical tourism destination. Medical Travel: Hospitality Bridging Healthcare (H2H) © also showcases best practices and innovative ways of designing and operating a profitable and entrepreneurial practice. Quality issues, aesthetics, and legal issues related to inbound and outbound medical tourism are also presented. The book explores the evolving nature of hospital design and the complex relationship between people and medicine as manifested in the relationship of hospital aesthetics to patient satisfaction. Importantly, the book also includes a chapter addressing medical health travel during the pandemic which describes how the pandemic has revolutionized telehealth and the medical travel industry, which can leverage the advances made in digital health and telemedicine. This volume will be an important resource for the four main players at the center of medical travel: medical travelers themselves, government agencies, intermediaries, and health and wellness providers. The selected best practices, research,

cases, innovative strategies, SWOT analysis, and toolkits address the aims of all stakeholders.

Green Building Transitions Julia Affolderbach, Christian Schulz, 2018-05-15 This volume analyzes sustainability-related innovations in the building sector and discusses how regional contexts articulate transition trajectories toward green building. It presents

'biographies' of drivers and processes of green building innovation in four case studies: Brisbane (AUS), Freiburg (GER), Luxembourg (LU), and Vancouver (CA). Two of them are relatively well known for their initiatives to mitigate climate change – particularly in the building sector, whereas the other two have only recently become more active in promoting green building. The volume places emphasis on development paths, learning processes, and innovations. The focus of the case studies is not restricted to purely technological aspects but also integrates regulatory, procedural, institutional, and other processes and routines and their influence on the variations of the building sector. The diversity of the selected case studies offers the reader the opportunity to gain a thorough understanding of how sustainability developments have unfolded in different city regions. Case study-specific catalogues of transition paths provide insights to inform policy debates and planning processes. The catalogues identify crucial innovations (technological, regulatory, etc.) and explain the factors and circumstances that have led to their success and broader acceptance in Freiburg, Vancouver, Luxembourg, and Brisbane. With the help of a number of micro case studies within each of the four city regions, the case studies also offer ground for comparison and identification of differences. The book represents the outcome of the GreenRegio project, which stands for 'Green building in regional strategies for sustainability: multi-actor governance and innovative building technologies in Europe, Australia, and Canada.' GreenRegio was a 3-year CORE-INTER research project funded by the National Research Fund Luxembourg (FNR) and the German Research Foundation (DFG).
