Maria T. Sanchez

The Problems of Literary Translation Maria T. Sanchez,2009 This volume examines the various linguistic and cultural problems which point towards the practical impossibility of conveying in one language exactly what was originally said in another. The author provides an exhaustive discussion of Spanish translations from English texts, including non-standard registers. Equivalence across languages, that most elusive of terms in the whole theory of translation, is discussed in terms of linguistic equivalence, textual equivalence, cultural equivalence and pragmatic equivalence. Other aspects studied include how translation has been perceived over the centuries, the differences and the similarities between a writer and a translator, plus a detailed examination of translation as process, all of which bring the problems of literary translation into perspective.

Poetry Translating as Expert Action Francis R. Jones,2011-07-20 Poetry is a highly valued form of human expression, and poems are challenging texts to translate. For both reasons, people willingly work long and hard to translate them, for little pay but potentially high personal satisfaction. This book shows how experienced poetry translators translate poems and bring them to readers, and how they not only shape new poems, but also help communicate images of the source culture. It uses cognitive and sociological translation-studies methods to analyse real data, most of it from two contrasting source countries, the Netherlands and Bosnia. Case studies, including think-aloud studies, analyse how translators translate poems. In interviews, translators explain why and how they translate. And a 17-year survey of a country's poetry-translation output explores how translators work within networks of other people and texts – publishing teams, fellow translators, source-culture enthusiasts, and translation readers and critics. In mapping the whole sweep of poetry translators' action, from micro-cognitive to macro-social, this book gives the first translation-studies overview of poetry translating since the 1970s.

The fifth section is devoted to the developments that have provoked ongoing changes in the profession and industry, such as ICT, and the impact of industrialisation, internationalisation, and globalisation. The final section is devoted to the major issues involved in translator training. A glossary is provided, together with a list of Websites for further browsing.

The Translator as Writer Susan Bassnett, Peter Bush, 2007-11-15 Over the last two decades, interest in translation around the world has increased beyond any predictions. International bestseller lists now contain large numbers of translated works, and writers from Latin America, Africa, India and China have joined the lists of eminent, bestselling European writers and those from the global English-speaking world. Despite this, translators tend to be invisible, as are the processes they follow and the strategies they employ when translating. The Translator as Writer bridges the divide between those who study translation and those who produce translations, through essays written by well-known translators talking about their own work as distinctive creative literary practice. The book emphasises this creativity, arguing that translators are effectively writers, or rewriters who produce works that can be read and enjoyed by an entirely new audience. The aim of the book is to give a proper prominence to the role of translators and in so doing to move attention back to the act of translating, away from more abstract speculation about what translation might involve.

Training the Translator Paul Kussmaul, 1995-03-16 This book begins by investigating, through the use of think-aloud protocols, the mental processes of students when they translate. The creative and successful processes observed can be used directly for teaching purposes, while the unsuccessful ones can serve to find out where remedial training is needed. The book then goes on to discuss methods for improving a translator's competence. The strategies offered are based on the pragmatic and semantic analysis of texts from a functional point of view, and they include such practical matters as the use of dictionaries and the evaluation of translations and error analysis. The book is intended for teachers in translator-training institutions, but it can also be used by students for self-training.

Translation, Travel, Migration Loredana Polezzi, 2016-04-08 The connection between travel and translation is often evoked in contemporary critical theory, both practices seen as metaphors of mobility and flux linked to globalized 'post-modern' society. Travel is a multiple activity, encompassing temporary and voluntary displacement, repeated movement, exile, economic migration, diaspora. Places of origin are often plural and unstable, in spite of the enduring appeal of traditional labels such as 'mother country' or 'patrie'. The multiple interfaces between translation, travel and migration are the focus of all contributions in this special issue. Starting from different points of view, and using a variety of methodologies, the authors raise fundamental questions about the way in which we perceive the link between language, national or ethnic identity, and individual voice. Topics range from the interaction between travel, travel narratives and translation in early English representations of China, to the special role played by interpreters in mediating the first contact between a literate and a non-literate culture; from the

multiple functions and audiences addressed by contemporary Romani literature and its translation, to the political as well a cultural implications of translating popular music across the Bosphorus. A number of the articles focus on detailed textual analysis, covering the intersection between exile, self-translation and translingualism in the work of Manuel Puig; the uses and limitations of translation in the works of migrant authors; or the impact on figurations of Europe of experimental work embracing polylingualism. Collectively, these contributions also underline the importance of a closer examination of our assumptions about who the translators and the interpreters are, and what roles they play in our society.
