Train DK,2014-10-01 This glorious visual celebration of train travel keeps you on the right track with stop-offs at the most important and incredible rail routes from all over the world. Your first stop in The Train Book is the groundbreaking steam locomotives of the 19th century and your final destination is the high-speed bullet trains of today. From the Union-Pacific Railroad to the Trans-Siberian Railway, you'll cross the continents to experience epic journeys and staggering scenery. You'll pick a seat on the most iconic locomotives, including the Orient Express, the Blue Train, and the Eurostar. You can also inspect the engines of famous British trains, such as Rocket, Mallard, and Javelin, and international trains, such as India's Palace on Wheels and America's Thatcher Perkins. You'll meet the true pioneers of train and track, including Father of the Railways George Stephenson, engineering legend Isambard Kingdom Brunel, and Métro maestro Fulgence Bienvenüe. For train-spotters and transport enthusiasts everywhere, this is your trip of a lifetime.

Pacific Northwest and Alaska 1995 University of California, Berkeley. Associated Students,1995 Here is the perfect guide to take with you to the great Pacific Northwest and Alaska. This guide is packed with information not found in other guides. The students at Berkeley outline the best cheap places for lodging and dining, the best trails for hiking or biking. . . . It's all here--with comprehensive maps.

Urban Transportation D. Johnson Victor,S. Ponnuswamy,2012 Urban Transportation has become a subject of major interest for students, academia and practicing engineers in the government and private sector. So far, there is hardly any book available on the subject written by Indian authors covering the subject in the context of a developing country. In order to meet the demand, the authors have come together to pool their knowledge gained as a teacher and a practicing engineer respectively and write this book. This book has been prepared to fit in with the syllabus on Urban Transport and Public Transport taught at graduate level in various universities and Indian Institutes of Technology as well as Schools of Planning. At the same time, the book can be used as a reference book by practicing engineers and consultants. It covers the subject of planning for transportation in an urban area including basic principles and current practices. Special emphasis has been given to conditions in India and developing countries.

Rails Across Dixie Jim Cox,2010-11-17 Covering legendary and obscure intercity passenger trains in a dozen Southeastern states, this book details the golden age of train travel. The story begins with the inception of steam locomotives in 1830 in Charleston, South Carolina, continuing through the mid-1930s changeover to diesel and the debut of Amtrak in 1971 to the present. Throughout, the book explores the technological achievements, the romance and the economic impact of traveling on the tracks. Other topics include contemporary museums and excursion trains; the development of commuter rails, monorails, light rails, and other intracity transit trains; the social impact of train travel; and historical rail terminals and facilities. The book is supplemented with more than 160 images and 10 appendices.

Trains, Buses, People Christof Spieler,2018-10-23 What are the best transit cities in the US? The best Bus Rapid Transit lines? The most useless rail transit lines? The missed opportunities? In the US, the 25 largest metropolitan areas and many smaller cities have fixed guideway transit-rail or bus rapid transit. Nearly all of them are talking about expanding. Yet discussions about transit are still remarkably unsophisticated. To build good transit, the discussion needs to focus on what matters—quality of service (not the technology that delivers it), all kinds of transit riders, the role of buildings, streets and sidewalks, and, above all, getting transit in the right places. Christof Spieler has spent over a decade advocating for transit as a writer, community leader, urban planner, transit board member, and

enthusiast. He strongly believes that just about anyone—regardless of training or experience—can identify what makes good transit with the right information. In the fun and accessible *Trains, Buses, People: An Opinionated Atlas of US Transit*, Spieler shows how cities can build successful transit. He profiles the 47 metropolitan areas in the US that have rail transit or BRT, using data, photos, and maps for easy comparison. The best and worst systems are ranked and Spieler offers analysis of how geography, politics, and history complicate transit planning. He shows how the unique circumstances of every city have resulted in very different transit systems. Using appealing visuals, *Trains, Buses, People* is intended for non-experts—it will help any citizen, professional, or policymaker with a vested interest evaluate a transit proposal and understand what makes transit effective. While the book is built on data, it has a strong point of view. Spieler takes an honest look at what makes good and bad transit and is not afraid to look at what went wrong. He explains broad concepts, but recognizes all of the technical, geographical, and political difficulties of building transit in the real world. In the end, *Trains, Buses, People* shows that it is possible with the right tools to build good transit.

Warhol-isms Andy Warhol, 2022-05-10 A unique collection of brilliant quotations from the legendary Pop artist One of the most influential artists of his time and ours, Andy Warhol is nearly as renowned for what he said as for what he did. Indeed, he is so quotable that things he never said are endlessly and plausibly attributed to him, including, fittingly, the most celebrated fake Warhol saying—"In the future, everyone will be world-famous for 15 minutes." *Warhol-isms* separates legend from fact to present a unique and comprehensive collection of authentic quotations from the Pop artist. Gathered from interviews and other primary sources, these deadpan, droll, ironic, and sincere gems—in which a superficial embrace of superficiality often disguises provocative, unconventional ideas—provide compelling insights into the life and work of an artist who has left an indelible mark on art and popular culture. Select quotations from the book: I think an artist is anybody who does something well. I went to [a psychiatrist] once, and he never called me back. They always say that time changes things, but you actually have to change them yourself. I've never met a person I couldn't call a beauty. New things are always better than old things. I'm still a commercial artist. I was always a commercial artist.

Human Transit Jarrett Walker, 2012-07-29 Public transit is a powerful tool for addressing a huge range of urban problems, including traffic congestion and economic development as well as climate change. But while many people support transit in the abstract, it's often hard to channel that support into good transit investments. Part of the problem is that transit debates attract many kinds of experts, who often talk past each other. Ordinary people listen to a little of this and decide that transit is impossible to figure out. Jarrett Walker believes that transit can be simple, if we focus first on the underlying geometry that all transit technologies share. In *Human Transit*, Walker supplies the basic tools, the critical questions, and the means to make smarter decisions about designing and implementing transit services. *Human Transit* explains the fundamental geometry of transit that shapes successful systems; the process for fitting technology to a particular community; and the local choices that lead to transit-friendly development.

Whether you are in the field or simply a concerned citizen, here is an accessible guide to achieving successful public transit that will enrich any community.

A Walking Life Antonia Malchik, 2019-05-07 For readers of On Trails, this is an incisive, utterly engaging exploration of walking: how it is fundamental to our being human, how we've designed it out of our lives, and how it is essential that we reembrace it. I'm going for a walk. How often has this phrase been uttered by someone with a heart full of anger or sorrow? Or as an invitation, a precursor to a declaration of love? Our species and its predecessors have been bipedal walkers for at least six million years; by now, we take this seemingly arbitrary motion for granted. Yet how many of us still really walk in our everyday lives? Driven by a combination of a car-centric culture and an insatiable thirst for productivity and efficiency, we're spending more time sedentary and alone than we ever have before. If bipedal walking is truly what makes our species human, as paleoanthropologists claim, what does it mean that we are designing walking right out of our lives? Antonia Malchik asks essential questions at the center of humanity's evolution and social structures: Who gets to walk, and where? How did we lose the right to walk, and what implications does that have for the strength of our communities, the future of democracy, and the pervasive loneliness of individual lives? The loss of walking as an individual and a community act has the potential to destroy our deepest spiritual connections, our democratic society, our neighborhoods, and our freedom. But we can change the course of our mobility. And we need to. Delving into a wealth of science, history, and anecdote -- from our deepest origins as hominins to our first steps as babies, to universal design and social infrastructure, *A Walking Life* shows exactly how walking is essential, how deeply reliant our brains and bodies are on this simple pedestrian act -- and how we can reclaim it.

Transport Planning for Third World Cities (Routledge Revivals) Harry T. Dimitriou, 2013-06-26 Cities within the developing world experience a form of urban development which is different to those in more industrialised countries. Rates of growth are usually much more dramatic, housing and transport are often provided informally, and institutional support for urban management is also much weaker. The crux of this book, first published in 1990, lies in the idea that urban transport planning cannot be viewed in isolation from this wider development context. Making special reference to a number of countries, including Brazil, India and Indonesia, chapters discuss problems of urban transport planning, deficiencies in the theory and practice of conventional transport planning, and the emerging alternatives in the countries under examination. This work addresses problems that are still of great concern to urban policy planners, professionals and academics, as well as students from the fields of development studies, urban geography and planning, architecture and civil engineering.

The Ophthalmology Examinations Review Tien Yin Wong, 2001 Latest Edition: The Ophthalmology Examinations Review (3rd Edition) This book is targeted at the final year ophthalmology resident taking the specialist ophthalmology exams, and deals primarily with key topics that are important from the examination viewpoint. Only material that is considered relevant to the exams is covered. The book will help the trainee or resident organize and synthesize knowledge acquired from various other sources or textbooks. While not meant to replace the standard textbooks, it contains enough information

to serve as the main revision text nearer the exams. The style of the book is didactic, with questions and short answers. The short answers are designed to be repetitive so as to enhance memory. The answer includes a model opening statement, followed usually by a classification system to aid organization of facts and then by the bulk of the answer in concise notes. Exam Tips are inserted to provide insight into how to answer different types of questions and, when appropriate, a Clinical Approach section is also included. Scattered within the text are hundreds of mnemonics to help the candidate in the final stages of preparation for the exams.

Transportation, Land Use, and Environmental Planning Elizabeth

Deakin, 2019-10 Transportation, Land Use, and Environmental Planning examines the practices and policies linking transportation, land use and environmental planning needed to achieve a healthy environment, thriving economy, and more equitable and inclusive society. It assesses best practices for improving the performance of city and regional transportation systems, looking at such issues as public transit and non-motorized travel investments, mixed use and higher density urban development, radically transformed vehicles, and transportation systems. The book lays out the growing need for greater integration of transportation, land use, and environmental planning, looking closely at changing demographic needs, public health concerns, housing affordability, equity, and livability. In addition, strategies for achieving these desired outcomes are presented, including urban design and land use planning, regional and corridor-level transit plans, bike and pedestrian improvements, demand management strategies, and emerging technologies and services. The final part of the book examines implementation challenges, considering lessons from the US and around the globe at both local and regional levels. Introduces never-before-published research Offers best practices for transit, cycling, urban design and housing provision Assesses emerging developments, such as smart cities, new vehicle technologies, automated highways and transportation sharing Examines the institutional and political dimensions of sustainability planning at the urban and regional levels Utilizes case studies from around the world that show alternative ways forward

The Habit Trip Sarah Hays Coomer, 2020-12-01 Live a life of motivation and purpose with *The Habit Trip*, an active journey to self-discovery, one micro-change at a time! When something feels wrong, your routines are a mess, and nothing is working, you want to make a change. The impulse is to go big: start a ten-day fast. Work out five times a week. Quit your job, end your marriage, and move to Dubai -- raze it all to the ground. But those drastic efforts tend to fizzle out before they've even begun. *The Habit Trip* maps the topography of who you are and what you love, revealing a personalized infrastructure for well-being that is hiding in plain sight. The journey is divided into three sections: **The Situation:** evaluate your life in ten areas to identify what's working and what's not **The Solution:** find micro-doses of solace and strength to bolster your health and stability **The Payoff:** amplify the power, peace, and presence that comes with knowing what matters most *The Habit Trip* is an actionable antidote for stress and frustration, nestled inside of an interactive workbook in which you are the one and only expert. By the end of your rollicking journey (accompanied by a host of enchanted creatures), you'll have charted an easier way to roll through the joyful chaos of life, one habit at a time. Your challenges, your solutions, your way.

Planetizen's Contemporary Debates in Urban Planning Abhijeet

Chavan, Christian Peralta, Christopher Steins, Planetizen, 2007-07-06

Planetizen's Contemporary Debates in Urban Planning is a fascinating review of major topics and issues discussed in the field of urban planning, assembled by editors at Planetizen, the leading source of news and information for the planning and development community on the web. The book brings together a wide range of editorial and discussion topics, coupled with

commentary and overviews to create an enlightening record of the continuously evolving philosophy of building and managing cities. The book's contributors include the most well-known experts in the planning and design fields, among them James Howard Kunstler, Alex Garvin, Andres Duany, Joel Kotkin, and Wendell Cox. These and other prominent thinkers offer passionate debates and thought-provoking commentary on the most important and controversial topics in the field of urban planning and design: gentrification, eminent domain, the philosophical divide between the Smart Growth community, libertarians and New Urbanists, regional growth patterns, urban design trends, transportation systems, and reaction to disasters such as Katrina and 9/11 that changed the way we look at cities and security. Planetizen's Contemporary Debates in Urban Planning provides readers with a unique and accessible introduction to a broad array of ideas and perspectives. With the increasing awareness of the need for sound urban planning to ensure the economic, environmental, and social health of modern society, Planetizen's Contemporary Debates in Urban Planning gives professionals in the field and concerned citizens alike a deeper understanding of the critical, complex issues that continue to challenge urban planners, designers, and developers.

The Lake Shore Limited Sue Miller, 2010-07-05 'Deeply affecting ... exquisite' Washington Post 'Subtle and truthful' Sadie Jones 'Acutely observant ... heartbreaking' Daily Telegraph Ever since her boyfriend Gus was killed in 9/11, Billy has been pretending. She finds it easier to stay silent and go through the motions of grief than tell the truth: that she was planning to leave Gus, and that his death left her feeling a mixture of ambivalence and anguish that she is still struggling to resolve. Drawing from her experience, Billy writes a play: 'The Lake Shore Limited'. The opening night brings together three people whose lives intersect and interweave with Billy's: Leslie, Gus's older sister, haunted by his death and constantly aware of what could have been; Rafe, the actor who brings the joy and sadness of his own marriage into his role; and Sam, a recently divorced man who is irresistibly drawn to Billy's distinctive, enigmatic beauty. Together these four voices create a mesmerizing novel of entanglements, connections and inconsolable losses. What readers are saying about **The Lake Shore Limited**: 'Sue Miller at her best ... Beautiful, moving, enriching' 'A multi-layered story that exposes the dark and light side of the human condition' 'So real, intimate and honest' 'Dazzling' 'Miraculous' 'Sue Miller's writing is outstanding and beautiful. Definitely five stars' 'One of the best books I've read in a long time' 'I loved it' 'Original and transformative' 'I adore this book, and can't recommend it strongly enough'
