**Human Aspects of Information Security and Assurance** Nathan Clarke, Steven Furnell, 2020-08-21 This book constitutes the proceedings of the 14th IFIP WG 11.12 International Symposium on Human Aspects of Information Security and Assurance, HAISA 2020, held in Mytilene, Lesbos, Greece, in July 2020.\* The 27 full papers presented in this volume were carefully reviewed and selected from 43 submissions. They are organized in the following topical sections: privacy and COVID-19; awareness and training; social engineering; security behavior; education; end-user security; usable security; security policy; and attitudes and perceptions. \*The symposium was held virtually due to the COVID-19 pandemic.

**French Dictionary of Information Technology** Terry Pyper, 2020-08-26 Given the recent advances in telecommunications and the fact that the French lead the field in many aspects of information technology, this will be a valuable tool for students, translators and interpreters. The author has himself worked for a number of years as a technical translator and the dictionary reflects his knowledge and practical experience. 30,000 entries in each language cover terminology used in telecommunications, electronics and computer science, and developments in related disciplines such as the design and manufacture of printed circuits and components, installation, testing, maintenance and software programming.

**Sound Reinforcement for Audio Engineers** Wolfgang Ahnert, Dirk Noy, 2022-08-31 Sound Reinforcement for Audio Engineers illustrates the current state of the art in sound reinforcement. Beginning with an outline of various fields of applications, from sports venues to religious venues, corporate environments and cinemas, this book is split into 11 chapters covering room acoustics, loudspeakers, microphones and acoustic modelling among many other topics. This comprehensive book packed with references and a historical overview of sound reinforcement design is an essential reference book for students of acoustics and electrical engineering, but also for engineers looking to expand their knowledge of designing sound reinforcement systems.

*From Animals to Robots and Back: Reflections on Hard Problems in the Study of Cognition* Jeremy L. Wyatt, Dean D. Petters, David C. Hogg, 2014-07-10 Cognitive Science is a discipline that brings together research in natural and artificial systems and this is clearly reflected in the diverse contributions to *From Animals to Robots and Back*. In tribute to Aaron Sloman and his pioneering work in Cognitive Science and Artificial Intelligence, the editors have collected a unique collection of cross-disciplinary papers that include work on: · intelligent robotics; · philosophy of cognitive science; · emotional research · computational vision; · comparative psychology; and · human-computer interaction. Key themes such as the importance of taking an architectural view in approaching cognition, run through the text. Drawing on the expertise of leading international researchers, contemporary debates in the study of natural and artificial cognition are addressed from complementary and contrasting perspectives with key issues being outlined at various levels of abstraction. *From Animals to Robots and Back*, will give readers with backgrounds in the study of both natural and artificial cognition an important window on the state of the art in cognitive systems research.

**Understanding Buildings a Multidisciplinary Approach** E. Reid, 2013-11-04 This book meets the needs for a basic, yet comprehensive and up-to-date, introductory text to building technology for students in architecture and the other disciplines in building design. The wide coverage is organised under the chapter headings: structure, enclosure, climate services, utility services, lighting, acoustics, fire safety, the future? The treatment in each case is concentrated on the close relationship between good design practice and the basic underlying scientific and practical principles, but stopping short of the high level theory which is to be found in other more closely specialised texts. This well illustrated and highly readable book will be invaluable to the student and of interest to the practitioner too, both in architecture and in its related technical fields.

Symmetry, Spectroscopy, and Crystallography Robert Glaser, 2015-10-05 Written in a clear and understandable manner, this book provides a comprehensive, yet non-mathematical, treatment of the topic, covering the basic principles of symmetry and the important spectroscopic techniques used to probe molecular structure. The chapters are extensively illustrated and deal with such topics as symmetry elements, operations and descriptors, symmetry guidelines, high-fidelity pseudosymmetry, crystallographic symmetry, molecular gears, and experimental techniques, including X-ray crystallography and NMR spectroscopy. As an additional feature, 3D animations of most of the structures and molecules covered are available online at wiley.com. As a result, chemists learn how to understand and predict molecular structures and reactivity. Authored by a renowned expert with numerous publications and an excellent track record in research and teaching, this is a useful source for graduate students and researchers working in the field of organic synthesis, physical chemistry, biochemistry, and crystallography, while equally serving as supplementary reading for courses on stereochemistry, organic synthesis, or crystallography.

**The Worst Weather on Earth** William Lowell Putnam, 1991-06-01 There may be worse weather, from time to time, at some forbidding place on Planet Earth, but it has yet to be reliably recorded. So begins *The Worst Weather on Earth: A History of the Mount Washington Observatory*. Mount Washington, at 6,288 feet above sea level, is one of the highest elevations in the eastern United States and is subject to some of the fiercest weather patterns in the world. Situated close to major centers of population, it has been an accessible objective for travellers. The curious, the intrepid, the scientific -- Mount Washington has attracted them all. In this age of satellites and advanced instrumentation, the intricacies of weather observation are now taken for granted. However, not so long ago, weather was a blank on the scientific map of understanding. *The Worst Weather on Earth* chronicles the social and scientific milieu of those who have recorded the weather on the mountain for over one hundred years. Included are chapters such as *Radio on the Rockpile*, which covers the pioneering days of radio broadcasting from the Summit, and *Rime and Reason*, which presents a fascinating discussion of rime and the problems of icing that were researched extensively on the Summit. *The Worst Weather on Earth* is rendered more immediate by the liberal use of contemporary accounts; excerpts from letters, reports, and the log notes of the Summit observers abound, giving the flavor and the excitement of over a century of scientific observation and discovery.

**Leadership Standards in Action** Cade Brumley, 2012 *Leadership Standards for Action: The School Principal as Servant-Leader* is a powerful resource for aspiring principals, practicing principals, district leadership, and university faculty. The book responsibly unpacks the metaphor of principal as servant leader to the school's people and purpose. As a framework, the six ISLLC Standards of Educational Leadership are examined through the lens of a principal as servant leader. The text is rich with insights from a former

school principal passionate about living and leading in a more caring, effective, and humanistic manner that seeks results in student learning and organizational health. Using a combination of theoretical research, practical lessons, and case story, the book illuminates the possibilities for the school principal within the reality of today's accountability era. Topics within the book include the principalship, servant-leadership, visionary leadership, instructional leadership, organizational leadership, collaborative leadership, ethical leadership, and political leadership. This book will enrich the professional views and practice of educators willing to embark on the journey of its contents.
