Steam Trains and Jigsaw Puzzles David Platt,2007-07-18 Steam Trains and Jigsaw Puzzles strikes most people as an intriguing title. The origin is simple,however my trainspotting youth has been synchronized with a later interest in jigsaw puzzles. The result is expensive I have a collection of over 250 jigsaws depicting British steam railways. The conclusion is impossible there are over 500 steam railway jigsaw puzzles to collect and they are being supplemented annually. The Liverpool & Manchester Railway marked the arrival of the true passenger railway service in 1830 and presented jigsaw manufacturers with another subject on which to focus. Prior to this date the jigsaw experience, started by John Spilsbury in c1760, was restricted to subjects such as religion, geography, history, monarchs, the alphabet and art. Many characteristics combine to form the basis of nostalgic images buried indelibly in the minds of people who travelled in the steam railway age. Manufacturers have not been slow to tap into this nostalgia and produce jigsaws aimed at stirring those memories and inviting people to reflect on past experiences, good, bad or indifferent. Chad Valley, Victory, Good Companion,Falcon, Waddingtons and Arrow are just a few manufacturers who produced steam railway jigsaws in the past. Most of these companies are now a distant memory while others are in foreign ownership. Equally famous names such as Wentworth, Ravensburger (Germany), House of Puzzles, Gibsons, JR Puzzles and King Puzzles (Holland) continue the manufacturing tradition. Output is generally superb thanks to the efforts of fine railway artists such as Terence Cuneo, George Heiron, T. E. North, Don Breckon, John Austin, Barry Freeman and Malcolm Root. The book is aimed at anyone with an interest in jigsaw puzzles and at those enthusiasts and aficionados who refuse to allow those evocative memories of the Golden Age of Steam to die.

**Encounters with the Pen** John Paul L.Botin ,2021-05-28 This book gives a glimpse on how usual, ordinary and common experiences were viewed by the author. It is a collection of essays written on a condition that each piece should be short enough to fit in an adequately spaced short bond paper, or at most two pages, while still conveying the message of hope and depicting the continuing struggle to survive, to grow and to be generous. Some of the works here bear striking resemblance with the language of mathematics only because, other than words formed by letters, mathematics is a language in itself. Some others were penned at the height of emotions that readers can see every drop of tear, sweat and blood that drenched its entirety. More importantly, these works manifest that inspirations abound if we only look at it in a different light and marvel at the magnificence of human experiences.
