Territorial Implications of High Speed Rail José M. de Ureña,2016-04-01 High Speed Rail's (HSR) main objective is to attract air passengers between big metropolitan areas however the main territorial implications in many cases occur not in these metropolitan areas but in the intermediate cities. These implications open up new spatial planning possibilities such as decentralization, new regional centres and urban renewal projects. This book presents the experience of 20 years of HSR in Spain including some explicit information, arguments and conclusions derived from HSR in other European Countries. It debates the HSR territorial implications at three scales: national, regional and local, thus being of interest for strategic debates at those scales, such as the decision of new national lines, the pros and cons of deviating the line to reach minor intermediate cities or the selection of precise locations for new stations and the development projects in their surroundings. Comparisons with the recent changes in accessibility, spatial distribution of population and activities, are made with mobility for working purposes and with the characteristics of the HSR passengers. This book also examines the actions, strategies and urban projects that medium size cities can use to make best use of HSR opportunities, synthesising the experience of HSR medium cities in Spain and Europe. The book's conclusions will be of interest, over and above scholars, to transport infrastructure decision makers, city and regional planners and managers, and transport companies.

Handbook on Transport and Land Use João de Abreu e Silva,Kristina M. Currans,Veronique Van Acker,Robert J. Schneider,2023-06-01 Synthesizing current understandings on the relationship between transport and land use, this timely Handbook proposes an agenda for research and practice that leads toward more human-centered communities within an increasingly urbanized world facing rapid technological change. Chapters explore the role of institutional policies and informal cultural contexts in influencing transport and land use systems, before examining the impacts of transportation and land use decisions across multiple areas, including equity, public health, climate, environment, and lifestyle preferences.

Vidéo-surveillance et détection automatique des comportements anormaux Jean-Jacques Lavenue,2011-06-10 La vidéosurveillance fait désormais partie des outils utilisés dans les politiques sécuritaires. Les récentes évolutions techniques rendent son usage de plus en plus intrusif dans la vie privée mais aussi dans l'espace public. Cet ouvrage explore une dimension encore inédite de la vidéosurveillance. Elle réside dans le caractère automatique de la détection des « comportements anormaux » dans l'espace public. L'anormalité est un enjeu fondamental dans la définition de la citoyenneté, en établissant une frontière entre ce qui est jugé acceptable et ce qui doit être réprimé. Or, des projets de recherches appliqués récents tentent de coupler l'usage de la vidéosurveillance avec une évaluation automatique de l'anormalité. Désormais, les algorithmes contribuent à définir ces comportements anormaux et donc, dessinent les figures de l'anormal. L'automatisme modifie considérablement les capacités d'appréciation de la normalité, jusqu'ici de la compétence du juge et des pouvoirs publics. La convergence des techniques (vidéo, base de données informatiques...) contribue à modifier profondément les frontières de l'espace public et, par conséquent, de l'espace démocratique. L'ouvrage présente les débats interdisciplinaires qui ont eu lieu à l'occasion d'une application technique actuellement en cours. S'interroger sur ce qu'est un comportement anormal permet de rappeler les modalités d'élaboration de la normalité dans une démocratie.

Fodor's France 2012 Fodor's,2012-02-28 Get inspired and plan your next trip with Fodor's ebook travel guide to France. Intelligent Planning: Discover all of the essential, up-to-date travel insights you expect in a Fodor's guide, including Fodor's Choice dining and lodging, top experiences and attractions, and detailed planning advice. Easy Navigation for E-Readers: Whether you're reading this ebook from start to finish or jumping from chapter to chapter as you develop your itinerary, Fodor's makes it easy to find the information you need with a single touch. In addition to a traditional main table of contents for the ebook, each chapter opens with its own table of contents, making it easy to browse. Full-Color Photos and Maps: It's hard not to fall in love with France as you flip through a vivid full-color photo album. Explore the layout of city centers and popular neighborhoods with easy-to-read full-color maps. Plus get an overview of French geography with the convenient atlas at the end of the ebook. What's Covered? Get to Know France: The Ile-de-France region is the nation's heartland. Here Louis XIV built vainglorious Versailles, Chartres brings the faithful to their knees, and Monet's Giverny enchants all. To the south, the Loire Valley offers a parade of royal and near-royal chateaus that magnificently capture France's golden age of monarchy. Northwest Normandy is sculpted with cliff-lined coasts and a dramatic past marked by Mont-St-Michel's majestic abbey, Rouen's towering cathedral, and the D-Day beaches. Brittany, a long arm of rocky land stretching into the Atlantic, is a place unto itself with its own language and time-defying towns such as Gauguin's Pont-Aven and the pirate haven of St-Malo. The region of Alsace-Lorraine may look and sound German, but its main sights---18th-century Nancy, medieval Strasbourg, and the lovely Route du Vine---remain proudly French. For those travelers looking to imbibe, trips to Champagne Country, the capital of bubbly, or Burgundy, whose vineyards are among the world's best, cannot be missed. Lyon is France's natural hub where you can ski Mont Blanc or take a heady trip along the Beaujolais Wine Road. Don't forget Provence, famed for its Lavender Route, the honey-gold hill towns of Luberon, and vibrant cities. The pebble beaches and zillion-dollar houses of the French Riviera have always captivated sun lovers and socialites from amorous St-Tropez and beauteous Antibes, to sophisticated Nice. The southwestern region, The Midi-Pyrenees is less glamorous than the Riviera and Provence but has an array of must-sees including the "pink city" of Toulouse and fairy-tale Carcassonne. The Dordogne is a stone-cottage pastoral studded with fairy-tale castles, storybook villages, and France's top prehistoric sights. You'll fall under Basque Country's spell with Bay of Biscay resorts like Biarritz, coastal villages such as St-Jean-De-Luz, or the Pyrenean peaks. Relax by sampling the wines of Bordeaux, the standard against which others are measured. They've made the city rich and the owners of its vineyards even richer. No trip to France would be complete without a stop in Paris. A quayside vista that takes in the Seine, a passing boat, Notre-Dame, the Eiffel tower, and mansard roofs all in one generous sweep is enough to convince you that this is indeed the most beautiful city on Earth. Note: This ebook edition is adapted from Fodor's France 2011 but differs in some content. Additionally, the ebook edition includes photographs and maps that will appear on black-and-white devices but are optimized for devices that support full-color images.

Cycling Through the Pandemic Nathalie Ortar,Patrick Rérat,2023-11-16 This open access book provides insight on how the tactical urbanism has the capacity to influence change in mobility practices such as cycling. COVID-19 crisis prompted the public authorities to rethink the use of public space in order to develop means of transport that are both efficient and adapted to the health context and their effects on cycling practices in Europe, North, and South America. Its contributors collectively reveal and evidence through policies analysis, mapping, and innovative qualitative analysis bridging video and interviews, how those new infrastructures and policies can be a trigger for change in a context of mobility transition. This book provides an important element on the way local authorities can act in a quicker and more agile way. While some decisions are specific to the context of the beginning of the pandemic, the analysis offers lessons on the way to implement the transition toward a low-carbon mobility, on the importance of processes based on trials and errors, on the political stakes of reallocating road space.

Transport Documents in Carriage Of Goods by Sea Časlav Pejović,2020-03-05 Bringing a fresh, comparative approach to transport documents used in the carriage of goods by sea, this book covers bills of lading, sea waybills, ship's delivery orders, multimodal transport documents, and electronic transport documents. The book covers historic developments, current conventions, and thoughts for the future on these transport documents; and delves deeply into the legal issues concerning them. It represents a comprehensive compilation of case and statute law from around the

world on this subject. In addition to English law, the book covers American, French, German, and Italian laws, as well as the laws of several East Asian jurisdictions (China, Japan, South Korea). Primarily, the book will be of use to maritime law scholars and students, and lawyers who deal with shipping. It may also be of interest to international traders, banks, and ship masters and officers.

What's Covered? Get to Know Normandy, Brittany, and the Best of Northern France: Sculpted with cliff-lined coasts, Normandy has been home to saints and sculptors, with a dramatic past marked by Mont-St-Michel's majestic abbey, Rouen's towering cathedral, and the D-Day beaches. Brittany, a long arm of rocky land stretching into the Atlantic, is a place unto itself with its own language and time-defying towns such as Gauguin's Pont-Aven and the pirate haven of St-Malo. Although the region of Alsace-Lorraine is bordered by the Rhine and often looks and sounds German, its main sights--18th-century Nancy, medieval Strasbourg, and the lovely Route du Vine--remain proudly French. Don't miss Champagne Country, the capital of bubbly, and the four Gothic cathedrals nearby. No trip to France would be complete without a stop in Paris. A quayside vista that takes in the Seine, a passing boat, Notre-Dame, the Eiffel tower, and mansard roofs all in one generous sweep is enough to convince you that this is indeed the most beautiful city on Earth. Stochastic Transport in Upper Ocean Dynamics Bertrand Chapron, Dan Crisan, Darryl Holm, Etienne Mémin, Anna Radomska, 2022-12-13 This open access proceedings volume brings selected, peer-reviewed contributions presented at the Stochastic Transport in Upper Ocean Dynamics (STUOD) 2021 Workshop, held virtually and in person at the Imperial College London, UK, September 20-23, 2021. The STUOD project is supported by an ERC Synergy Grant, and led by Imperial College London, the National Institute for Research in Computer Science and Automatic Control (INRIA) and the French Research Institute for Exploitation of the Sea (IFREMER). The project aims to deliver new capabilities for assessing variability and uncertainty in upper ocean dynamics. It will provide decision makers a means of quantifying the effects of local patterns of sea level rise, heat uptake, carbon storage and change of oxygen content and pH in the ocean. Its multimodal monitoring will enhance the scientific understanding of marine debris transport, tracking of oil spills and accumulation of plastic in the sea. All topics of these proceedings are essential to the scientific foundations of oceanography which has a vital role in climate science. Studies convened in this volume focus on a range of fundamental areas, including: Observations at a high resolution of upper ocean properties such as temperature, salinity, topography, wind, waves and velocity; Large scale numerical simulations; Data-based stochastic equations for upper ocean dynamics that quantify simulation error; Stochastic data assimilation to reduce uncertainty. These fundamental subjects in modern science and technology are urgently required in order to meet the challenges of climate change faced today by human society. This proceedings volume represents a lasting legacy of crucial scientific expertise to help meet this ongoing challenge, for the benefit of academics and professionals in pure and applied mathematics, computational science, data analysis, data assimilation and oceanography.

Sustainable Transportation and Smart Logistics Javier Faulin, Scott Grasman, Angel Juan, Patrick Hirsch, 2018-11-13 Sustainable Transportation and Smart Logistics: Decision-Making Models and Solutions provides deterministic and probabilistic models for transportation logistics problem-solving and decision-making. The book presents an overview of the intersections between sustainability, transportation, and logistics, and delves into the current problems associated with the implementation of sustainable transportation and smart logistics in urban settings. It also offers models for addressing complex structural problems and procedures for estimating transportation externalities such as environmental and social impacts, both in industrial and government arenas, as well as decision-making models from operational, tactical, and strategic management perspectives. Sustainable Transportation and Smart Logistics also covers best practices for practical corporate policy implementation, making it a comprehensive and vital resource for researchers, graduate students, practitioners, and policy makers in transportation, logistics, urban planning, economics, engineering, and environmental science. Examines various modes of transportation Includes mathematical models for decision-making in a wide variety of situations Presents public transportation and smart cities use cases

Electrical Energy Storage in Transportation Systems Benoît Robyns, Christophe Saudemont, Daniel Hissel, Xavier Roboam, Bruno Sareni, Julien Pouget, 2016-08-16 This book deals with the management and valuation of energy storage in electric power grids, highlighting the interest of storage systems in grid applications and developing management methodologies based on artificial intelligence tools. The authors highlight the importance of storing electrical energy, in the context of sustainable development, in smart cities and smart transportation, and discuss multiple services that storing electrical energy can bring. Methodological tools are provided to build an energy management system storage following a generic approach. These tools are based on causal formalisms, artificial intelligence and explicit optimization techniques and are presented throughout the book in connection with concrete case studies.

The Sustainable World C. A. Brebbia, 2011 This book contains a collection of papers presented at a series of meetings organised by the Wessex Institute of Technology (WIT) dealing with sustainability, the environment and ecological issues. The complexity of the modern world presents new challenges to scientists and engineers that requires finding interdisciplinary solutions. Any problem solving carried out in the isolation of a particular field of expertise may give rise to a series of damaging effects which can create new and unintentional environmental and ecological problems. Specialisation, while required in our culture, needs to be kept under control by the understanding of the whole, which leads to the need of relying on interdisciplinary teams. Nowadays this can be easily achieved thanks to the massive advances in information technology which ensure continuous and immediate contact between all partners. This collaboration needs to be effective and to produce results that will lead to a better world. For this to happen, it is necessary that different groups of scientists and engineers acquire the necessary skills to be able to talk to each other. Furthermore, they need to understand the social and economic aspects of a given problem, in addition to the scientific and engineering issues involved. The Wessex Institute of Technology (WIT) has a long and very successful record in organising interdisciplinary conferences. The papers in this book are a reflection of the proceedings of some of those meetings.

Towards User-Centric Transport in Europe 2 Beate Müller, Gereon Meyer, 2020-02-05 This book gathers contributions from researchers and practitioners that foster user-centric, cross-modal and sustainable transport systems in Europe. It reports on cutting-edge approaches discussed within the project MOBILITY4EU, a Coordination and Support Action funded by the European Commission, and presented at the second conference “Towards User Centric Transport in Europe” that took place in Brussels in Fall 2018. The respective papers describe innovative approaches to improving urban mobility and accessibility, achieving zero-emission mobility, and guaranteeing, seamless operations. Co-creation approaches are also discussed. Highlighting technological, socio-economic and political strategies alike, the book provides researches and stakeholders with a comprehensive, timely snapshot of current measures and challenges for the mobility of tomorrow.

Smart Sustainable Cities and Knowledge-Based Economy Enrico Ivaldi, Andrea Ciacchi, 2023-07-10 This book provides information and resources to city planners and other public policy officials on the importance of smart sustainable cities and their relationship with urban knowledge-based economy. It answers important topical questions relating to urban sustainable development and human well-being, namely, how can we implement policies and programs that can make cities “smart” and boost their knowledge-based development? How can such programs reduce inequalities and enhance the environment where people live and work? The authors suggest a new approach to the creation of sustainable smart cities, not only in metropolises but also in smaller urban spaces. They advance the body of knowledge in entrepreneurship literature by examining both the European regional understanding of entrepreneurship and the quality of life and well-being at city levels. They also provide synthetic indexes to assess the relationship between perceived quality of life and entrepreneurship. This book stimulates the debate on the role of smart cities in promoting entrepreneurship, which is a currently under-investigated topic in Europe, and is of interest to a wide range of practitioners, professionals and academics in the area of well-being and quality of life research, urban studies, public policy, and sustainable development.
