**The Best of Scobleizer (2011-2012)** Robert Scoble, 2013-01-06 This book features a curated compilation of Robert Scoble's best posts from 2011-2012. If you're at all interested in how today's technology is shaping the future and making our lives better, you won't want to miss this great collection of posts discussing innovative startups and cool new tech advancements. Excerpt from the Book How does Silicon Valley and Apple miss Steve Jobs? Well, on Monday night I was having dinner with Gary Morgenthaler, who was one of the investors in Siri, along with a few Siri team members, and I heard stories that they weren't able to tell me while Steve Jobs was alive. For instance, Jobs called Siri management at least 30 times personally in about a month to convince them to join. Also, Steve Jobs yelled at Apple managers who didn't "get" why Siri was so important to Apple. But most important to me, and the book I'm writing with Shel Israel: Jobs had already started working with the team on how to make Siri more contextually aware. In fact, Norman Winarsky, who heads up SRI, the lab where Siri was developed, told me that SRI is about to start testing out a new app that will dig deeper into your email and your calendar to "assist" you in a much deeper way than Siri can right now. What do we meet by context? Well, Siri today is pretty stupid about what's on your calendar. Ask it "where is my next meeting?" and it will show you your next meeting, but it doesn't know where it is. Close but no cigar. It gets worse from there. Ask it "where is the best place to get lunch tomorrow?" and Siri answers with places near my home. Problem is that tomorrow I'm going to be at the Apple iPhone 5 launch in San Francisco. Siri is quite stupid about context, location, and a bunch of other things. Will it improve? Apple already announced some improvements to Siri, for instance Siri will, with iOS 6, be able to start applications. But it's hardly expected to be contextually aware in any real way. Ask Siri "what is my favorite gas station?" Siri answers "I don't know." The problem is, that isn't really true. Apple knows what gas stations I'm most likely to stop at. Or it could, if it just knew how to contextually evaluate the data that both Verizon and Apple already have streaming from my phone. If it doesn't know something like my favorite gas station, it certainly doesn't know the answer to something simple like "how many times do I eat at Chinese restaurants?" That's easily verifiable. Ask it such a question and it just brings up a list of Chinese restaurants near you. It doesn't even try to accurately turn down the question. But back to Jobs. He saw Siri's potential to add a new, simpler, contextually-aware, user interface to any device. There are lots of rumors that Apple will use something like Siri in other products, like its Apple TV product. In fact, at dinner the other night I learned that at least one of the team members that remains at Apple is now working on a secret new project. I doubt we'll learn about that tomorrow, but I'll be looking for signs that Apple understands how to take us into the contextual age. I'll be looking for signs that Steve Jobs' passion for Siri is still being listened to.

**The Imagineers of War** Sharon Weinberger,2018-02-20 The definitive history of the Defense Advanced Research Projects Agency, the Pentagon agency that has quietly shaped war and technology for nearly sixty years. Founded in 1958 in response to the launch of Sputnik, the agency's original mission was to create "the unimagined weapons of the future." Over the decades, DARPA has been responsible for countless inventions and technologies that extend well beyond military technology. Sharon Weinberger gives us a riveting account of DARPA's successes and failures, its remarkable innovations, and its wild-eyed schemes. We see how the threat of nuclear Armageddon sparked investment in computer networking, leading to the Internet, as well as to a proposal to power a missile-destroying particle beam by draining the Great Lakes. We learn how DARPA was responsible during the Vietnam War for both Agent Orange and the development of the world's first armed drones, and how after 9/11 the agency sparked a national controversy over surveillance with its data-mining research. And we see how DARPA's success with self-driving cars was followed by disappointing contributions to the Afghanistan and Iraq wars. Weinberger has interviewed more than one hundred former Pentagon officials and scientists involved in DARPA's projects—many of whom have never spoken publicly about their work with the agency—and pored over countless declassified records from archives around the country, documents obtained under the Freedom of Information Act, and exclusive materials provided by sources. The Imagineers of War is a compelling and groundbreaking history in which science, technology, and politics collide.

You guessed it, the Latverian monarch switches bodies with Daredevil bringing on a battle that drags the Fantastic Four, Spider-Man, Thor into the mix in one of Marvel's first crossover bonanzas!
