Christianity in China Wu Xiaoxin,2017-03-02 A bibliographical guide to the works in American libraries concerning the Christian missionary experience in China.

Humanities ,1992

Christianity in China Xiaoxin Wu,2015-07-17 Now revised and updated to incorporate numerous new materials, this is the major source for researching American Christian activity in China, especially that of missions and missionaries. It provides a thorough introduction and guide to primary and secondary sources on Christian enterprises and individuals in China that are preserved in hundreds of libraries, archives, historical societies, headquarters of religious orders, and other repositories in the United States. It includes data from the beginnings of Christianity in China in the early eighth century through 1952, when American missionary activity in China virtually ceased. For this new edition, the institutional base has shifted from the Princeton Theological Seminary (Protestant) to the Ricci Institute for Chinese-Western Cultural Relations at the University of San Francisco (Jesuit), reflecting the ecumenical nature of this monumental undertaking.

Relationships as Developmental Contexts W. Andrew Collins,Brett Laursen,1999-03 The volume's topic was chosen in part because of the rapidly growing salience of dyadic research perspectives in developmental psychology, but also in social psychology and in fields such as communication and family studies. It provides the most complete representation now available on current theory and research on the significance of personal relationships in child and adolescent development. This volume addresses the ways in which the study of social development has been altered by an emphasis on research questions and techniques for studying children and adolescents in the context of their significant dyadic relationships. Leading scholars--many of them pioneers in the concepts and methods of dyadic research--have contributed chapters in which they both report findings from recent research and reflect on the implications for developmental psychology. Their work encompasses studies of relationships with parents, siblings, friends, and romantic partners. Opening chapters set the stage by describing the key characteristics of social-development research from a dyadic perspective and outlining key themes and contemporary issues in the field. It concludes with commentaries from distinguished senior scholars identifying important directions for future research.

China, The United States, and the Future of Southeast Asia David B. H. Denoon,2017-05-16
Distinguished experts explain the economic trends and varied political goals at work in Southeast Asia. With China's emergence as a powerful entity in Southeast Asia, the region has become an unlikely site of conflict between two of the world's great powers. The United States, historically regarded as the protector of Pacific Southeast Asia—consisting of nations such as Vietnam, the Philippines, Myanmar, and Malaysia—is now called upon to respond to what many would consider bullying on the part of the Chinese. These and other countries have become the economic and political engine of China. While certainly inclined to help the country's former allies, the United States has grown undeniably closer to China in the recent decades of global interconnected economic growth. *China, the United States, and the Future of Southeast Asia* uncovers and delves into the complicated dynamics of this situation. Covering topics such as the controversial response to human rights violations, the effects of global economic interconnectedness, and contested sovereignty over resource-rich islands, this volume provides a modern and nuanced perspective on the state of the region. For anyone interested in

understanding the evolving global balance of power, China, the United States, and the Future of Southeast Asia illuminates how countries as different as Thailand and Indonesia see the growing competition between Beijing and Washington.

Securing the Belt and Road Initiative Alessandro Arduino,Xue Gong,2018-02-01 This collection explores the expansion of Chinese outbound investments, aimed to sustain the increased need for natural resources, and how they have amplified the magnitude of a possible international crisis that the People's Republic of China may face in the near future by bringing together the views of a wide range of scholars. President Xi's Belt and Road initiative (BRI), aimed to promote economic development and exchanges with China for over 60 countries, necessitates a wide range of security procedures. While the threats to Chinese enterprises and Chinese workers based on foreign soil are poised to increase, there is an urgent need to develop new guidelines for risk assessment, special insurance and crisis management. While the Chinese State Owned Enterprises are expanding their international reach capabilities, they still do not have the capacity to assure adequate security. In such a climate, this collection will be of profound value to policy makers, those working in the financial sector, and academics.

Models and Algorithms for Public Transportation Scheduling Ming Wei,2022-11-30 This book presents an arterial green-wave synchronous coordination model for bus and non-bus lanes based on platoon dispersion theory. As the traffic light at an upstream intersection change from red to green, the dispersive characteristics of these vehicles moving from upstream to the downstream were analyzed by assuming velocities of two platoon following a normal distribution pattern. The model aims at analyzing relationship between traffic flow, distance between adjacent intersections, and signaling time in order to achieve arterial green-wave synchronous coordination in both the bus and non-bus lanes. To facilitate coordination in a traffic signal control system, the number of vehicles forced to stop at the head of the platoon as well as the number of vehicles trapped at the tail of the platoon were determined and presented in a tabular form for use in the proposed traffic light coordination model. Finally, a numeric computation for the coordination of successive signals is presented to illustrate the validity of the proposed model.

What's A Peasant To Do? Village Becoming Town In Southern China Greg Guldin,2018-05-04

Since China entered the post-Mao Reform Era in the late 1970s and early 1980s, the Chinese economy has taken off as few economies ever have. Labor migration, rural enterprises, rising production, and globalization have all combined to end the isolation of the Chinese countryside. Yet although China's unsurpassed economic boom has produced reams of impressive statistics, has this economic growth led to improving the livelihood of the average Chinese person? Has development accompanied economic growth? Has the promise of opening to the outside been fulfilled in providing a better life for China's 1.2 billion-plus people? In this book, which is based on field work, Guldin presents and explores some of the changes sweeping through China in the 1990s that are affecting hundreds of millions of people. Guldin looks at the growth of town and village enterprises, labor mobility, and the other aspects of rural urbanization to investigate the connection between economic growth and development in contemporary China. The political changes at the village level, the swelling flows of capital, data, goods, and people, new ways of thinking and behaving, and a significant surge in social inequalities are all topics for chapter discussions. Guldin invites readers to face the same question that former Chinese peasants must face, namely, how to respond, as their villages are

transformed forever.
