Free Flight From Airline Hell To A New Age Of Travel James Fallows, 2001-06-20 Fallows, a correspondent for Atlantic Monthly, explores future trends in commercial aviation technology that may make airline travel easier and quicker than the current hub system. He focuses on three separate groups of innovators who are developing a NASA small plane research program, a small airplane with a parachute for the entire plane, and an inexpensive jet plane for air taxi services. c. The Travel Detective Peter Greenberg, 2005-05-03 Renowned travel authority and NBC Today show travel editor Peter Greenberg shares his insider secrets. Americans now travel more than ever before. Yet as our traveling has increased, the service we receive from airlines, hotels, and other agencies has deteriorated dramatically. Industry surveys reveal what you already feel: growing dissatisfaction among travelers of every age, income, and education level. We've been abused by the travel experience. Peter Greenberg is here to help. The Travel Detective tells you the things most travel agents can't or sometimes just won't tell you. In his characteristic friendly and conversational tone, Greenberg tells how to find the secret walk-up fares that can save air travelers hundreds, if not thousands of dollars on last minutes flights; which coach seats on which planes are better than first class; the secret rule to know to avoid being bumped from a flight, which cruise ship brochures lie; which credit card companies are fastest and slowest to come to your aid in a foreign land, or worse, in the U.S.; which hotels have the best and the worst fire and crime safety records, and how you can protect yourself; how to negotiate the best hotel room deal; which hotels have the worst water pressure in their showers (and better yet, how you can get great water pressure, even at those hotels); and much, much more. Accessible and

entertaining, The Travel Detective gives you the information and tools you need to make every trip an affordable pleasure. From the Trade Paperback edition.

Travel Detective Flight Crew Confidential Peter Greenberg, 2002-07-23 The author of the New York Times bestseller The Travel Detective brings you insider travel secrets only pilots and flight attendants know. Pilots are notoriously frugal, and flight attendants are underpaid and on a budget. They may hit one city four to six times a month, but they are there for only twenty-four hours (or even less) each time, so they always know where to go to get the best value for their money. In The Travel Detective Flight Crew Confidential you'll find: • great shopping (furniture in Atlanta, silk in Bangkok, leather in São Paulo) • great services (medical care in Paris and inexpensive manicures in Tokyo) • great food and drink (hidden ethnic restaurants in London, and the bars with the best attitude and cheapest drinks in Key West) • secrets to navigating the world's airports during layovers • what to do and what never to do, what to seek and what to avoid You get tips in crew members' own words—good, bad, or ugly—that you won't find anywhere else. Opinionated, often controversial, but always helpful, The Travel Detective Flight Crew Confidential is a resource no one who flies can afford to be without.

Free Flight James Fallows, 2008-11-05 The troubles of the airline system have become acute in the post-terrorist era. As the average cost of a flight has come down in the last twenty years, the airlines have survived by keeping planes full and funneling traffic through a centralized hub-and-spoke routing system. Virtually all of the technological innovation in airplanes in the last thirty years has been devoted to moving passengers more efficiently between major hubs. But what was left out of this equation was the convenience and

flexibility of the average traveler. Now, because of heightened security, hours of waiting are tacked onto each trip. As James Fallows vividly explains, a technological revolution is under way that will relieve this problem. Free Flight features the stories of three groups who are inventing and building the future of all air travel: NASA, Cirrus Design in Duluth, Minnesota, and Eclipse Aviation in Albuquerque, New Mexico. These ventures should make it possible for more people to travel the way corporate executives have for years: in small jet planes, from the airport that's closest to their home or office directly to the airport closest to where they really want to go. This will be possible because of a product now missing from the vast array of flying devices: small, radically inexpensive jet planes, as different from airliners as personal computers are from mainframes. And, as Fallows explains in a new preface, a system that avoids the congestion of the overloaded hub system will offer advantages in speed, convenience, and especially security in the new environment of air travel.

The hints and tips are well thought out and come from years of flying experiences drawn from all over the world. I can thoroughly recommend this to anyone about to embark on a journey, whether a seasoned traveler or a first time flyer. Winning the Airfare Game Charles McCool, 2001

Cockpit Confidential Patrick Smith, 2018-06-05 A New York Times bestseller For millions of people, travel by air is a confounding, uncomfortable, and even fearful experience. Patrick Smith, airline pilot and author of the popular website www.askthepilot.com, separates fact from fallacy and tells you everything you need to know: • How planes fly, and a revealing look at the men and women who fly them • Straight talk on turbulence, pilot training, and safety. • The real story on delays, congestion, and the dysfunction of the modern airport • The myths and misconceptions of cabin air and cockpit automation • Terrorism in perspective, and a provocative look at security • Airfares, seating woes, and the pitfalls of airline customer service • The colors and cultures of the airlines we love to hate COCKPIT CONFIDENTIAL covers not only the nuts and bolts of flying, but the grand theater of air travel, from airport architecture to inflight service to the excitement of travel abroad. It's a thoughtful, funny, at times deeply personal look into the strange and misunderstood world of commercial flying. Patrick Smith is extraordinarily knowledgeable

about modern aviation...the ideal seatmate, a companion, writer and explorer. —Boston Globe Anyone remotely afraid of flying should read this book, as should anyone who appreciates good writing and great information. —The New York Times, on ASK THE PILOT.

Building a Travel Risk Management Program Charles Brossman, 2016-04-04
Building a Travel Risk Management Program: Traveler Safety and Duty of Care for Any Organization helps business and security professionals effectively manage traveler risk by showing them how to build a complete travel risk program. While global corporate travel risks are increasing exponentially, many security and business managers are not well-versed in the rapidly changing global landscape of travel risk, nor do they fully realize the multitude of risks their companies face if they don't comply with their legal obligations—"duty of care—for protecting their employees from foreseeable harm, which can cost a company in the form of extensive fines, productivity loss, business interruptions, stock price loss, litigation, and even potential bankruptcy. This book is the first to bridge the gap between the topics of travel management, security, and risk management. It serves as a reference point for working with other departments, including human resources and legal, paving the way for better internal cooperation for travel managers and security managers. In addition, it helps organizations craft a travel risk management program for their unique needs that incorporates the most important policies and procedures that help them comply

with legal obligations. Illustrates common mistakes that can have a devastating impact across the entire enterprise with real-world examples and case studies Includes testimonies from corporate travel risk security experts on best practices for meeting the constantly changing duty of care standard Presents best practices for reducing the risk of exposure and liability Offers models for effectively promoting and advocating for travel risk management programs within the organization Compares laws like the UK's "Corporate Manslaughter Act (considered one of the world's most strict legislative standards) to similar laws around the world, showing how compliance requires constant supervision and process improvement
