Electric Motorcycles and Bicycles Kevin Desmond,2018-12-31 Beginning in 1881, isolated prototypes of electric tricycles and bicycles were patented and sometimes tested. Limited editions followed in the 1940s, but it was not until the lithium-ion battery became available in the first decade of this century that urban pedelecs and more powerful open-road motorcycles—sometimes with speeds of over 200 mph—became possible and increasingly popular. Today's ever-growing fleets of one-wheel, two-wheel and three-wheel light electric vehicles can now be counted in the hundreds of millions. In this third installment of his electric transport history series, the author covers the lives of the innovative engineers who have developed these e-wheelers.

Report of the Zahid Mubarek Inquiry (Vols. 1 and 2) Zahid Mubarek Inquiry,2006-06-29 This report sets out the findings of the public inquiry into the murder in March 2000 at Feltham Young Offender Institution of Zahid Mubarek, an Asian teenager. Mubarek died after being attacked by another young prisoner, his cellmate Robert Stewart, who had a history of violence and racist behaviour. The report identifies the systemic shortcomings which the attack exposed and makes 88 recommendations to reduce the risk of such an attack in the future. Issues discussed include: the events leading up to the public inquiry, including previous investigations by the Prison Service and the Commission for Racial Equality; the mental health background and custodial history of Stewart; the events on the night of the attack; and the wider ongoing problems at Feltham of staff shortages and low staff morale, lack of resources and overcrowding; poor working practices and evidence of racism by staff and prisoners. Recommendations made include: the elimination of enforced cell-sharing should be a high priority for the Prison Service and it should publish guidelines to assist officers in the allocation of

prisoners who have to share a cell, taking into account issues of ethnic and religious background; there should be a general rule that an unconvicted prisoner should not share a cell with a convicted prisoner; full cell searches should be carried out at least once every three months; prisoner councils should be set up as part of violence reduction strategies in prisons; improved diversity training for prison staff; and the need for a national database for security information on prisoners to improve the flow of information between and within establishments to help prisoner risk assessment procedures.

Microcirculation Maria Dorobantu,Lina Badimon,2019-11-04 This comprehensive reference book of coronary microcirculation broadly covers theoretical aspects, clinical cases and therapeutic considerations from an innovative perspective. Topics covered include: ischemic heart disease, silent cerebral damage, heart failure, left ventricular hypertrophy arrhythmias, and cerebral and renal microcirculation. Microcirculation: From Bench to Bedside underlines the clinical importance of addressing coronary microcirculation with relevant clinical examples that are often encountered by practitioners. It therefore provides a critical resource on microcirculation for both specialist and non-specialist practitioners.
