TRIBO-FATIGUE Leonid A. Sosnovskiy,2010-06-14 Fatigue and wear are the most damaging phenomena affecting machines since they result in some 90% of breakdowns. This tutorial book systematically develops a unified overview, named tribo-fatigue, which aims to address the complex wear-fatigue damages. Tribo-fatigue synthesizes aspects of three disciplines: mechanical fatigue, tribology, and reliability of mechanical systems. Tribo-fatigue opens new perspectives for increasing the durability of machines according to the most important criteria of their serviceability. Detailed damage measurement and wear-fatigue tests that enable engineers to design more durable and reliable systems are developed. The book is intended for advanced students, researchers and engineers.

Laser Surface Treatments for Tribological Applications Jeyaprakash Natarajan,2021-11-22 This reference presents comprehensive information about laser surface treatments for tribological applications. Chapters of the book highlight the importance of laser technology in modifying materials to optimize the effects of friction and lubrication, by explaining a range of surface modification methods used in industries. These methods include hardening, melting, alloying, cladding and texturing. The knowledge in the book is intended to give an in-depth understanding about the role of laser technology in tribology and the manufacture of industrial materials and surfaces for special applications. Key Features: – 10 chapters on topics relevant to tribology and industrial applications of laser material processing – Comprehensively covers laser surface modification of metals and alloys – Explains a wide range of surface modification methods (hardening, melting, alloying, cladding and texturing) – Covers material and tribological characterization of surfaces – Presents information in a simple structured layout for easy reading, with introductory notes for learners – Provides references for further reading This book is an ideal reference for students and learners in courses related to engineering, manufacturing and materials science. Researchers, industrial professionals and general readers interested in laser assisted machining processes and surface modification techniques will also find the book to be an informative reference on the subject.

Wear of Materials Peter J. Blau,2003-10 The 14th International Conference on Wear of Materials took place in Washington, DC, USA, 30 March – 3 April 2003. These proceedings contain over two-hundred peer reviewed papers containing the best research, technical developments and engineering case studies from around the world. Biomaterials and nano-tribology receive special attention in this collection reflecting the general trends in the field. Further highlights include a focus on the new generation of instrumentation to probe wear at increasingly small scales. Approximately ninety communications and case studies, a popular format for the academic community have also been included, enabling the inclusion of the most up-to-date research. Over 200 peer-reviewed papers including hot topics such as biomaterials and nano-tribology Keeping you up-to-date with the latest research from leading experts Includes communications and case studies

Engineering Tribology Gwidon W. Stachowiak,Andrew W. Batchelor,2001 Mechanisms of wear, friction and lubrication are comprehensively described in an accessible manner that is designed to be helpful to non-specialists. The control of wear is given extensive treatment with a thorough discussion of lubricant additives, solid lubricants and surface coatings. The effectiveness of coatings in suppressing specific forms of wear is described together with the methods of coating deposition. More than 1000 references are provided to give the reader access to more specialized information if required.

Materials Science and Engineering: Concepts, Methodologies, Tools, and Applications Management Association, Information Resources,2017-01-11 The design and study of materials is a pivotal component to new discoveries in the various fields of science and technology. By better understanding the components and structures of materials, researchers can increase its applications across different industries. Materials Science and Engineering: Concepts, Methodologies, Tools, and Applications is a compendium of the latest academic material on investigations, technologies, and techniques pertaining to analyzing the synthesis and design of new materials. Through its broad and extensive coverage on a variety of crucial topics, such as nanomaterials, biomaterials, and relevant computational methods, this multi-volume work is an essential reference source for engineers, academics, researchers, students, professionals, and practitioners seeking innovative perspectives in the field of materials science and engineering.

Advances in Fracture Research K. Salama,D.M.R. Taplin,P. Rama Rao,K. Ravi-Chandar,2013-10-22 Held every four years, the International Congress on Fracture is the premier international forum for the exchange of ideas between scientists and engineers involved in producing and using materials resistant to fracture and fatigue. This major six-volume work which forms the proceedings of the Seventh International Congress on Fracture therefore provides the most comprehensive account available of the current status of research into fracture and fatigue, and the application of this knowledge to the design, fabrication and operation of materials and structures. As such, it will be an essential reference for materials scientists and mechanical, structural, aeronautical and design engineers with an interest in fracture and its prevention.

The 77 full papers included in this book were carefully reviewed and selected from 164 submissions. They were organized in topical sections as follows: Modelling and Simulation, Artificial intelligence, Industry 4.0, Digital Twins Modelling, Simulation and Gaming, Simulation for Engineering, Simulation for Sustainable Development, Simulation in Social Sciences.

Axus' Discoveries Minha Tribo,PIBA Esportes,2017-01-27 In Axus' discoveries... Axus and its crew end up in many troubles! It's understandable, once this crew don't stop! But you know how it is, frequently, something happens putting them in a hard position, not knowing what to do, how to act, or what comes next! Have you been there? How did you or out of trouble? You didn't! So join Axus and its crew in adventures filled of wisdom and friendship! And also, learn a bit more about Proverbs! This comic book is useful to remember the values that are worthwhile of applying in life. Important, for parents to guide their kids and for kids who want to be Worthy men and women. These values are seen through Axus figure... A young man that will help his crew, in many situations, to understand how Proverbs lessons apply to sports and other life areas. The big tip of Axus to his friends is that their relationship with God will give them true value in their daily actions. Got curious? Join this crew!

Intelligent Manufacturing and Energy Sustainability A.N.R. Reddy,Deepak Marla,Milan Simic,Margarita N. Favorskaya,Suresh Chandra Satapathy,2020-02-14 This book includes selected, high-quality papers presented at the International Conference on Intelligent Manufacturing and Energy Sustainability (ICIMES 2019) held at the Department of Mechanical Engineering, Malla Reddy College of Engineering & Technology (MRCET), Maisammaguda, Hyderabad, India, from 21 to 22 June 2019. It covers topics in the areas of automation, manufacturing technology and energy sustainability.

Green Protein Processing Technologies from Plants Alan Javier Hernández-Álvarez,Martin Mondor,Matthew G. Nosworthy,2023-01-01 This edited book provides the first comprehensive overview on conventional and emerging processing technologies for the extraction and purification of proteins and/or peptides from plant sources with a special focus on subsequent product development. The book opens with an introduction to the most conventional processing technologies used in industry today: the alkaline extraction followed by isoelectric precipitation, and air classification. The book also focusses on novel extraction and purification technologies, covering the most recent green emerging technologies based on enzymatic processes, solvents, high-pressure processing, barometric membrane technologies, and microwave-assisted extraction, among others. The final chapters bridge the gap between the presented methods and product development and highlight how these technologies can alter protein functionality and nutritional quality of the extracted protein, and thereby, impact human health. In the context of rising consumer interest in foods from plant-protein ingredients and the United Nations targets for Sustainable Development Goal 12 on ‘Responsible Consumption and Production’, this book will provide an indispensable resource for students, engineers and researchers in academia and industry, working in the area of food science, food technology and plant-based product development.

Additive Manufacturing Volume 2 Prashanth Konda Gokuldoss,Zhi Wang,2020-04-15 Additive manufacturing (AM) is one of the manufacturing processes that warrants the attention of industrialists, researchers and scientists, because of its ability to produce materials with a complex shape without theoretical restrictions and with added functionalities. There are several advantages to employing additive manufacturing as the primary additive manufacturing process. However, there exist several challenges that need to be addressed systematically. A couple such issues are alloy design and process development. Traditionally alloys designed for conventional cast/powder metallurgical processes were fabricated using advanced AM processes. This is the wrong approach considering that the alloys should be coined based on the process characteristics and meta-stable nature of the process. Hence, we must focus on alloy design and development for AM that suits the AM processes. The AM processes, however, improve almost every day, either in terms of processing capabilities or processing conditions. Hence, the processing part warrants a section that is devoted to these advancements and innovations. Accordingly, the present Special Issue (book) focuses on two aspects of alloy development and process innovations. Here, 45 articles are presented covering different AM processes including selective laser melting, electron beam melting, laser cladding, direct metal laser sintering, ultrasonic consolidation, wire arc additive manufacturing, and hybrid manufacturing. I believe that this Special Issue bears is vital to the field of AM and will be a valuable addition.
