The Image of the City Kevin Lynch, 1964-06-15 The classic work on the evaluation of city form. What does the city's form actually mean to the people who live there? What can the city planner do to make the city's image more vivid and memorable to the city dweller? To answer these questions, Mr. Lynch, supported by studies of Los Angeles, Boston, and Jersey City, formulates a new criterion—imageability—and shows its potential value as a guide for the building and rebuilding of cities. The wide scope of this study leads to an original and vital method for the evaluation of city form. The architect, the planner, and certainly the city dweller will all want to read this book.

The Making of an Economic Superpower Yi Wen, 2016-05-13 The rise of China is no doubt one of the most important events in world economic history since the Industrial Revolution. Mainstream economics, especially the institutional theory of economic development based on a dichotomy of extractive vs. inclusive political institutions, is highly inadequate in explaining China's rise. This book argues that only a radical reinterpretation of the history of the Industrial Revolution and the rise of the West (as incorrectly portrayed by the institutional theory) can fully explain China's growth miracle and why the determined rise of China is unstoppable despite its current backward financial system and political institutions. Conversely, China's spectacular and rapid transformation from an impoverished agrarian society to a

formidable industrial superpower sheds considerable light on the fundamental shortcomings of the institutional theory and mainstream blackboard economic models, and provides more-accurate reevaluations of historical episodes such as Africa's enduring poverty trap despite radical political and economic reforms, Latin America's lost decades and frequent debt crises, 19th century Europe's great escape from the Malthusian trap, and the Industrial Revolution itself. Contents: IntroductionKey Steps Taken by China to Set Off an Industrial RevolutionShedding Light on the Nature and Cause of the Industrial RevolutionWhy is China's Rise Unstoppable?Wha's Wrong with the Washington Consensus and the Institutional Theories?Case Study of Yong Lian: A Poor Village's Path to Becoming a Modern Steel TownConclusion: A New Stage Theory of Economic Development Readership: Academics, undergraduate and graduates students, journalists and professionals interested in economic development, the history of the Industrial Revolution, and especially China's economic transformation and industrial growth, as well as the political economy of governance.

Henry More (1614–1687) Tercentenary Studies S. Hutton,2012-12-06 Of all the Cambridge Platonists, Henry More has attracted the most scholarly interest in recent years, as the nature and significance of his contribution to the

history of thought has come to be better understood. This revival of interest is in marked contrast to the neglect of More's writings lamented even by his first biographer, Richard Ward, a regret echoed two centuries after his death. Since then such attention as there has been to More has not always served him well. He has been dismissed as credulous on account of his belief in witchcraft while his reputation as the most mystical of the Cambridge 2 school has undermined his reputation as a philosopher. Much of the interest in More in the present century has tended to focus on one particular aspect of his writing. There has been considerable interest in his poems. And he has come to the attention of philosophers thanks to his having corresponded with Descartes. Latterly, however, interest in More has been rekindled by renewed interest in the intellectual history of the seventeenth century and Renaissance. And More has been studied in the context of seventeenth-century science and the wider context of seventeenth-century philosophy. Since More is a figure who belongs to the Renaissance tradition of unified sapientia he is not easily compartmentalised in the categories of modern disciplines. Inevitably discussion of anyone aspect of his thought involves other aspects.

Other topics include contemporary museums and excursion trains; the development of commuter rails, monorails, light rails, and other intracity transit trains; the social impact of train travel; and historical rail terminals and facilities. Paradise Lost Annotated John Milton, 2020-07-10 *Paradise Lost* is an epic poem in blank verse by the 17th-century English poet John Milton. It was originally published in 1667 in ten books; a second edition followed in 1674, redivided into twelve books (in the manner of the division of Virgil's *Aeneid*) with minor revisions throughout and a note on the versification. The poem concerns the Judeo-Christian story of the Fall of Man; the temptation of Adam and Eve by the fallen angel Satan and their expulsion from the Garden of Eden. Milton's purpose, stated in Book I, is to justify the ways of God to men and elucidate the conflict between God's eternal foresight and free will. It is considered by critics to be Milton's 'major work', and helped solidify his reputation as one of the greatest English poets of his time. The poem concerns the Biblical story of the Fall of Man: the temptation of Adam and Eve by the fallen angel Satan and their expulsion from the Garden of Eden. Milton's purpose, stated in Book I, is to 'justify the ways of God to men'.

The Heart of the City Alexander Garvin, 2019-05-07 Downtowns are more than economic engines: they are repositories of knowledge and culture and generators of new ideas, technology, and ventures. They are the heart of the city that drives its future. If we are to have healthy downtowns, we need to understand what downtown is all about; how and why some American downtowns never stopped thriving (such as San Jose and Houston), some have been in decline for half a century (including Detroit and St. Louis), and still

others are resurging after temporary decline (many, including Lower Manhattan and Los Angeles). The downtowns that are prospering are those that more easily adapt to changing needs and lifestyles. In *The Heart of the City*, distinguished urban planner Alexander Garvin shares lessons on how to plan for a mix of housing, businesses, and attractions; enhance the public realm; improve mobility; and successfully manage downtown services. Garvin opens the book with diagnoses of downtowns across the United States, including the people, businesses, institutions, and public agencies implementing changes. In a review of prescriptions and treatments for any downtown, Garvin shares brief accounts--of both successes and failures--of what individuals with very different objectives have done to change their downtowns. The final chapters look at what is possible for downtowns in the future, closing with suggested national, state, and local legislation to create standard downtown business improvement districts to better manage downtowns. This book will help public officials, civic organizations, downtown business property owners, and people who care about cities learn from successful recent actions in downtowns across the country, and expand opportunities facing their downtown. Garvin provides recommendations for continuing actions to help any downtown thrive, ensuring a prosperous and thrilling future for the 21st-century American city.

God's Gentlemen David Hilliard, 2013-05-01 Originally published in 1978, God's Gentlemen remains the only detached and detailed historical analysis of the work of the Melanesian Mission, which grew out of the personal vision of George Selwyn, the first bishop of the Church of England in New Zealand. Starting with its New Zealand beginnings and its Norfolk Island years from 1867 to 1920, the book follows the Mission's shift of headquarters to the Solomon Islands and beyond through the beginning of World War II. Based on a wide range of sources, God's Gentlemen is the inner history of the slow growth of an important and genuinely Melanesian church.
