**Can You Survive the 1925 Tri-State Tornado?** Matthew K. Manning,2023 On March 18, 1925, the deadliest tornado in history tore a path of destruction more than 200 miles long across Missouri, Illinois, and Indiana. The giant tornado demolished several towns and killed hundreds of people. Will you take shelter in your basement or try to outrun the tornado in your new Model T car? Do you stay inside your school or risk running to your church to take shelter there? Will you ignore the storm like your father says or get your family to the storm shelter before it's too late? With dozens of possible choices, YOU will need to find a way to survive the deadliest tornado ever recorded in the United States.

**Designing Embedded Hardware** John Catsoulis,2002 Intelligent readers who want to build their own embedded computer systems-- installed in everything from cell phones to cars to handheld organizers to refrigerators-- will find this book to be the most in-depth, practical, and up-to-date guide on the market. Designing Embedded Hardware carefully steers between the practical and philosophical aspects, so developers can both create their own devices and gadgets and customize and extend off-the-shelf systems. There are hundreds of books to choose from if you need to learn programming, but only a few are available if you want to learn to create hardware. Designing Embedded Hardware provides software and hardware engineers with no prior experience in embedded systems with the necessary conceptual and design building blocks to understand the architectures of embedded systems. Written to provide the depth of coverage and real-world examples developers need, Designing Embedded Hardware also provides a road-map to the pitfalls and traps to avoid in designing embedded systems. Designing Embedded Hardware covers such essential topics as: The principles of developing computer hardware Core hardware designs Assembly language concepts Parallel I/O Analog-digital conversion Timers (internal and external) UART Serial Peripheral Interface Inter-Integrated Circuit Bus Controller Area Network (CAN) Data Converter Interface (DCI) Low-power operation This invaluable and eminently useful book gives you the practical tools and skills to develop, build, and program your own application-specific computers.

**Run Your Own Corporation** Garrett Sutton,2013-02-28 "I've set up my corporation. Now what do I do?" All too often business owners and real estate investors are asking this question. They have formed their protective entity - be it a corporation, LLC or LP - and don't know what to do next. "Run Your Own Corporation" provides the solution to this very common dilemma. Breaking down the requirements chronologically (ie the first day, first quarter, first year) the book sets forth all the tax and corporate and legal matters new business owners must comply with. Written by Rich Dad's Advisor Garrett Sutton, Esq., who also authored the companion edition "Start Your Own Corporation", the book clearly identifies what must be done to properly maintain and operate your corporation entity. From the first day, when employer identification numbers must be obtained in order to open up a bank account, to the fifth year when trademark renewals must be filed, and all the requirements in between, "Run Your Own Corporation" is a unique resource that all business owners and investors must have. Rich Dad/Poor Dad author Robert Kiyosaki states, "Run Your Own Corporation is the missing link for most entrepreneurs. They've set up their entity, but don't know the next steps. Garrett Sutton's book provides valuable information needed at the crucial start up phase of operations. It is highly recommended reading." When "Start Your Own Corporation" is combined with "Run Your Own Corporation" readers have a two book set that offers the complete corporate picture.

*The 1925 Tri-State Tornado'S Devastation in Franklin County, Hamilton County, and White County, Illinois* Bob Johns,2012-04-05 When the tornado roared across southern Missouri, southern Illinois, and southwestern Indiana for many hours during the afternoon on March 18th in 1925, there was now way that people along the tornado path would know it was occurring before they could see it. This was because there was no radar systems then and the National Weather Service was not able to let people know that a tornado was going to occur or that there was a tornado already occurring since they did not know much about tornadoes. So, the only way a person then was able to know that a tornado was occurring and it was going to hit them was when they were able to see it close to where they were and realize that it was a tornado. This story shows in Franklin, Hamilton, and White Counties in Illinois what some people saw and what they did, and what happened to them when the tornado hit them. This story also has many detailed maps across the townships in Franklin, Hamilton, and White Counties in Illinois that show where many peoples homes, many schools and churches, and other things were located when they were hit by the tornado and damaged or destroyed. Some of the maps also show where some people landed after they were blown well away from there home. There are also some pictures in this story that shows what some homes, schools and other things looked like when they were damaged or damaged by the tornado. And a few of them show what they looked like before they were hit by the tornado. Some of the eyewitnesses of this tornado that I net with and went on driving surveys with are shown on pictures in this book.
