This Is Why We Can't Have Nice Things Whitney Phillips, 2015-02-27 Internet trolls live to upset as many people as possible, using all the technical and psychological tools at their disposal. They gleefully whip the media into a frenzy over a fake teen drug crisis; they post offensive messages on Facebook memorial pages, traumatizing grief-stricken friends and family; they use unabashedly racist language and images. They take pleasure in ruining a complete stranger's day and find amusement in their victim's anguish. In short, trolling is the obstacle to a kinder, gentler Internet. To quote a famous Internet meme, trolling is why we can't have nice things online. Or at least that's what we have been led to believe. In this provocative book, Whitney Phillips argues that trolling, widely condemned as obscene and deviant, actually fits comfortably within the contemporary media landscape. Trolling may be obscene, but, Phillips argues, it isn't all that deviant. Trolls' actions are born of and fueled by culturally sanctioned impulses -- which are just as damaging as the trolls' most disruptive behaviors. Phillips describes, for example, the relationship between trolling and sensationalist corporate media -- pointing out that for trolls, exploitation is a leisure activity; for media, it's a business strategy. She shows how trolls, the grimacing poster children for a socially networked world, align with social media. And she documents how trolls, in addition to parroting media tropes, also offer a grotesque pantomime of dominant

cultural tropes, including gendered notions of dominance and success and an ideology of entitlement. We don't just have a trolling problem, Phillips argues; we have a culture problem. This Is Why We Can't Have Nice Things isn't only about trolls; it's about a culture in which trolls thrive.

The Social Media Reader Michael

Mandiberg, 2012-03 The first collection to address the collective transformation happening in response to the rise of social media With the rise of web 2.0 and social media platforms taking over vast tracts of territory on the internet, the media landscape has shifted drastically in the past 20 years, transforming previously stable relationships between media creators and consumers. The Social Media Reader is the first collection to address the collective transformation with pieces on social media, peer production, copyright politics, and other aspects of contemporary internet culture from all the major thinkers in the field. Culling a broad range and incorporating different styles of scholarship from foundational pieces and published articles to unpublished pieces, journalistic accounts, personal narratives from blogs, and whitepapers, The Social Media Reader promises to be an essential text, with contributions from Lawrence Lessig, Henry Jenkins, Clay Shirky, Tim O'Reilly, Chris Anderson, Yochai Benkler, danah boyd, and Fred von Loehmann, to name a few. It covers a wide-ranging topical terrain, much like the internet itself, with particular emphasis on collaboration and sharing, the politics of social

media and social networking, Free Culture and copyright politics, and labor and ownership. Theorizing new models of collaboration, identity, commerce, copyright, ownership, and labor, these essays outline possibilities for cultural democracy that arise when the formerly passive audience becomes active cultural creators, while warning of the dystopian potential of new forms of surveillance and control.

The Routledge Companion to Media Anthropology

Elisabetta Costa, Patricia G. Lange, Nell Haynes, Jolynna Sinanan, 2022-09-30 The Routledge Companion to Media Anthropology provides a broad overview of the widening and flourishing area of media anthropology, and outlines key themes, debates, and emerging directions. The Routledge Companion to Media Anthropology draws together the work of scholars from across the globe, with rich ethnographic studies that address a wide range of media practices and forms. Comprising 41 chapters by a team of international contributors, the Companion is divided into three parts: Histories Approaches Thematic Considerations. The chapters offer wide-ranging explorations of how forms of mediation influence communication, social relationships, cultural practices, participation, and social change, as well as production and access to information and knowledge. This volume considers new developments, and highlights the ways in which anthropology can contribute to the study of the human condition and the social processes in which media are entangled. This is an indispensable teaching resource for advanced undergraduate and postgraduate students and an

essential text for scholars working across the areas that media anthropology engages with, including anthropology, sociology, media and cultural studies, internet and communication studies, and science and technology studies.

Online Trolling and Its Perpetrators Pnina Fichman, Madelyn R. Sanfilippo, 2016-04-11 Online trolling and other deviant behaviors have always affected online communities. As online trolling becomes widely spread, myriad questions are raised, including: Who is a troll and why do trolls troll? What are the enabling factors of online trolling? How do members and administrators of online communities detect, interpret, and react to trolling? How can online trolling be handled effectively? What is the impact of the socio-cultural and technological environments on online trolling? What motivates trolling?

Handbook of Computational Social Science, Volume 1 Uwe Engel, Anabel Quan-Haase, Sunny Xun Liu, Lars E Lyberg, 2021-11-10 The Handbook of Computational Social Science is a comprehensive reference source for scholars across multiple disciplines. It outlines key debates in the field, showcasing novel statistical modeling and machine learning methods, and draws from specific case studies to demonstrate the opportunities and challenges in CSS approaches. The Handbook is divided into two volumes written by outstanding, internationally renowned scholars in the field. This first volume focuses on the scope of computational social science, ethics, and case studies. It covers a range of key issues, including open science, formal modeling, and the social and behavioral

sciences. This volume explores major debates, introduces digital trace data, reviews the changing survey landscape, and presents novel examples of computational social science research on sensing social interaction, social robots, bots, sentiment, manipulation, and extremism in social media. The volume not only makes major contributions to the consolidation of this growing research field but also encourages growth in new directions. With its broad coverage of perspectives (theoretical, methodological, computational), international scope, and interdisciplinary approach, this important resource is integral reading for advanced undergraduates, postgraduates, and researchers engaging with computational methods across the social sciences, as well as those within the scientific and engineering sectors.

The Year's Best Science Fiction Vol. 1 Jonathan Strahan, 2020-09-08 The definitive guide and a must-have collection of the best short science fiction and speculative fiction of 2019, showcasing brilliant talent and examining the cultural moment we live in, compiled by award-winning editor Jonathan Strahan. With short works from some of the most lauded science fiction authors, as well as rising stars, this collection displays the top talent and the cutting-edge cultural moments that affect our lives, dreams, and stories. The list of authors is truly star-studded, including New York Times bestseller Ted Chiang (author of the short story that inspired the movie *Arrival*), N. K. Jemisin, Charlie Jane Anders, and many more incredible talents. An

assemblage of future classics, this anthology is a must-read for anyone who enjoys the vast and exciting world of science fiction.

Theorizing Mediated Information Distortion Brian H. Spitzberg, 2023-09-08 This book explores the phenomenon of distortion of information through media via the lens of the COVID-19 pandemic, and the ways in which relevant information distortion and virality have occurred in regard to the disease and its risks. Positing that the interrelated processes of misinformation, disinformation, fake news and conspiracy theories are related forms of distortion of information through media (DIM) and can only be understood through a multilevel theoretical model that incorporates message-based, individual difference, social network-based, societal and geotechnical factors, Brian H. Spitzberg develops an integrative, well-argued, and well-evidenced framework within which these issues can and should be addressed. This book offers a model for further research across such disciplines as communication, journalism/media studies, political science, sociology, cognitive psychology, social psychology, evolutionary psychology, public health, big data analytics, social network analytics, computational linguistics and geographic information sciences, and will interest researchers and students in those areas.

I Am a Troll Swati Chaturvedi, 2016 Indian social media is awash with right-wing trolls who incite online communal tension and abuse anyone who questions them. But who are they? How are they organized? In this explosive investigation,

conducted over two years, Swati Chaturvedi finally lifts the veil over this murky subject

Mind Over Media: Propaganda Education for a Digital Age Renee Hobbs, 2020-10-20 Winner of the AAP 2021 PROSE Award for Excellence in Social Sciences. Propaganda is inescapable. It's everywhere. Students need to analyze, resist, critique—and create. Media literacy educators have always insisted that we are both creators and receivers of media messages. The truth of this is even more apparent in today's digital environment, with children and adults alike participating in a ubiquitous, nonstop stream of social media. Clearly, students need the tools to interpret news and information critically—not just for school but for life in a “post-truth” world, where the lines blur between entertainment, information, and persuasion. Renee Hobbs demonstrates how a global perspective on contemporary propaganda enables educators to stimulate both the intellectual curiosity and the cultural sensitivities of students. Replete with classroom and online learning activities and samples of student work, *Mind Over Media* provides a state-of-the-art look at the theory and practice of propaganda in contemporary society, and shows how to build learners' critical thinking and communication skills on topics including computational propaganda, content marketing, fake news, and disinformation.

Russian Nazi Troll Bots! Eric W. Saeger, 2018-08-24 It's beyond dispute that trolls and automated bots helped Donald Trump win the White House in 2016. Some of the troll operations

involved were based in Russia, but domestic interests also participated in the invasion. In fact, trolls of all types, from all corners of the internet, came together in a perfect storm of propaganda, disinformation, and political dissent. The confusion wrought by the multi-pronged troll invasion still affects our online spaces today, leaving many questions unanswered. Who are the trolls? What do they want? How do they operate? Why couldn't our intelligence agencies put a stop to Russian and right-wing trolling? Can trolling be stopped? And what's with all the freakin' Nazis? One thing is certain: the troll invasions wouldn't have succeeded if America hadn't been divided on many pressing issues. Deep cultural woes, such as racism, our New Generation Gap, and the slow destruction of the middle class, were part of the toxic environment that allowed trolls to flourish. This book – the first from software expert, award-winning internet troll and long-time underground-culture fixture Eric Saeger – examines all these issues with an impartial eye. The limitations and realities of current technology are explained in clear, simple language, revealing the tactics of everyday trolls and describing how future technology promises to make the internet a safe, livable place for everyone. Most important of all, along the way, you'll see the humor in our dire but salvageable situation. Once we understand the invaders, we'll no longer fear RUSSIAN NAZI TROLL BOTS!

Post Memes Daniel Bristow, Alfie Bown, 2019 Art-
form, send-up, farce, ironic disarticulation,
pastiche, propaganda, trololololol, mode of
critique, mode of production, means of
politicisation, even of subjectivation - memes are
the inner currency of the internet's circulatory
system. Independent of any one set value, memes
are famously the mode of conveyance for the alt-
right, the irony left, and the apoliticos alike,
and they are impervious to many economic
valuations: the attempts made in co-opting their
discourse in advertising and big business have
made little headway, and have usually been
derailed by retaliative meming. POST MEMES:
SEIZING THE MEMES OF PRODUCTION takes advantage of
the meme's subversive adaptability and ripeness
for a focused, in-depth study. Pulling together
the interrogative forces of a raft of thinkers at
the forefront of tech theory and media dissection,
this collection of essays paves a way to
articulating the semiotic fabric of the early 21st
century's most prevalent means of content posting,
and aims at the very seizing of the memes of
production for the imagining and creation of new
political horizons. With contributions from Scott

and McKenzie Wark, Patricia Reed, Jay Owens, Thomas Hobson and Kaajal Modi, Dominic Pettman, Bogna M. Konior, and Eric Wilson, among others, this essay volume offers the freshest approaches available in the field of memes studies and inaugurates a new kind of writing about the newest manifestations of the written online. The book aims to become the go-to resource for all students and scholars of memes, and will be of the utmost interest to anyone interested in the internet's most viral phenomenon. ABOUT THE EDITORS ALFIE BOWN is the author of several books including *The Playstation Dreamworld* (Polity, 2017) and *In the Event of Laughter: Psychoanalysis, Literature and Comedy* (Bloomsbury, 2018). He is also a journalist for the Guardian, the Paris Review, and other outlets. DAN BRISTOW is a recovering academic, a bookseller, and author of *Joyce and Lacan: Reading, Writing, and Psychoanalysis* (Routledge, 2016) and *2001: A Space Odyssey and Lacanian Psychoanalytic Theory* (Palgrave, 2017). He is also the co-creator with Alfie Bown of *Everyday Analysis*, now based at New Socialist magazine.

Internet Memes and Society Anastasia

Denisova, 2019-03-21 This book provides a solid, encompassing definition of Internet memes, exploring both the common features of memes around the globe and their particular regional traits. It identifies and explains the roles that these viral texts play in Internet communication: cultural, social and political implications; significance for self-representation and identity formation; promotion of alternative opinion or trending interpretation; and subversive and resistant power

in relation to professional media, propaganda, and traditional and digital political campaigning. It also offers unique comparative case studies of Internet memes in Russia and the United States.

This Is Why We Can't Have Nice Things Whitney Phillips, 2015-03-20 Why the internet troll problem is actually a culture problem: how online trolling fits comfortably within today's media landscape. Internet trolls live to upset as many people as possible, using all the technical and psychological tools at their disposal. They gleefully whip the media into a frenzy over a fake teen drug crisis; they post offensive messages on Facebook memorial pages, traumatizing grief-stricken friends and family; they use unabashedly racist language and images. They take pleasure in ruining a complete stranger's day and find amusement in their victim's anguish. In short, trolling is the obstacle to a kinder, gentler Internet. To quote a famous Internet meme, trolling is why we can't have nice things online. Or at least that's what we have been led to believe. In this provocative book, Whitney Phillips argues that trolling, widely condemned as obscene and deviant, actually fits comfortably within the contemporary media landscape. Trolling may be obscene, but, Phillips argues, it isn't all that deviant. Trolls' actions are born of and fueled by culturally sanctioned impulses—which are just as damaging as the trolls' most disruptive behaviors. Phillips describes the relationship between trolling and sensationalist corporate media—pointing out that for trolls, exploitation is a leisure activity; for media, it's a business

strategy. She shows how trolls, "the grimacing poster children for a socially networked world," align with social media. And she documents how trolls, in addition to parroting media tropes, also offer a grotesque pantomime of dominant cultural tropes, including gendered notions of dominance and success and an ideology of entitlement. We don't just have a trolling problem, Phillips argues; we have a culture problem. *This Is Why We Can't Have Nice Things* isn't only about trolls; it's about a culture in which trolls thrive.

Hater John Semley, 2018-10-23 A timely manifesto urging us to think critically, form opinions, and then argue them with gusto. *Hater* begins from a simple premise: that it's good to hate things. Not people or groups or benign belief systems, but things. More to the point, it's good to hate the things everyone seems to like. Scan the click-baiting headlines of your favorite news or pop-culture website and you're likely to find that just about everything is, supposedly, what we need right now. We are the victims of an unbridled, unearned optimism. And our world demands pessimism. It's vital to be contrarian--now, as they say, more than ever. Because ours is an age of calcified consensus. And we should all hate that. In this scathing and funny rebuke of the status quo, journalist John Semley illustrates that looking for and identifying nonsense isn't just a useful exercise for society, it's also a lot of fun. But *Hater* doesn't just skewer terrible TV shows and hit songs--at its core it shows us how to meaningfully talk about and engage with

culture, and the world. Ultimately, Hater is what we actually need right now.

Encyclopedia of Video Games [3 volumes] Mark J. P. Wolf, 2021-05-24 Now in its second edition, the Encyclopedia of Video Games: The Culture, Technology, and Art of Gaming is the definitive, go-to resource for anyone interested in the diverse and expanding video game industry. This three-volume encyclopedia covers all things video games, including the games themselves, the companies that make them, and the people who play them. Written by scholars who are exceptionally knowledgeable in the field of video game studies, it notes genres, institutions, important concepts, theoretical concerns, and more and is the most comprehensive encyclopedia of video games of its kind, covering video games throughout all periods of their existence and geographically around the world. This is the second edition of Encyclopedia of Video Games: The Culture, Technology, and Art of Gaming, originally published in 2012. All of the entries have been revised to accommodate changes in the industry, and an additional volume has been added to address the recent developments, advances, and changes that have occurred in this ever-evolving field. This set is a vital resource for scholars and video game aficionados alike.

Modeling Sociocultural Influences on Decision Making Joseph V. Cohn, Sae Schatz, Hannah Freeman, David J. Y. Combs, 2016-09-19 In our increasingly globally interconnected world, understanding and appreciating the sociocultural context within which individuals make their decisions is critical to developing successful

partnerships. The collection of chapters in this volume illustrates how advances in information and social media technologies, as well as modeling and simulation tools, combined with the social sciences, can be leveraged to better understand how sociocultural context influences decision making. The chapters in this volume were contributed by leading experts from academia, industry, and government and provide: Insights into cross-cultural decision making based on recent international events, with grounding in an historical context Discussions of cutting-edge modeling techniques used today by professionals across multiple organizations and agencies Descriptions of specific cross-cultural decision making tools designed for use by laypeople and professionals Case studies on the role of cross-cultural decision making grounded in current events and (in many cases) military applications.
