

Tropical Resort

Rick Rose

Tropical Resorts Hock Beng Tan, 1995 Mass tourism has become one of the most highly developed and fastest growing industries. This lavishly photographed book examines, albeit selectively, the rise and rise of resort architecture in Southeast Asia. Many of these sumptuous enclaves, designed for an unabashedly hedonistic lifestyle, have an enigmatic presence in the pristine environments in which they are located. This book is the first to showcase the burgeoning variety of these beguiling resorts.

The Last Resort Sarah Stodola, 2022-06-28 A captivating exploration of beach resort culture—from its roots in fashionable society to its undervalued role in today's world economy—as the travel industry approaches a climate reckoning With its promise of escape from the strains of everyday life, the beach has a hold on the popular imagination as the ultimate paradise. In *The Last Resort*, Sarah Stodola dives into the psyche of the beachgoer and gets to the heart of what drives humans to seek out the sand. At the same time, she grapples with the darker realities of resort culture: strangleholds on local economies, reckless construction, erosion of beaches, weighty carbon footprints, and the inevitable overdevelopment and decline that comes with a soaring demand

for popular shorelines. The Last Resort weaves Stodola's firsthand travel notes with her exacting journalism in an enthralling report on the past, present, and future of coastal travel. She takes us from Monte Carlo, where the pursuit of pleasure first became part of the beach resort experience, to a village in Fiji that was changed irrevocably by the opening of a single resort; from the overdevelopment that stripped Acapulco of its reputation for exclusivity to Miami Beach, where extreme measures are underway to prevent the barrier island from vanishing into the ocean. In the twenty-first century, beach travel has become central to our globalized world—its culture, economy, and interconnectedness. But with sea levels likely to rise at least 1.5 to 3 feet by the end of this century, beaches will become increasingly difficult to preserve, and many will disappear altogether. What will our last resort be when water begins to fill the lobbies?

100 Resorts in the Philippines Dominique Grele, Lily Yousry-Jouve, 2004-01-15 The book features full details and descriptions of resorts, hotels or guesthouses that the authors regard as memorable. The description of each place is not just factual, but emotional in that it reveals impressions. It is more as though a friend is making a word-of-mouth recommendation rather than the bland copy of a brochure. Details of the overall size, the facilities, rates, service, local tours and attractions are fully covered.

Tropical Whites Catherine Cocks, 2013-03-05 As late as 1900, most whites regarded the tropics as the white man's grave, a realm of steamy fertility, moral dissolution, and disease. So how did the tropical beach resort—white sand, blue waters, and towering palms—become the iconic vacation landscape? *Tropical Whites* explores the dramatic shift in attitudes toward and popularization of the tropical tourist Southland in the Americas: Florida, Southern

California, Mexico, and the Caribbean. Drawing on a wide range of sources, Catherine Cocks examines the history and development of tropical tourism from the late nineteenth century through the early 1940s, when the tropics constituted ideal winter resorts for vacationers from the temperate zones. Combining history, geography, and anthropology, this provocative book explains not only the transformation of widely held ideas about the relationship between the environment and human bodies but also how this shift in thinking underscored emerging concepts of modern identity and popular attitudes toward race, sexuality, nature, and their interconnections. Cocks argues that tourism, far from simply perverting pristine local cultures and selling superficial misunderstandings of them, served as one of the central means of popularizing the anthropological understanding of culture, new at the time. Together with the rise of germ theory, the emergence of the tropical horticulture industry, changes in passport laws, travel writing, and the circulation of promotional materials, national governments and the tourist industry changed public perception of the tropics from a region of decay and degradation, filled with dangerous health risks, to one where the modern traveler could encounter exotic cultures and a rejuvenating environment.

Eco-resorts Zbigniew Bromberek, 2009-06-04 Eco-Resorts is a design guide for low impact, environmentally friendly tourist resorts in the tropics. The book is the first to offer architects practical, detailed guidance in developing resort buildings that work with a tropical climate and meet the needs and expectations of the client and building inhabitants. The book includes both architectural design and material solutions, supported by theoretical principles, to present a sustainable approach to resort design. It demonstrates that tropical resort buildings do not necessarily require large energy input, in compliance with green building standards. Case studies show how principles of sustainable design have been successfully applied in tropical environments. * Written by an industry insider with practical design experience, knowledge and expertise. * Demonstrates design practices related to site planning and layout, and re-assesses best practices for a tropical environment, allowing architects to apply design principles to their own projects. * Includes international case studies from several countries to illustrate best practice from a variety of tropical climate destinations around the world. Z (Zbigniew) Bromberek, PhD, is an architect educated and registered in Poland, and postgraduate-educated and residing in Australia. Z has been practising and teaching

architecture for nearly 30 years. He has been involved and associated with various educational institutions and professional organizations in a number of countries around the world. Before the current appointment as Senior Lecturer in Architecture at the University of Tasmania, Z spent three years as Lecturer in Environmental Design at the University of Queensland, and two years as Guest Professor in Architectural Design in Nanjing, PR China. He was also the President of the Architectural Science Association ANZAScA for three consecutive terms in 2000–05. Z's major research interests include design–environment interaction, low-impact architecture and re-integration of architecture as an expression of a multi-disciplinary approach to design.

Understanding Tropical Coastal and Island Tourism

Development Klaus Meyer-Arendt, Alan A. Lew, 2016-03-17 This volume contains a collection of articles that include both case studies and theoretical insights applicable to the tourism development challenges of tropical coastal and island destinations throughout the world. Topics include the shortcoming of (eco)tourism in Madagascar, collaboration theory and successful multi-stakeholder partnerships on Indonesian resort islands,

resilience theory and development pressures on a Malaysian island, results and implications of a detailed survey of cruise passengers in Colombia, perceptions of underdevelopment as limiting factors in Costa Rica, and conflicts of perception and reality through the literary myths of Pitcairn Island. This book was published as a special issue of *Tourism Geographies*.

Beachheads Gerald Figal, 2016 This original and fresh book explores Okinawa's makeover as a tourist mecca in the long historical shadow and among the physical ruins of the Pacific War's most devastating land battle. Gerald Figal considers how a place burdened by a history of semicolonialism, memories of war and occupation, economic hardship, and contentious current political affairs has reshaped itself into a resort destination. Drawing on an innovative mix of detailed archival research and extensive fieldwork, Gerald Figal considers the ways Okinawa has accommodated war experience and its legacies within the manufacture and promotion of both a tropical paradise image and a heritage tourism site identified with the premodern Ryukyu Kingdom. Tracing the postwar formation of Tourist Okinawa, Figal addresses interrelated issues of economic sustainability, local political autonomy, interregional and international relations,

environmental preservation, historical and cultural self-representation, and especially Okinawa's role as a global peace site laboring under the legacies of war. From the end of World War Two to the present, the author follows Okinawa's evolution through three main themes: war memorialization, tourism-influenced environmental and historical restoration, and invasion and occupation represented by U.S. military bases and beach resorts. Creatively, accessibly, and eloquently written, this compelling work highlights a set of islands that represent key issues facing contemporary Japan.
