Traveling through Video Games Tom van Nuenen,2023-10-25 This book unlocks an understanding of video games as virtual travel. It explains how video game design increasingly takes cues from the promotional language of tourism, and how this connection raises issues of power and commodification. Bridging the disciplinary gap between game and tourism studies, the book offers a comprehensive account of touristic gazing in games such as The Legend of Zelda: Breath of the Wild, Minecraft, and Microsoft Flight Simulator 2020. Traveling through video games involves a mythological promise of open-ended opportunity, summarized in the slogan you can go there. Van Nuenen discusses the scale of game worlds, the elusive nature of freedom and control, and the pivotal role of work in creating a sense of belonging. The logic of tourism is fundamentally consumptive—but through design choices, players can also be invited to approach their travels more critically. This is the difference between moving through a game world, and being moved by it. This interdisciplinary and innovative study will interest students and scholars of digital media studies, game studies, tourism and technology, and the Digital Humanities.

How to Talk about Videogames Ian Bogost,2015-11-15 Videogames! Aren't they the medium of the twenty-first century? The new cinema? The apotheosis of art and entertainment, the realization of Wagnerian gesamtkunstwerk? The final victory of interaction over passivity? No, probably not. Games are part art and part appliance, part tableau and part toaster. In How to Talk about Videogames, leading critic Ian Bogost explores this paradox more thoroughly than any other author to date. Delving into popular, familiar games like Flappy Bird, Mirror's Edge, Mario Kart, Scribblenauts, Ms. Pac-Man, FarmVille, Candy Crush Saga, Bully, Medal of Honor, Madden NFL, and more, Bogost posits that videogames are as much like appliances as they are like art and media. We don't watch or read games like we do films and novels and paintings, nor do we perform them like we might dance or play football or Frisbee. Rather, we do something in-between with games. Games are devices we operate, so game critique is both serious cultural currency and self-parody. It is about figuring out what it means that a game works the way it does and then treating the way it works as if it were reasonable, when we know it isn't. Noting that the term games criticism once struck him as preposterous, Bogost observes that the idea, taken too seriously, risks balkanizing games writing from the rest of culture, severing it from the "rivers and fields" that sustain it. As essential as it is, he calls for its pursuit to unfold in this spirit: "God save us from a future of games critics, gnawing on scraps like the zombies that fester in our objects of study."

The World Is Born From Zero Cameron Kunzelman,2022-07-18 The World is Born From Zero is an investigation into the relationship between video games and science fiction through the philosophy of speculation. Cameron Kunzelman argues that the video game medium is centered on the evaluation and production of possible futures by following video game studies, media philosophy, and science fiction studies to their furthest reaches. Claiming that the best way to understand games is through rigorous formal analysis of their aesthetic strategies and the cultural context those strategies emerge from, Kunzelman investigates a diverse array of games like The Last of Us, VA-11 Hall-A, and Civilization VI in order to explore what science fiction video games can tell us about their genres, their ways of speculating, and how the medium of the video game does (or does not) direct us down experiential pathways that are both oppressive and liberatory. Taking a multidisciplinary look at these games, The World is Born From Zero offers a unique theorization of science fiction games that provides both science fiction studies and video game studies with new tools for thinking how this medium and mode inform each other.

Mental Health | Atmospheres | Video Games Jimena Aguilar Rodríguez,Federico Alvarez Igarzábal,Michael S. Debus,Curtis L. Maughan,Su-Jin Song,Miruna Vozaru,Felix Zimmermann,2022-10-31 Gaming has never been disconnected from reality. When we engage with ever more lavish virtual worlds, something happens to us. The game imposes itself on us and influences how we feel about it, the world, and ourselves. How do games accomplish this and to what end? The contributors explore the video game as an atmospheric medium of hitherto unimagined potential. Is the medium too powerful, too influential? A danger to our mental health or an ally through even the darkest of times? This volume compiles papers from the Young Academics Workshop at the Clash of Realities conferences of 2019 and 2020 to provide answers to these questions.

Displacing the Anxieties of Our World Ildikó Limpár, 2017-01-06 Monster studies, dystopian literature and film studies have become central to research on the now-proliferating works that give voice to culture-specific anxieties. This new development in scholarship reinforces the notion that the genres of fantasy and science fiction call for interpretations that see their spaces of imagination as reflections of reality, not as spaces invented merely to escape the real world. In this vein, *Displacing the Anxieties of Our World* discusses fictive spaces of literature, film, and video gaming. The eleven essays that follow the Introduction are grouped into four parts: I. "Imagined Journeys through History, Gaming and Travel"; II. "Political Anxieties and Fear of Dominance"; III. "The Space of Fantastic Science and Scholarship"; and IV. "Spaces Natural and Spaces Artificial". The studies produce a dialogue among disciplinary fields that bridges the imagined space between sixteenth-century utopia and twenty-first century dystopia with analyses penetrating fictitious spaces beyond utopian and dystopian spheres. This volume argues, consequently, that the space of imagination that conjures up versions of the world's frustrations also offers a virtual battleground – and the possibility of triumph coming from a valuable gain of cognizance, once we perceive the correspondence between spaces of the fantastic and those of the mundane.
