The Digital Revolution Inder Sidhu,2015-11-28 The massive transformations driven by digital technology have begun. The Digital Revolution gives you a complete roadmap for navigating the breathtaking changes happening now and shows you how to succeed. Silicon Valley executive, thought leader, and New York Times best-selling author Inder Sidhu shows how cloud computing, social media, mobility, sensors, apps, big data analytics, and more can be brought together in virtually infinite combinations to create opportunities and pose risks previously unimaginable. You'll learn how digital pioneers are applying connected digital technologies, also known as the Internet of Everything, to dramatically improve financial performance, customer experience, and workforce engagement in fields ranging from healthcare to education, from retail to government. Sidhu combines the practical perspective of practitioners with the extensive experience of experts to show you how to win in the new digital age. He takes you behind the scenes, engaging with business leaders from Apple, Google, Facebook, Cisco, Intel, Amazon, Walmart, Starbucks, RSA, Kaiser, Cleveland Clinic, Intermountain Healthcare, and so on and with academic leaders from Stanford, Yale, Wharton, MIT, Coursera, Khan Academy, and more and reveals their winning strategies and execution tactics for your benefit. Sidhu also discusses the key challenges of privacy, security, regulation, and governance in depth and offers powerful insights on managing crucial ethical, social, cultural, legal, and economic issues that digitization creates. He shows what the digital revolution will mean for you, both personally and professionally--and how you can win. Learn how you can leverage the digital revolution to Deliver superior customer experiences Improve your organization's financial performance Drive employee productivity, creativity, and engagement Build smart, efficient cities brimming with opportunity Make education more effective and relevant Achieve better health outcomes Make retail compelling, convenient, and profitable Balance privacy with security Protect yourself before, during, and after a cyberattack Accelerate your career and live a better life

Learning in a Digital World Paloma Díaz,Andri Ioannou,Kaushal Kumar Bhagat,J. Michael Spector,2019-06-29 This book aims at guiding the educators from a variety of available technologies to support learning and teaching by discussing the learning benefits and the challenges that interactive technology imposes. This guidance is based on practical experiences gathered through developing and integrating them into varied educational settings. It compiles experiences gained with various interactive technologies, offering a comprehensive perspective on the use and potential value of interactive technologies to support learning and teaching. Taken together, the chapters provide a broader view that does not focus exclusively on the uses of technology in educational settings, but also on the impact and ability of technology to improve the learning and teaching processes. The book addresses the needs of researchers, educators and other stakeholders in the area of education interested in learning how interactive technologies can be used to overcome key educational challenges.

Agent and Multi-Agent Systems in Distributed Systems - Digital Economy and E-Commerce Anne Hakansson,Ronald Hartung,2013-01-11 Information and communication technology, in particular artificial intelligence, can be used to support economy and commerce using digital means. This book is about agents and multi-agent distributed systems applied to digital economy and e-commerce to meet, improve, and overcome challenges in the digital economy and e-commerce sphere. Agent and multi-agent solutions are applied in implementing real-life, exciting developments associated with the need to eliminate problems of distributed systems. The book presents solutions for both technology and applications, illustrating the possible uses of agents in the enterprise domain, covering design and analytic methods, needed to provide a solid foundation required for practical systems. More specifically, the book provides solutions for the digital economy, e-sourcing clusters in network economy, and knowledge exchange between agents applicable to online trading agents, and security solutions to both digital economy and e-commerce. Furthermore, it offers solutions for e-commerce, such as, mapping and alignment of ontologies for business, negotiation, automated auctions, recommender systems to support traders in business activities, and game simulations.

Digital Education Pedagogy Souvik Pal,Ton Quang Cuong,R. S. S. Nehru,2020-12-08 This volume brings together advanced concepts from leading academic scientists, educationalists, administrative policymakers, and researchers on their experiences and research results on many aspects of digital educational methods and teaching practices. It provides an interdisciplinary compilation of recent innovations, trends, and concerns as well as the challenges encountered and solutions adopted in the fields of digital pedagogies and educational design. It is becoming increasingly important to develop adaptive, robust, scalable, and digital teaching-learning mechanisms in academics. This volume addresses this need by discussing the advancements in flipped and blended learning, student- and teacher-centric learning in technical institutes, critical digital pedagogies, and the complex analyses and collaborations with organizations outside the academy. This book also deals with protocols for educational and administrative policies, IoT-based teaching-learning methodology, teaching education and the process of assessment, testing and evaluation, integration of technology with digital education, and different case study-based approaches in digital teaching-learning methodology.

Thesaurus of Information Sciences and Technologies Denis Beauchemin,1992 In 1987, the Integrated Service of Information Resources (ISIR) of the Canadian Workplace Automation Research Centre began to set up a bibliographic data base to manage and make usable its documentation collection. To successfully process the information relevant to the various subject fields, the ISIR had to develop a controlled documentation language that eventually became this thesaurus. Terms are arranged alphabetically in English and French with equivalents in the other language and relationships to other terms in the thesaurus. A hierarchical list is also included. Subject fields include computer science, telecommunications, optics, acoustics and graphics and their specific information-processing applications (production, conversion, storage, distribution and access).

Handbook of Digital CMOS Technology, Circuits, and Systems Karim Abbas,2020-01-14 This book provides a comprehensive reference for everything that has to do with digital circuits. The author focuses equally on all levels of abstraction. He tells a bottom-up story from the physics level to the finished product level. The aim is to provide a full account of the experience of designing, fabricating, understanding, and testing a microchip. The content is structured to be very accessible and self-contained, allowing readers with diverse backgrounds to read as much or as little of the book as needed. Beyond a basic foundation of mathematics and physics, the book makes no assumptions about prior knowledge. This allows someone new to the field to read the book from the beginning. It also means that someone using the book as a reference will be able to answer their questions without referring to any external sources.

Active Learning Silvio Manuel Brito,2019-10-02 Active learning is now a form of learning that accompanies the knowledge evolution that challenges the learner to promote it, but also encourages him to investigate and become emotionally involved in the task. The great key to obtaining this behavior successfully depends, therefore, on the subject's involvement and ability to undertake, so that active learning becomes emotional entrepreneurial learning that generates new ideas and new forms of knowledge. From memorization, we move on to inquiry, from questioning to constructive participation, from hypostasis to problem-solving, from generalization to critical thinking. When we look at this book, we see real examples, concrete, and senses, from the most important act of human nature: learning!

Digital Economy Post COVID-19 Era Prashant Mishra,Ashu Sharma,Sayantan Khanra,Sumit K. Kundu,Sushanta Kumar Mishra,2023-12-03 This book presents the future directions of the digital economy post Covid-19 era. The chapters of this book cover contemporary topics on digital economy and digital initiatives undertaken by various organizations. Overall, the book shares insights on how organizations can adapt and transform their processes, structure, and strategies to remain relevant and competitive in the new business and economic environment. These insights also emerge from multidisciplinary discussions in various management domains, such as, consumer behaviour and marketing, economics, finance and accounting, entrepreneurship and small business management, environmental, social and governance compliance, future of work, human resource management, leadership, inclusive workforce, information systems and decision sciences, international business and strategy, and operations and supply chain management.

Using CAT Tools in Freelance Translation Paulina Pietrzak,Michal Kornacki,2020-11-29 This book explores the impact of applying computer-assisted (CAT) tools in freelance translation toward better understanding translators’ strategies, preferences, and challenges in using new technologies and identifying areas of enhancement in translator training. The volume offers a brief overview of the latest developments in technology in translation, examining such issues as the effect on the translation process and the dynamics of the translator-technology interaction. Drawing on data from a study with active translators in Poland, Pietrzak and Kornacki examine the underlying factors underpinning translators’ lack of engagement with these tools, including such issues as prevailing pre-conceptions around technology and limited knowledge hindering the most efficacious use of these resources and the subsequent impact on translator identity. Taken together, the book brings together these insights to help pinpoint freelance translators’ needs more effectively and adapt training programmes accordingly. The volume will be of interest to scholars in translation studies with an interest in process and technology as well as active translators.

Arts and Technology Fay Huang,Reen-Cheng Wang,2010-01-06 We welcome you to the First International Conference on Arts and Technology (ArtsIT 2009), hosted by CSIE of the National Ilan University and co-organized by the National Science Council, ICST, College of EECS at National Ilan University, Software Simulation Society in Taiwan, ISAC, TCA, NCHC, CREATE-NET, and Institute for Information Industry. ArtsIT2009 was held in Yilan, Taiwan, during September 24–25, 2009. The conference comprised the following themes: • New Media Technologies (Evolutionary systems that create arts or display art works, such as tracking sensors, wearable computers, mixed reality, etc.) • Software Art (Image processing or computer graphics techniques that create arts, including algorithmic art, mathematic art, advanced modeling and rendering, etc.) • Animation Techniques (2D or 3D computer animations, AI-based animations, etc.) • Multimedia (Integration of different media, such as virtual reality systems, audio, performing arts, etc.) • Interactive Methods (Vision-based tracking and recognition, interactive art, etc.) The conference program started with an opening ceremony, followed by three keynote speeches and four technical sessions distributed over a period of two days. Two poster sessions, one hour each, were scheduled before the afternoon oral sessions. An Interactive Arts Exhibition was held in conjunction with ArtsIT 2009. Twelve well-known digital arts teams from Taiwan exhibited 15 artworks in this event, including 10 interactive installation arts, 4 video arts, and 1 digital print. The conference received around 50 submissions from 15 different countries.
