Transportation and Sustainable Communities Institute of Transportation Engineers,1997 This report documents the resource papers (12) that were written for presentation at the 1997 ITE International Conference on Transportation and Sustainable Communities: Challenges and Opportunities, held on March 23 through March 26, 1997, in Tampa, Florida. This was the 13th in a series of annual ITE conferences to provide transportation professionals with information on what has been done, what is being done, and what can be done to meet current and future challenges and to take advantage of opportunities. The papers were written to address community demands for more livability and sustainability, and for transportation professionals to plan, design, and operate transportation facilities to that end. The resource papers contain information that will help transportation professionals employed by federal, state, regional, and local government agencies, consulting firms, universities, and industry meet this challenge. These papers address the issues, experiences, and opportunities relating to neighborhood traffic calming, neotraditional neighborhood developments, enhancing multimodal approaches through traffic engineering, managing land use and accessibility, assessing costs and benefits, role of State DOTs, and preparing transportation officials for the 21st century.

Transit Noise and Vibration Impact Assessment ,1995 This manual provides direction for the preparation of noise and vibration sections of environmental documents for mass transportation projects. The manual has been developed in the interest of promoting quality and uniformity in assessments. It is expected to be used by people associated with or affected by the urban transit industry, including Federal Transit Administration (FTA) staff, grant applicants, consultants and the general public. Each of these groups has an interest in noise/vibration assessment, but not all have the need for all the details of the process. Consequently, this manual has been prepared to serve readers with varying levels of technical background and interests. It sets forth the basic concepts, methods and procedures for documenting the extent and severity of noise impacts from transit projects.

The TTC Story Mike Filey,1997-10-01 Looking back over the past 75 years, there is no doubt that public transportation has played a major role in the development and maturing of Toronto and its metropolitan area. Indeed , despite the fiscal challenges facing it, the TTC today remains a transit agency with an enviable reputation. The TTC Story:The First Seventy-five Years, by Mike Filey, features over one hundred magnificent black and white images selected to illustrate the principal transit event in each year of the TTC's existence. The photographs have been selected from the Commission's vast archival collection by its knowledgeable archivist, Ted Wickson. Each event is fully described and put into its local, national, and worldwide historical context through the use of entertaining and informative text.

Track Design Handbook for Light Rail Transit ,2012 TCRP report 155 provides guidelines and descriptions for the design of various common types of light rail transit (LRT) track. The track structure types include ballasted track, direct fixation (ballastless) track, and embedded track. The report considers the characteristics and interfaces of vehicle wheels and rail, tracks and wheel gauges, rail sections, alignments, speeds, and track moduli. The report includes chapters on vehicles, alignment, track structures, track components, special track work, aerial structures/bridges, corrosion control, noise and vibration, signals, traction power, and the integration of LRT track into urban streets.

Building Transit Ridership Charles River Associates,Transit Cooperative Research Program,1997 Addresses transit's ridership and its share of the travel market. The research explored a variety of different public policies and transit management actions that can potentially influence transit ridership, particularly in comparison to local travel by private vehicle.

The Transit Metropolis Robert Cervero,1998-10 The author has spent more than three years studying cities around the world, and he makes a compelling case that

metropolitan areas of any size and with any growth pattern - from highly compact to widely dispersed - can develop successful mass transit systems.--BOOK JACKET.
