This book includes a revolutionary instructional CD, featuring videos that illustrate exactly how to learn the tempo secrets of the tour pros, and a calibrated soundtrack that you can use while practicing at a driving range or in your living room. Regardless of style or form, the winning tempo was always the same - Tour Tempo. In this breakthrough book, Novosel and Sports Illustrated senior writer John Garrity explain exactly how to achieve Tour Tempo. Through clear, step-by-step instruction, golfers are taught how to master two basic drills to synchronize their swings. Position Pieces for Cello Rick Mooney, Position Pieces for Cello is designed to give students a logical and fun way to learn their way around the fingerboard. Each hand position is introduced with exercises called Target Practice, Geography Quiz, and Names and Numbers. Following these exercises are tuneful cello duets which have been specifically composed to require students to play in that hand position. In this way, students gain a thorough knowledge of how to find the hand positions and, once there, which notes are possible to play. Using these pieces (with names like I Was a Teenage Monster, The Irish Tenor, and I've Got the Blues, Baby), position study on the cello has never been so much fun!

The Evolving Animal Orchestra Henkjan Honing,2019-03-05 A music researcher's quest to discover other musical species. Even those of us who can't play a musical instrument or lack a sense of rhythm can perceive and enjoy music. Research shows that all humans possess the trait of musicality. We are a musical species—but are we the only musical species? Is our musical predisposition unique, like our linguistic ability? In The Evolving Animal Orchestra, Henkjan Honing embarks upon a quest to discover if humans share the trait of musicality with other animals. Charles Darwin believed that musicality was a capacity of all animals, human and nonhuman, with a clear biological basis. Taking this as his starting point, Honing—a music cognition researcher—visits a series of biological research centers to observe the ways that animals respond to music. He has studied scientists' accounts of Snowball, the cockatoo who could dance to a musical beat, and of Ronan, the sea lion, who was trained to move her head to a beat. Now Honing will be able to make his own observations. Honing tests a rhesus monkey for beat perception via an EEG; performs a listening experiment with zebra finches; considers why birds sing, and if they intend their songs to be musical; explains why many animals have perfect pitch; and watches marine mammals respond to sounds. He reports on the unforeseen twists and turns, doubts, and oversights that are a part of any scientific research—and which point to as many questions as answers. But, as he shows us, science is closing in on the biological and evolutionary source of our musicality.

Cardiovascular Disease Gaetano Santulli,2021-04-30 According to the most updated epidemiological studies, cardiovascular disease remains a leading cause of death; in fact, despite substantial advances in the care of patients, the incidence of cardiovascular disorders continues to increase. Therefore, the search for novel mechanisms and therapeutics is desperately needed, and translational studies represent the best strategy to uncover novel therapeutic targets, reduce mortality, and improve the quality of life. This book gathers original articles and systematic reviews that have both a strong basic research background and clear translational potential. All the studies have been peer reviewed by at least two experts in the field. These contributions provide an updated systematic overview that examines, in detail, the mechanisms of the main cardiovascular and metabolic disorders, including ischemic and non-ischemic heart failure, hypertension, thromboembolism, atherosclerosis, stroke, diabetes mellitus, dyslipidemia, metabolic syndrome, valvulopathies, peripheral artery disease. In the final chapter, the functional role of the endothelium in the systemic manifestations of COVID-19 is described.
