Older Mexicans and Latinos in the United States Jacqueline L. Angel,Flavia C. Drumond Andrade,Fernando Riosmena,Silvia Mejia-Arango,2024-02-26

This book delves into the consequences of rapid population aging for Mexico and U.S. Latinos, impacting various institutions, including families, the labor force, and healthcare systems. It examines in depth the causes and consequences of the increasing prevalence of cognitive impairment and dementia, especially early-onset decline in the Mexican-origin population. The book identifies resilience factors as critical to successful aging and health in the Mexican and Mexican-American populations from a transdisciplinary perspective. It also examines the diversity in the experiences of older adults with dementia and related disorders and that of their families in Mexico and the United States. The book also helps to better understand the levels of need and support capacity in both nations and the organizational contexts of long-term care in both countries. The ultimate goal of this sixth volume in the series on aging in the Americas is to identify critical sources of vulnerability and possible policy options for closing the gap in affordable and sustainable long-term care and financial wellbeing for low-resource populations living with dementia and other medical conditions in both countries. The volume presents new information, consensus data, potential venues for intervention, and action frameworks to advance current knowledge grounded in global aging health systems research of closing disparities in vulnerable populations at high risk of declining cognitive and physical health in two different political contexts. As such, the book provides a wealth of information for researchers, policy makers and professionals in the field of population aging.

The Education System in Mexico David Scott,C.M. Posner,Chris Martin,Elsa Guzman,2018-03-15 Over the last three decades, a significant amount of research has sought to relate educational institutions, policies, practices and reforms to social structures and agencies. A number of models have been developed that have become the basis for attempting to understand the complex relation between education and society. At the same time, national and international bodies tasked with improving educational performances seem to be writing in a void, in that there is no rigorous theory guiding their work, and their documents exhibit few references to groups, institutions and forces that can impede or promote their programmes and projects. As a result, the recommendations these bodies provide to their clients display little to no comprehension of how and under what conditions the recommendations can be put into effect. The Education System in Mexico directly addresses this problem. By combining abstract insights with the practicalities of educational reforms, policies, practices and their social antecedents, it offers a long overdue reflection of the history, effects and significance of the Mexican educational system, as well as presenting a more cogent understanding of the relationship between educational institutions and social forces in Mexico and around the world.
