Irish Music for Flatpicking Guitar Made Easy Philip John Berthoud,2015-11-24 An exciting collection of 29 traditional tunes from Ireland, arranged for easy flatpicking guitar. All tunes are written clearly in standard notation as well as guitar tablature. An accompanying audio download contains all the tunes, played at a manageable speed, with guitar accompaniment.The collection contains airs, well known songs, polkas, slip jigs, slides, double jigs, hornpipes and reels, all of which are specially arranged by the author with the beginning/intermediate guitarist in mind. On the audio download, the tunes are played 2 or 3 times, so you can really get into the feel of the tune, when playing along. The speed of the tunes is quite slow, but not so slow as to take away from the essential feel of the music.Irish music is rightly popular all over the world. The haunting beauty of the slow airs and infectious foot-tapping rhythms of jigs and reels are here to be discovered in this selection of great traditional music. Includes access to online audio

While it is custom to play each tune twice or rather three times, most tunes were played once only because of the sheer volume of tunes. However, a few tunes in Part 1 were performed twice or three times. Another few were presented with a bodhran accompaniment. The single reel Flowers of Red Hill was played three times because of its variations. Each tune in the set Sporting Paddy - Man of The House (single reels) was repeated three times as well. The reel the Mason's Apron, apart from being played in a set, was also performed as a single track but in this case with 4 variations. Chord Arrangements: Chord Arrangements were meticulously vetted for accuracy. Things That Make Us Smart Don Norman,2014-12-02 By the author of THE DESIGN OF EVERYDAY THINGS. Insightful and whimsical, profoundly intelligent and easily accessible, Don Norman has been exploring the design of our world for decades, exploring this complex relationship between humans and machines. In this seminal work, fully revised and updated, Norman gives us the first steps towards demanding a person-centered redesign of the machines we use every day. Humans have always worked with objects to extend our cognitive powers, from counting on our fingers

to designing massive supercomputers. But advanced technology does more than merely assist with memory—the machines we create begin to shape how we think and, at times, even what we value. In THINGS THAT MAKE US SMART, Donald Norman explores the complex interaction between human thought and the technology it creates, arguing for the development of machines that fit our minds, rather than minds that must conform to the machine.

A History of Performing Pitch Bruce Haynes,2002-11-06 Haynes (U. of Montreal) traces the history of musical pitch standards over the last four centuries, linking frequency values to pitch names and telling where, when, and why various pitch levels have been used. With a focus on Italy, France, Germany, the Netherlands and the Hapsburg lands, he covers the pitches of about 1,400 historical instruments and how the design and function influenced and were influenced by changes in pitch. In addition, he studies the effect of pitch differences on musical notation and choice of key. The author has also written a book on the oboe, the instrument that plays the A to which a symphony orchestra tunes. Annotation copyrighted by Book News, Inc., Portland, OR

Ways of Escape C. Rojek,1993-06-23 Modern life is often described as an iron cage from which there is no escape. But popular culture venerates leisure and travel as authentic escape routes from routine and monotony. However what kind of escape is tolerated in modern society? How is it shaped by historical expectations of leisure and travel? And what do we actually experience when we engage in leisure or travel activity? This fascinating and accomplished book tries to supply answers to these questions. A major scholarly contribution to the sociological analysis of leisure, pleasure and travel, Dr Rojek's study is a radical challenge to the existing paradigmatic orthodoxy. Bryan S. Turner, University of Essex.

Public Folklore Robert Baron,Nick Spitzer,2010-12-06 A landmark volume exploring the public presentation and application of folk culture in collaboration with communities, Public Folklore is available again with a new introduction discussing recent trends and scholarship. Editors Robert Baron and Nick Spitzer provide theoretical framing to contributions from leaders of major American folklife programs and preeminent folklore scholars, including Roger D. Abrahams, Robert Cantwell, Gerald L. Davis, Archie Green, Bess Lomax Hawes, Richard Kurin, Daniel Sheehy, and Barbara Kirshenblatt-Gimblett. Their essays present vivid accounts of public folklore practice in a wide range of settings—nineteenth-century world's fairs and minstrel shows, festivals, museums, international cultural exchange programs, concert stages, universities, and hospitals. Drawing from case studies, historical analyses, and their own experiences as advocates, field researchers, and presenters, the essayists recast the history of folklore in terms of public practice, while discussing standards for presentation to new audiences. They approach engagement with tradition bearers as requiring collaboration and dialogue. They critically examine who has the authority to represent folk culture, the ideologies informing these representations, and the effect upon folk artists of encountering revived and new audiences within and beyond their own communities. In discussions of the relationship between public practice and the academy, this volume also offers new models for integrating public folklore training within graduate studies.

Forest Inventory Annika Kangas,Matti Maltamo,2006-02-19 This book has been developed as a forest inventory textbook for students and could also serve as a handbook for practical foresters. We have set out to keep the mathematics in the book at a fairly non-technical level, and therefore, although we deal with many issues that include highly sophisticated methodology, we try to present first and foremost the ideas behind them. For foresters who need more details, references are given to more advanced scientific papers and books in the fields of statistics and biometrics. Forest inventory books deal mostly with sampling and measurement issues, as found here in section I, but since forest inventories in many countries involve much more than this, we have also included material on forestry applications. Most applications nowadays involve remote sensing technology of some sort, so that section II deals mostly with the use of remote sensing material for this purpose. Section III deals with national inventories carried out in different parts of world, and section IV is an attempt to outline some future possibilities of forest inventory methodologies. The editors, Annika Kangas Professor of Forest Mensuration and Management, Department of Forest Resource Management, University of Helsinki. Matti Maltamo Professor of Forest Mensuration, Faculty of Forestry, University of Joensuu. ACKNOWLEDGEMENTS

Meyerhold Edward Braun,1995 Vsevolod Meyerhold began his theatrical career as an actor with the Moscow Art Theatre but he left after four years to establish himself as a director in the remote provinces. At Stanislavsky's invitation he returned to Moscow and founded an experimental studio to find a new direction for the Art theatre's work. Absorbing influences from Maeterlinck, the Russian Symbolists, commedia dell'arte and Oriental theatre, Meyerhold went on to develop a theatrical style that exploded the conventions of naturalism. His re-evaluations of the Russian classics culminated in his masterpiece, the 1926 production of The Government Inspector. In 1917, he supported the Bolshevik cause and was the pioneer of revolutionary theatre, but this great innovator fell foul of the Stalinists and was executed in 1940 on concocted charges of treason and espionage. Edward Braun takes us through the journey of this extraordinary life of experiment and discovery. He uses eye-witness accounts to bring to life Meyerhold's productions, their genesis, the problems the director encountered and the inventive solutions he provided. Braun describes Meyerhold's rehearsal techniques and exercises and provides an acute assessment of his continuing influence on contemporary theatre. In this fully revised and greatly expanded edition of his book The Theatre of Meyerhold, Edward Braun draws on papers only now being made available in Russia to describe the director's last days, his final tragic confrontation with the NKVD.
