Lawyers in 21st-Century Societies Richard L Abel, Ole Hammerslev, Hilary Sommerlad, Ulrike Schultz, 2020-04-02 The world's legal professions have undergone dramatic changes in the 30 years since publication of the landmark three-volume *Lawyers in Society*, which launched comparative sociological studies of lawyers. This is the first of two volumes in which scholars from a wide range of disciplines, countries and cultures document and analyse those changes. The present volume presents reports on 46 countries, with broad coverage of North America, Western Europe, Latin America, Asia, Australia, North Africa and the Middle East, sub-Saharan Africa, and former communist countries. These national reports address: the impact of globalisation and neoliberalism on national legal professions (the relationship of lawyers and their professional associations to the state and tensions between state and citizenship); changes in lawyer demography (rapidly growing numbers and the profession's efforts to retain control, the entry of women and obstacles to

full gender equality, ethnic diversity); legal education (the proliferation of institutions and pedagogic innovation); the regulation of lawyers; structures of production (especially the growth of large firms and the impact of technology and paraprofessionals); the distribution of lawyers across roles; and access to justice (state-funded legal aid and pro-bono services). The juxtaposition of the reports reveals the dramatic transformations of professional rationales, labour markets, and working practices and the multiple contingencies of the role of lawyers in societies experiencing increasing juridification within a new geopolitical order.

Soils as a Key Component of the Critical Zone 5 Christian Valentin,2019-02-06 One third of the world's soils have already been degraded. The burden on the land continues to grow under the combined pressures of demography, urbanization, artificialization and mining, and there are increased demands on agricultural land: changing dietary preferences, land speculation, as well as new demands for agroenergy, fiber, green chemistry, and more. Resulting issues such as soil crusting, water and wind erosion, soil salinization and soil acidity therefore constitute a major threat. The authors of this book present the main processes and factors of soil degradation, different ways to prevent it and methods of rehabilitation. The book also deals with the origin and processes of metallic and organic soil pollution as well as methods of phytoremediation and restoration. It is one of the few books to explore the issue of soil artificialization and urban soil management and to highlight how agricultural and urban waste can be used to amend and fertilize cultivated soils.

Hydropolitical Vulnerability and Resilience Along International Waters, 2005 In Africa, most major rivers, freshwater lakes, and aquifers are shared by two or more countries. These nations are becoming increasingly vulnerable to conflict, and their vulnerabilities are made more acute by climatic variations in precipitation, increasing urbanization, industrialization and environmental degradation. The concept of resilience and vulnerability as it relates to water resources is tackled in this report within the framework of sustainability and relates to the ability of the human and bio-physical systems to adapt to change.

"Men Will Come": A History of the 314th Troop Carrier Group 1942-1945
Colonel Mark C. Vlahos, 2019-10 Revised Second Edition. The roots of Tactical Airlift and Air Mobility Command Missions were founded in the Troop Carrier Groups of World War II. Meticulously researched and documented, Col Mark Vlahos' *Men Will Come A History of the 314th Troop Carrier Group 1942 - 1945*, will not only be the definitive history of this unit, but fills a major void in USAAF History. Activated March 9, 1942, the 314th participated in every major Airborne Operation in the Mediterranean and European Theaters of Operations. Through the school of hard knocks, tough lessons were learned as the new Airborne, Air-land, and Glider missions matured in WWII. The 314th played a major role in this evolving process. As we celebrate the 75th Anniversary of D-Day, this book is a must read for anyone interested in WWII Airborne, Troop Carrier Operations and the contribution of our Greatest

Generation. -Gen Carlton Everhart II, USAF-Ret, former Commander Air Mobility Command. 327 photos, maps, documents; index. Cork Oak Woodlands on the Edge James Aronson, João Santos Pereira, Juli G. Pausas, 2012-09-26 Cork oak has historically been an important species in the western Mediterranean—ecologically as a canopy or “framework” tree in natural woodlands, and culturally as an economically valuable resource that underpins local economies. Both the natural woodlands and the derived cultural systems are experiencing rapid change, and whether or not they are resilient enough to adapt to that change is an open question. *Cork Oak Woodlands on the Edge* provides a synthesis of the most up-to-date, scientific, and practical information on the management of cork oak woodlands and the cultural systems that depend on cork oak. In addition, *Cork Oak Woodlands on the Edge* offers ten site profiles written by local experts that present an in-depth vision of cork oak woodlands across a range of biophysical, historical, and cultural contexts, with sixteen pages of full-color photos that illustrate the tree, agro-silvopastoral systems, products, resident biodiversity, and more. *Cork Oak Woodlands on the Edge* is an important book for anyone interested in the

future of cork oak woodlands, or in the management of cultural landscapes and their associated land-use systems. In a changing world full of risks and surprises, it represents an excellent example of a multidisciplinary and holistic approach to studying, managing, and restoring an ecosystem, and will serve as a guide for other studies of this kind.

Tunisia Anthony Sylvester (pseud.), 1969

Protest! Liz McQuiston, 2019-10 Social discontent and political protest have been expressed visually as well as verbally throughout the ages. Graffiti scribbles on a wall, pictures scattered in the street during marches, posters spread through the environment: all have played their part. For such agitational images represent a power struggle a rebellion against an established order and a call to arms, or a passionate cry of concern for a cause. The book begins in the 16th century with the Reformation, when images could be produced in multiples. It then travels through decades and centuries of graphics: protesting against the miseries of war; satirising the foibles of royalty, politicians, religions, and society in general; calling for an end to racial discrimination and apartheid; demanding freedom from tyranny and dictatorships; struggling for LGBTQ+ rights; and, finally, attending to 21st-century concerns and Trumpisms. Each chronological chapter opens with a short introduction offering historical and artistic context to the period, followed by a copious and wide-ranging display of powerful protest graphics, grouped together by event or movement. Encompassing an astounding breadth of

emotion--from hilarious satire to utter horror--Protest! is a tribute to the liberating concept of hard-won 'freedom of speech' throughout history, and which still has agency in current times.

Fruit Oils: Chemistry and Functionality Mohamed Fawzy Ramadan, 2019-05-08
Fruit Oils: Chemistry and Functionality presents a comprehensive overview of recent advances in the chemistry and functionality of lipid bioactive phytochemicals found in fruit oils. The chapters in this text examine the composition, physicochemical characteristics and organoleptic attributes of each of the major fruit oils. The nutritional quality, oxidative stability, and potential food and non-food applications of these oils are also extensively covered. The potential health benefits of the bioactive lipids found in these fruit oils are also a focus of this text. For each oil presented, the levels of omega-9, omega-6 and omega-3 fatty acids are specified, indicating the level of health-promoting traits exhibited in each. The oils and fats extracted from fruits generally differ from one another both in terms of their major and minor bioactive constituents. The methods used to extract oils and fats as well as the processing techniques such as refining, bleaching and deodorization affect their major and minor constituents. In addition, different post-processing treatments of fruit oils and fats may alter or degrade important bioactive constituents. Treatments such as heating, frying, cooking and storage and major constituents such as sterols and tocopherols are extensively covered in this text. Although there have

been reference works published on the composition and biological properties of lipids from oilseeds, there is currently no book focused on the composition and functionality of fruit oils. *Fruit Oils: Chemistry and Functionality* aims to fill this gap for researchers, presenting a detailed overview of the chemical makeup and functionality of all the important fruit oils.

Routledge Handbook of the Arab Spring Larbi Sadiki, 2014-12-17 The self-immolation of Mohammed Bouazizi in Tunisia in December 2010 heralded the arrival of the 'Arab Spring,' a startling, yet not unprecedented, era of profound social and political upheaval. The meme of the Arab Spring is characterised by bottom-up change, or the lack thereof, and its effects are still unfurling today. The Routledge Handbook of the Arab Spring seeks to provide a departure point for ongoing discussion of a fluid phenomenon on a plethora of topics, including: Contexts and contests of democratisation The sweep of the Arab Spring Egypt Women and the Arab Spring Agents of change and the technology of protest Impact of the Arab Spring in the wider Middle East and further afield Collating a wide array of viewpoints, specialisms, biases, and degrees of proximity and distance from events that shook the Arab world to its core, the Handbook is written with the reader in mind, to provide students, practitioners, diplomats, policy-makers and lay readers with contextualization and knowledge, and to set the stage for further discussion of the Arab Spring.
