MagicLand Charles Bastille,2021-09-07 “A bracing dystopian tale that deftly mixes magic, evolution, and romance” featuring a wiccan priestess and a humanoid who fall in love against all odds (Kirkus Reviews). A feel-good dystopian novel? Welcome to MagicLand. On a future Earth where magic and technology have been at war for two thousand years, can one kiss change the fate of the world? When a young actor from Gath, Belex, crash lands outside the magic land known as Moria, he’s rescued by a young Morian priestess in waiting, Aurilena. The two find themselves drawn impossibly towards each other in the midst of a war between two distinct species of humanoids: her people, the magicians of Moria, and his people, the Gath, whose tremendous intellectual and physical capabilities are programmed into their DNA. Together, the two discover a terrible secret that lies at the heart of the centuries-old conflict between MagicLand and Gath. It’s a secret that leads to a kiss that could end the war once and for all. The only question is will it end in brutal violence or give way to an improbable peace between implacable enemies? The answer to that question may depend on whether Aurilena can discover the true source of power behind her unique gifts before it’s too late. “Bastille’s debut artfully combines magic, technology, and romance. . . . [He] handles the multilayered plot well, creating a fascinating world populated with empathetic characters.” —Publishers Weekly

Pragmemes and Theories of Language Use Keith Allan,Alessandro Capone,Istvan Kecskes,2017-01-10 This volume offers recent developments in pragmatics and adjacent territories of investigation, including important new concepts such as the pragmatic act and the pragmeme, and combines developments in neighboring disciplines in an integrative holistic pragmatic approach. The young science of pragmatics has, from its inception, differentiated itself from neighboring fields in the humanities, especially the disciplines dealing with language and those focusing on the social and anthropological aspects of human behavior, by focusing on the language user in his or her societal environment. This collection of papers continues that emphasis on language use, and pragmatic acts in their context. The editors and contributors share a perspective that essentially considers language as a system for communication and wants to look at language from a societal perspective, and accept the view that acts of interpretation are essentially embedded in culture. In an interdisciplinary approach, some authors explore connections with social theory, in particular sociology or socio-linguistics, some offer a political stance (critical discourse analysis), others explore connections with philosophy and philosophy of language, and several papers address problems in theoretical pragmatics.
