Finance Unleashed Magnus Lind, Kelly Barner, 2017-10-26 Fast moving, to the point, and rooted in first-hand executive experiences, this book is for people of vision and action, and for creating the conditions required for growth, innovation, and increased competitive advantage. Finance Unleashed is based on a series of interactive interviews with a diverse group of global influencers and executives, all of which will challenge readers to think laterally and find inspiration in the new role of finance. Cases and interviewees represent organizations such as UPS and DHL, and the London School of Economics, and approaches such as Lean Six Sigma, innovation, customer-centricity, the financial supply chain, and behavioral procurement. The authors' goal is to serve as a catalyst for leaders who are positioned to make meaningful changes today. The book includes a practical model to help executive teams redesign and refocus finance to drive business leadership - with an emphasis on the CFO. The model has three primary components: 1) Customer-Centricity - Listen and Map; 2) Process - Structure and Technology; and 3) Innovation - Create and Measure. These are presented as phases that each executive team will need to consider based on the goals and maturity level of their organization. For the CFO and ambitious finance executives, Finance Unleashed presents a path forward towards success and career advancement. For the CEO and the board, it presents an expanded vision for what financial organizations are capable of.

The Regulation of Turkish Network Industries Muzaffer Eroğlu, Matthias Finger, 2022-01-01 This book brings together academics and experts on Turkish network industries. It provides fundamental information on the current developments regarding regulation of the different network industries in Turkey. Turkey has gone through a liberalization process in most of the network industries during the past 20 years. In most of them, independent regulatory authorities have been established, but some network industries are still remaining under the central or local government regulatory regime. As a result, there is now a very complicated regulatory regime in place which makes Turkey's regulatory system difficult to understand for practitioners, academics, lawyers, researchers and investors. This book offers unique insight

into Turkey's regulatory regime in various network industries. It also offers a historical background to regulation, a description of the current regulatory regimes, as well as an analysis of the foreseeable evolutions. The book covers all the important network industries in Turkey. No similar book is available on the market to date. Moreover, the book provides an extensive analysis of the current regulatory regimes in the energy, the transport, and the telecommunications industries. This book should be of interest to anyone wishing to understand Turkish regulation and will be very helpful handbook to researchers who are interested in regulation of network industries not only in Turkey but also in other developing countries, as Turkey is quite representative of other emerging countries. Readers will acquire a thorough understanding of the state of play of the Turkish network industries and their regulation.
