English / Uzbek / Turkish Dictionary John C.

Rigdon,2017-08-05 This dictionary contains approximately 1400 terms in English, Uzbek and Turkish. It combines 3 of the top 50 languages of the world. With English at number 3, Turkish at number 22, and Uzbek at number 45, over 450 million people speak one of these 3 languages. Turkish (tur) is the most widely spoken of the Turkic languages, with around 10-15 million native speakers in Southeast Europe (mostly in East and Western Thrace) and 60-65 million native speakers in Western Asia (mostly in Anatolia). Uzbek (ubk) is a Turkic language and the official language of Uzbekistan. It has 27 million native speakers and is spoken by the Uzbeks in Uzbekistan and elsewhere in Central Asia. The influence of Islam, and by extension, Arabic, is evident in

Uzbek loanwords. This dictionary is derived from our Words R Us system, a derivative of WordNet. English Wordnet, originally created by Princeton University is a lexical database for the English language. WordNet can be viewed as both a combination of dictionary and thesaurus.

Turkish Dictionary in Two Parts James William Redhouse,2017

Dictionary of Italian-Turkish Language (1641) by Giovanni

Molino Elİbieta İwicicka,2020-01-20 Giovanni Molino's

Dittionario Della Lingua Italiana, Turchesca (1641), is the first extensive Turkish dictionary of its kind, with nearly 8000 lexical head entries excerpted, not from the Ottoman literature, but the everyday Turkish language, the vernacular for at least a part of the

population of 17th century Constantinople. Molino, born Armenus Turcicus Yovhann ¹ of Ankara, was exposed to the Turkish language from childhood, unlike other authors of the known ‘texts in transcription’. In Armenian cultural history, he is remembered as a man of letters, a publisher and the translator of religious texts, whose services to the history of the Turkish language and the corresponding contribution to Ottoman Turkish culture were to this date unknown. The editor has reversed and reorganised the material of the lexicon from Italian-Turkish to Turkish-Italian. The lexical entries of Molino’s dictionary are presented according to morphological and phonological principles, with their orthographic variants side by side, revealing information on the morpho-phonological patterns of Ottoman-Turkish at that time. The language Molino recorded sounds almost like contemporary Turkish and can be considered a bridge to the modern Turkish language.
