Don't Turn Out the Lights Bernard Minier, 2016-12-06 “You did nothing.” Christine Steinmeyer thought the anonymous suicide note she found in her mailbox on Christmas Eve wasn't meant for her. But the man calling in to her radio show seems convinced otherwise. “You let her die. . . .” That's only the beginning. Bit by bit, her life is turned upside down. But who among her friends and family hates her enough to want to destroy her? And why? It's as if someone has taken over her life, and everything holding it together starts to crumble. Soon all that is left is an unimaginable nightmare. Martin Servaz is on leave in a clinic for depressed cops, haunted by his childhood sweetheart Marianne's kidnapping by his nemesis, the psychopath Julian Hirtmann. One day, he receives a key card to a hotel room in the mail—the room where an artist committed suicide a year earlier. Someone wants him to get back to work, which he's more than ready to do, despite his mandatory sick leave. Servaz soon uncovers evidence of a truly terrifying crime. Could someone really be cruelly, consciously hounding women to death? What if the people closest to us are not what they seem? What happens when someone takes control of your life and your relationships? And what is hiding in the darkness? In Bernard Minier's *Don't Turn Out the Lights*, you won't see who's coming after you.

Last One Out Shut Off the Lights Stephanie Soileau, 2020-07-07 A lightning bolt of a literary debut. ---Adam Johnson, Pulitzer Prize winner *Enchanting* and so neatly planned they feel made by time, these stories mark the debut of a writer to watch. ---John Freeman, *Literary Hub* *Last One Out Shut Off the Lights* is an evocative portrait of the last-chance towns of southwest Louisiana, where oil development, industrial pollution, dying wetlands, and the ever-present threat of devastating hurricanes have eroded their inhabitants' sense of home. These eleven piercing stories feature indelible characters struggling to find a foothold in a world that is forever washing out from under them, people who must reckon with their ambivalence about belonging to a place so continually in flux. In a collection whose resonant echoes abound, we meet a reluctant teenage mother who stows her baby in a closet to steal a night out; a spiteful retiree who sabotages his neighbor in the wake of a hurricane; a Pentecostal singer in a children's theater company who confronts the cultish leader of her troupe; a community of elderly Cajuns who conspire with a family of Sudanese immigrants to hide an escaped cow from the authorities; and a desperate young woman who tries to drag her brother to Mexico for surgery, determined to save his life and her own. As Lauren Groff did for the state of Florida in her recent collection *Florida*, Stephanie Soileau demonstrates that Louisiana is as much a state of mind as it is a place on the map. A love letter to the Cajun language, life rhythms, and customs that still make the region unique, *Last One Out Shut Off the Lights* is also a powerful reminder of the treacherous escape routes that bedevil anyone longing to leave home, and the traps that remain for those who desire to return.

Things We Left Unsaid Zoya Pirzad,2012-05-01 Deep in an Iranian suburb, made rich by the booming oil industry, Clarice Ayvazian lives a comfortable life surrounded by the gentle bickering of her children and her gossiping friends and relatives. Happy being at the heart of her family, she devotes herself to their every need. But when an enigmatic Armenian family move in across the street, something begins to gnaw at Clarice's contentment: a feeling that there may be more to life – and to her – than this. Dizzy with the sweltering heat and simmering emotions, Clarice begins to feel herself come alive to possibilities previously unimaginable. Set in Iran prior to the Islamic revolution, Zoya Pirzad's award-winning novel crafts an intimate portrait of family life – its joys and its compromises – and how we find a happiness that endures. For fans of Anne Tyler, Things We Left Unsaid is a humorous and pointed insight into the hopes and aspirations of Iranians in the years that led to the Islamic Revolution.

Turn Out the Lights Gary Cartwright,2010-07-22 Whether the subject is Jack Ruby, Willie Nelson, or his own leukemia-stricken son Mark, when it comes to looking at the world through another person's eyes, nobody does it better than Gary Cartwright. For over twenty-five years, readers of Texas Monthly have relied on Cartwright to tell the stories behind the headlines with pull-no-punches honesty and wry humor. His reporting has told us not just what's happened over three decades in Texas, but, more importantly, what we've become as a result. This book collects seventeen of Cartwright's best Texas Monthly articles from the 1980s and 1990s, along with a new essay, My Most Unforgettable Year, about the lasting legacy of the Kennedy assassination. He ranges widely in these pieces, from the reasons for his return to Texas after a New Mexican exile to profiles of Kris Kristofferson and Willie Nelson. Along the way, he strolls through San Antonio's historic King William District; attends a Dallas Cowboys old-timers reunion and the Holyfield vs. Foreman fight; visits the front lines of Texas' new range wars; gets inside the heads of murderers, gamblers, and revolutionaries; and debunks Viagra miracles, psychic surgery, and Kennedy conspiracy theories. In Cartwright's words, these pieces all record the renewal of my Texas-ness, a rediscovery of Texas after returning home.

Who Turned Off the Lights? Alfonso McAfee, Jr.,McAfee Jr,2020-12-14 Who turned off the light? The land before the country called Nigeria came into existence, was a land filled with light and hope. Electricity referred to as light metaphorically represents the success of the people. Today, lights are sporadic at best, and hope is fading. Some believed darkness resulted from the colonization by the British, which brought about the ideals of capitalism. The survival of the fittest became the contest of the day and poverty surly followed. After Nigeria received its independence in 1960, the British left a system in place where the Northern region welded control over the Southern and Western regions. Many leaders felt the only way to change this system was through force. The first military coup was initiated by Igbo army officers in January 1966, this set off a series of counter coups including a bloody three (3) year civil war until the final coup d' etat in 1993. The untimely death of the Military head of State Sani Abacha paved the way for a civilian government. As military rule became a seemingly permanent feature of Nigerian politics. Many Nigerians lost hope and developed a mindset to get all; as much as you can today because tomorrow is just another day. Many civil servants took on the attitude of the increasingly authoritarian and corrupt governments. Greed, bribery, and corruption was the order of the day, over time corruption would reach almost every sector of life, and business dealings in the country. As a result of the winner take all framework, long reigning leaders referred to as strongmen dominated politics in Africa. Nigeria provides power/electricity to the Ghanaian people that reside in Ghana, West Africa. Currently the energy supply crisis in Nigeria refers to the ongoing failure to provide adequate electricity supply to domestic households and industrial producers, only 40% of the Nigerian population is connected to the energy grid. It is so common in people residing in local communities, and villagers often state we have a generator so that makes our family better than yours. The Federal Government of Nigeria spent Billions of dollars on roads, yet the country has some of the worst roads in the world. The Federal Government has also spent billions on the construction of Power Plants to bring stable lights to the country. Greed and corruption for roads, power facilities, and other necessary infrastructure projects have been squandered by corrupt leaders.

Before the Lights Go Out Maggie Koerth-Baker,2012-02-21 What you need to know now about America's energy future Hi, I'm the United States and I'm an oil-oholic. We have an energy problem. And everybody knows it, even if we can't all agree on what, specifically, the problem is. Rising costs, changing climate, peaking oil, foreign oil, public safety?if the fears are this complicated, then the solutions are bound to be even more confusing. Maggie Koerth-Baker?science editor at the award-winning blog BoingBoing.net?finally makes some sense out of the madness. Over the next 20 years, we'll be forced to cut 20 quadrillion BTU worth of fossil fuels from our energy budget, by wasting less and investing in alternatives. To make it work, we'll need to radically change the energy systems that have shaped our lives for 100 years. And the result will be neither business-as-usual, nor a hippie utopia. Koerth-Baker explains what we can do, what we can't do, and why The Solution is really a lot of solutions working together. This isn't about planting a tree, buying a Prius, and proving that you're a good person. Economics and social incentives got us a country full of gas-guzzling cars, long commutes, inefficient houses, and coal-fired power plants out in the middle of nowhere, and economics and incentives will be the things that build our new world. Ultimately, change is inevitable. Argues we're not going to solve the energy problem by convincing everyone to live like it's 1900 because that's not a good thing. Instead of reverting to the past, we have to build a future where we get energy from new places, use it in new ways, and do more with less. Clean coal? Natural gas? Nuclear? Electric cars? We'll need them all. When you look at the numbers, you'll find that we'll still be using fossil fuels, nuclear, and renewables for decades to come. Looks at new battery technology, smart grids, passive buildings, decentralized generation, clean coal, and carbon sequestration. These are buzzwords now, but they'll be a part of your world soon. For many people, they already are. Written by the cutting edge Science Editor for Boing Boing, one of the ten most popularblogs in America

Earth Hour Nanette Heffernan,2020-01-21 Click flashlights, light lanterns, and get ready to turn electric lights out to celebrate Earth Hour! Wherever you come from, you can help our planet. Kids around the world use electric energy to do all kinds of things--adults do, too! From cleaning the clothes we play in, to lighting up our dinner tables, to keeping us warm and toasty when the weather is cold, electricity is a huge part of our lives. Unfortunately, it can also have a big impact on our planet. Earth Hour--a worldwide movement in support of energy conservation and sustainability--takes place each March and is sponsored by the World Wildlife Fund for Nature (WWF). During Earth Hour, individuals, communities, and businesses in more than 7,000 cities turn off nonessential electric lights for one hour. Across each continent--from the Eiffel Tower to the Great Wall of China to the Statue of Liberty--one small act reminds all of us of our enormous impact on planet Earth.

On the Way Out, Turn Off the Light Marge Piercy,2020-09-29 A bountiful group of poems--direct, honest, and revelatory--that reflect on language, nature, old age, young love, Judaism, and our current politics, from one of our most read and admired poets Words are my business, Marge Piercy begins her twentieth collection of poetry, a glance back at a lifetime of learning, loving, grieving, and fighting for the disenfranchised, and a look forward at what the future holds for herself, her family and friends, and her embattled country. In the opening section, Piercy tells of her childhood in Detroit, with its vacant lots and scrappy children, the bike that gave her wings, her ambition at fourteen to gobble down all knowledge, and a too-early marriage (I put on my first marriage / like a girdle my skinny body / didn't need). We then leap into the present, her twilight zone, where she is learning to be quiet, learning to give praise despite it all. There are funny poems about medicine ads with their dire warnings, and some possible plusses about being dead: I'll never do another load of laundry . . . There is comfort in old bodies / coming together, in a partner's warmth--You're always warm: warm hands / smooth back sleek as a Burmese cat./ Sunny weather outside and in. Piercy has long been known for her political poems, and here we have her thoughts on illegal immigrants, dying languages, fraught landscapes, abortion, President-speak. She examines her nonbeliever's need for religious holidays and spiritual depth, and the natural world is appreciated throughout. On the Way Out, Turn Off the Light is yet more proof of Piercy's love and mastery of language--it is moving, stimulating, funny, and full of the stuff of life.

Turn Off the Lights Michael Rotondo,2021-07-18 Turn off the Lights is a combined work of poetry that includes all the poems from my first chapbook, Owl's Moonlight. It is a collection of poetry dating back to my teenage years that covers a variety of themes including love, heartbreak, pain, depression, mental health, and concussions. In essence, this is a second edition. Growing up there was an unwritten rule that men should not express their feelings. As a teenager it is rather difficult to keep your emotions bottled up. You are navigating the social realm of high school and learning who you are. Why poetry? I hit some rocky moments in high school that my English teacher noticed. He would frequently give me heck for declining grades and slacking off. The best piece of advice he gave me was about my feelings and writing. He told me that as men, we may not share our feelings with others very often, but there is nothing stopping us from writing to ourselves. Write poetry. Reflect on your work each year. You will learn a great deal about yourself, especially when you are older. Make a cup of coffee and dive in.
