Are you fed up with monthly Cable TV bills? The days of the 'rabbit-ears' and fuzzy reception are over! Television signals are now transmitted over the airwaves as high definition signals that can be freely accessed with the right equipment. Now anyone can eliminate their monthly Cable bill with this Free HDTV solution. There is no need for a de-scrambler, a converter or any other high-tech devices. You can build your own antenna with simple low cost materials. This can be a fun and educational project for any individual or a whole family. This solution has been implemented and tested first hand by the author. It works! Includes a list of all materials needed. The easy step-by-step instructions include tons of clear photographs so you can see at a glance what each step involves. This solution works on virtually any television sold since 2009. All you need is ANT 1 IN connection on the back of your tv (an antenna connection). This does require a satellite or have anything to do with satellite technology. Almost all networks now broadcast using HD signal technology and more channels are being added all the time. You no longer have to worry about poor reception from old UHF/VHF signals. Build this antenna and get crisp, clear channels for free! Say goodbye to your cable company! Be the first person on your street with completely legal AND free cable channels!
