The New Advertising Valerie K. Jones, Ruth E. Brown Ph.D., Ming Wang, 2016-09-19 The era of big data has revolutionized many industries—including advertising. This is a valuable resource that supplies current, authoritative, and inspiring information about—and examples of—current and forward-looking theories and practices in advertising. *The New Advertising: Branding, Content, and Consumer Relationships in the Data-Driven Social Media Era* supplies a breadth of information on the theories and practices of new advertising, from its origins nearly a quarter of a century ago, through its evolution, to current uses with an eye to the future. Unlike most other books that focus on one niche topic, this two-volume set investigates the overall discipline of advertising in the modern context. It sheds light on significant areas of change against the backdrop of digital data collection and use. The key topics of branding, content, interaction, engagement, big data, and measurement are addressed from multiple perspectives. With contributions from experts in academia as well as the advertising and marketing industries, this unique set is an indispensable resource that is focused specifically on new approaches to and forms of advertising. Readers will gain an understanding of the distinct shifts that have taken place in advertising. They will be able to build their knowledge on frameworks for navigating and capitalizing on today's fragmented, consumer-focused, digital media landscape, and they will be prepared for what the future of advertising will likely bring.

The Five Rights of the Individual Philip Schuyler, 2012 The US government makes 350 pages of new laws each day, including directives of policy that limit what an individual may do at home alone or with consenting adults. Such laws are intended to make people safer, healthier, or more productive, but they often violate the Five Rights because they sacrifice personal choices to some presumed greater good. Directives of policy may include laws that violate the rights to privacy or free speech; laws restricting abortion or physician-assisted suicide; restrictions on gun rights; prohibitions on unhealthy foods, cigarettes, alcohol, or drugs; laws that discriminate against gays; and laws that violate property rights. Drug prohibition laws have been the most damaging. Over the past 40 years, the US population grew 50 percent while its prison population grew 1,000 percent, due mostly to antidrug laws. There are now two million Americans in jail, half of whom didn't harm, coerce, or defraud anyone. The land of the free has one twentieth of the world's population and one fifth of its prison population. Our incarceration rate is seven times that of European countries. No democracy has ever had such a large percentage of its people behind bars. Legalization of marijuana and decriminalization of other drugs would free hundreds of thousands of individuals, end prison overcrowding, and save billions of dollars now spent trying to enforce unenforceable laws. There would be less need for spying, wiretapping, and breaking down doors. Americans could stop thinking of the police as the enemy and vice-versa, permitting a renewal of respect for the Five Rights.

Launch! Advertising and Promotion in Real Time Michael Solomon, 2009 *Launch! Advertising and Promotion* is written for advertising and promotion courses taught to students in the business school and journalism & mass communication students. This textbook is the first of its kind to teach advertising concepts by reverse engineering a real advertising campaign from beginning to end. In April 2007, SS+K, an innovative New York City communications agency, launched the first ever branding campaign for msnbc.com with the tag A Fuller Spectrum of News. *Launch!* follows that campaign from initial agency pitch through roll-out of print and media assets to post-campaign analysis. Throughout, it exposes readers to the theory and concepts of advertising and promotion, and the personalities and decisions that drove this campaign. The book takes a rare look behind the curtain - even letting you see some of the paths not chosen by the agency and client. Students get a realistic sense of how theory plays

out in practice, and get a flavor for the exciting field of advertising and promotion. And, they consistently learn the perspectives of both the advertising agency (where many journalism and communications students will work) and the client (where many marketing majors will work). This is a unique book, with a unique perspective, by a unique author team, and you won't find this kind of insight in any other text on the market. We think you're going to love it! This textbook has been used in classes at: Ball State University, Emerson College, Florida Institute of Technology, Grand Valley State University, Johnson County Community College, Manchester Business School, McLennan Community College, Michigan State University, North Hennepin Community College, Pierce College, Rochester Institute of Technology, Saint Louis University, Salem State College, South Dakota State University, Texas State University, Texas Tech University, University of New Hampshire, University of North Carolina, University of Notre Dame, University of South Florida, Virginia Tech, Western Kentucky University.

Social TV Cory Barker, 2022-06-27 Winner of the 2023 SCMS Media Industries Scholarly Interest Group Outstanding Book Award sponsored by the Center for Entertainment & Media Industries On March 15, 2011, Donald Trump changed television forever. The Comedy Central Roast of Trump was the first major live broadcast to place a hashtag in the corner of the screen to encourage real-time reactions on Twitter, generating more than 25,000 tweets and making the broadcast the most-watched Roast in Comedy Central history. The #trumproast initiative personified the media and tech industries' utopian vision for a multi-screen and communal live TV experience. In *Social TV: Multi-Screen Content and Ephemeral Culture*, author Cory Barker reveals how the US television industry promised—but failed to deliver—a social media revolution in the 2010s to combat the imminent threat of on-demand streaming video. Barker examines the rise and fall of Social TV across press coverage, corporate documents, and an array of digital ephemera. He demonstrates that, despite the talk of disruption, the movement merely aimed to exploit social media to reinforce the value of live TV in the modern attention economy. Case studies from broadcast networks to tech start-ups uncover a persistent focus on community that aimed to monetize consumer behavior in a transitional industry period. To trace these unfulfilled promises and flopped ideas, Barker draws upon a unique mix of personal Social TV experiences and curated archives of material that were intentionally marginalized amid pivots to the next big thing. Yet in placing this now-forgotten material in recent historical context, Social TV shows how the era altered how the industry pursues audiences. Multi-screen campaigns have shifted away from a focus on live TV and toward all-day “content” streams. The legacy of Social TV, then, is the further embedding of media and promotional material onto every screen and into every moment of life.

The Routledge Companion to Advertising and Promotional Culture Emily West,Matthew P. McAllister,2013-02-11 The Routledge Companion to Advertising and Promotional Culture provides an essential guide to the key issues, methodologies, concepts, debates, and policies that shape our everyday relationship with advertising. The book contains eight sections: Historical Perspectives considers the historical roots and their relationship to recent changes of contemporary advertising and promotional practice. Political Economy examines how market forces, corporate ownership, and government policies shape the advertising and media promotion environment. Globalization presents work on advertising and marketing as a global, intercultural, and transnational practice. Audiences as Labor, Consumers, Interpreters, Fans introduces how people construct promotional meaning and are constructed as consumers, markets, and labor by advertising forces. Identities analyzes the ways that advertising constructs images and definitions of groups -- such as gender, race and the child -- through industry labor practices, marketing, as well as through representation in advertising texts. Social Institutions looks at the pervasiveness of advertising strategies in different social domains, including politics, music, housing, and education. Everyday Life highlights how a promotional ethos and advertising initiatives pervade self image, values, and relationships. The Environment interrogates advertising’s relationship to environmental issues, the promotional efforts of corporations to construct green images, and mass consumption’s relationship to material waste. With chapters written by leading international scholars working at the intersections of media studies and advertising studies, this book is a go-to source for those looking to understand the ways advertising has shaped consumer culture, in the past and present.
