TV (The Book) Alan Sepinwall, Matt Zoller Seitz, 2016-09-06 Is The Wire better than Breaking Bad? Is Cheers better than Seinfeld? What's the best high school show ever made? Why did Moonlighting really fall apart? Was the Arrested Development Netflix season brilliant or terrible? For twenty years—since they shared a TV column at Tony Soprano's hometown newspaper—critics Alan Sepinwall and Matt Zoller Seitz have been debating these questions and many more, but it all ultimately boils down to this: What's the greatest TV show ever? That debate reaches an epic conclusion in TV (THE BOOK). Sepinwall and Seitz have identified and ranked the 100 greatest scripted shows in American TV history. Using a complex, obsessively all-encompassing scoring system, they've created a Pantheon of top TV shows, each accompanied by essays delving into what made these shows great. From vintage classics like The Twilight Zone and I Love Lucy to modern masterpieces like Mad Men and Friday Night Lights, from huge hits like All in the Family and ER to short-lived favorites like Firefly and Freaky and Geeks, TV (THE BOOK) will bring the triumphs of the small screen together in one amazing compendium. Sepinwall and Seitz's argument has ended. Now it's time for yours to begin!

**Cinematic TV** Rashna Wadia Richards, 2021-04-30 For decades after its invention, television was considered by many to be culturally deficient when compared to cinema, as analyses rooted in communication studies and the social sciences tended to focus primarily on television's negative impact on consumers. More recently, however, denigration has largely been replaced by serious critical consideration of what television represents in the post-network era. Once derided as a media wasteland, TV is now praised for its visual density and complexity. In the last two decades, media scholars have often suggested that television has become cinematic. Serial dramas, in particular, are acclaimed for their imitations of cinema's formally innovative and narratively challenging conventions. But what exactly does cinematic TV mean? In Cinematic TV, author Rashna Wadia Richards takes up this question comprehensively, arguing that TV dramas quote, copy, and appropriate (primarily) American cinema in multiple ways and toward multiple ends. Constructing an innovative theoretical framework by combining intertextuality and memory studies, Cinematic TV focuses on four modalities of intermedial borrowings: homage, evocation, genre, and parody. Through close readings of such exemplary shows as Stranger Things, Mad Men, Damages, and Dear White People, the book demonstrates how serial dramas reproduce and rework, undermine and idolize, and, in some cases, compete with and outdo cinema.

**Slow TV** Roel Puijk, 2021 Slow TV refers to a form of broadcasting long events for their entire duration, preferably in real time. Popularized by the Norwegian Broadcasting Corporation (NRK), the form became a phenomenon in 2009 after NRK's broadcast of a seven-hour train ride between Bergen and Oslo. Since then, slow TV programming has gained traction outside of Norway on television stations around the world and via streaming services like Netflix. In this academic study, Roel Puijk combines quantitative and qualitative research methods to explore different aspects of the Norwegian slow TV phenomenon, from the programming's production and development to its viewing and ultimate reception. Puijk relates slow TV to media events and media tourism, discussing its effects on cultural and economic developments and its evolving relationship to local and national identity. The result is an illuminating interdisciplinary study of media innovation and its effects on contemporary culture.

**The Great TV Sitcom Book** Rick Mitz, 1980

**Global TV** Denise D Bielby, C. Lee Harrington, 2008-08-17 A reporter for the Los Angeles Times once noted that "I Love Lucy is said to be on the air somewhere in the world 24 hours a day." That Lucy's madcap antics can be watched anywhere at any time is thanks to television syndication, a booming global marketplace that imports and exports TV shows. Programs from different countries are packaged, bought, and sold all over the world, under the watch of an industry that is extraordinarily lucrative for major studios and production companies. In Global TV, Denise D. Bielby and C. Lee Harrington seek to understand the machinery of this marketplace, its origins and history, its inner workings, and its product management. In so doing, they are led to explore the cultural significance of this global trade, and to ask how it is so remarkably successful despite the inherent cultural differences between shows and local audiences. How do culture-specific genres like American soap operas and Latin telenovelas so easily cross borders and adapt to new cultural surroundings? Why is The Nanny, whose gum-chewing star is from Queens, New York, a smash in Italy? Importantly, Bielby and Harrington also ask which kinds of shows fail. What is lost in translation? Considering such factors as censorship and other such state-specific policies, what are the inevitable constraints of crossing over? Highly experienced in the field, Bielby and Harrington provide a unique and richly textured look at global television through a cultural lens, one that has an undeniable and complex effect on what shows succeed and which do not on an international scale.

*Teen Television* Sharon Marie Ross, Louisa Ellen Stein, 2008-03-22 This essay collection explores the phenomenon of teen TV in the United States, analyzing the meanings and manifestations of this category of programming from a variety of perspectives. Part One views teen television through an industrial perspective, examining how networks such as WB, UPN, The CW, and The N have created a unique economic framework based on demographic niches and teen-focused narrowcasting. Part Two focuses on popular teen programs from a cultural context, evaluating how such programs reflect and at times stretch the envelope of the cultural contexts in which they are created. Finally, Part Three explores the cultures of reception (including the realms of teen consumerism, fan discourse, and unofficial production) through which teens and consumers of teen media have become authors of the teenage experience in their own right.

*Mouse TV* Matt Novak, 1998-01-01 Each member of the Mouse family wants to watch something different on television, but they discover a solution to their problem one night when the television does not work.

*America, As Seen on TV* Clara E. Rodríguez, 2018-03-20 Finalist, 2020 Latino Book Awards, Best Academic Themed Book The surprising effects of American TV on global viewers As a dominant cultural export, American television is often the first exposure to American ideals and the English language for many people throughout the world. Yet, American television is flawed, and, it represents race, class, and gender in ways that many find unfair and unrealistic. What happens, then, when people who grew up on American television decide to come to the United States? What do they expect to find, and what do they actually find? In America, As Seen on TV, Clara E. Rodríguez surveys international college students and foreign nationals working or living in the US to examine the impact of American television on their views of the US and on their expectations of life in the United States. She finds that many were surprised to learn that America is racially and economically diverse, and that it is not the easy-breezy, happy endings culture portrayed in the media, but a work culture. The author also surveys US-millennials about their consumption of US TV and finds that both groups share the sense that American TV does not accurately reflect racial/ethnic relations in the US as they have experienced them. However, the groups differ on how much they think US TV has influenced their views on sex, smoking and drinking. America, As Seen on TV explores the surprising effects of TV on global viewers and the realities they and US

millennials actually experience in the US.

**Television History, the Peabody Archive, and Cultural Memory** Ethan Thompson,Jeffrey P. Jones,Lucas Hatlen,2019-12-01 Television History, the Peabody Archive, and Cultural Memory is the first edited volume devoted to the Peabody Awards Collection, a unique repository of radio and TV programs submitted yearly since 1941 for consideration for the prestigious Peabody Awards. The essays in this volume explore the influence of the Peabody Awards Collection as an archive of the vital medium of TV, turning their attention to the wealth of programs considered for Peabody Awards that were not honored and thus have largely been forgotten and yet have the potential to reshape our understanding of American television history. Because the collection contains programming produced by stations across the nation, it is a distinctive repository of cultural memory; many of the programs found in it are not represented in the canon that dominates our understanding of American broadcast history. The contributions to this volume ask a range of important questions. What do we find if we look to the archive for what’s been forgotten? How does our understanding of gender, class, or racial representations shift? What different strategies did producers use to connect with audiences and construct communities that may be lost? This volume’s contributors examine intersections of citizenship and subjectivity in public-service programs, compare local and national coverage of particular individuals and social issues, and draw our attention to types of programming that have disappeared. Together they show how locally produced programs—from both commercial and public stations—have acted on behalf of their communities, challenging representations of culture, politics, and people.
