Civic Media Eric Gordon,Paul Mihailidis,2022-06-07 Examinations of civic engagement in digital culture—the technologies, designs, and practices that support connection through common purpose in civic, political, and social life. Countless people around the world harness the affordances of digital media to enable democratic participation, coordinate disaster relief, campaign for policy change, and strengthen local advocacy groups. The world watched as activists used social media to organize protests during the Arab Spring, Occupy Wall Street, and Hong Kong's Umbrella Revolution. Many governmental and community organizations changed their mission and function as they adopted new digital tools and practices. This book examines the use of “civic media”—the technologies, designs, and practices that support connection through common purpose in civic, political, and social life. Scholars from a range of disciplines and practitioners from a variety of organizations offer analyses and case studies that explore the theory and practice of civic media. The contributors set out the conceptual context for the intersection of civic and media; examine the pressure to innovate and the sustainability of innovation; explore play as a template for resistance; look at civic education; discuss media-enabled activism in communities; and consider methods and funding for civic media research. The case studies that round out each section range from a “debt resistance” movement to government service delivery ratings to the “It Gets Better” campaign aimed at combating suicide among lesbian, gay, bisexual, transgender, and queer youth. The book offers a valuable interdisciplinary dialogue on the challenges and opportunities of the increasingly influential space of civic media.

Protests in the Information Age Lucas Melgaço,Jeffrey Monaghan,2018-03-09 Information and communication technologies have transformed the dynamics of contention in contemporary society. Social networks such as Facebook and Twitter, and devices such as smartphones have increasingly played a central role in facilitating and mobilizing social movements throughout different parts of the world. Concurrently, the same technologies have been taken up by public authorities (including security agencies and the police) and have been used as surveillance tools to monitor and suppress the activities of certain demonstrators. This book explores the complex and contradictory relationships between communication and information technologies and social movements by drawing on different case studies from around the world. The contributions analyse how new communication and information technologies impact the way protests are carried out and controlled in the current information age. The authors focus on recent events that date from the Arab Spring onwards and pose questions regarding the future of protests, surveillance and digital landscapes.

Networks and Mobilization Processes: The Case of the Japanese Anti-Nuclear Movement after Fukushima Anna Wiemann,2018-05-14 Environmental disasters or other large-scale disruptive events often trigger the emergence of social movements demanding social and/or political change. This study investigates mobilization processes at the meso level of the Japanese anti-nuclear movement after the nuclear disaster at the Fukushima Daiichi nuclear power plant caused by the Great East Japan Earthquake and subsequent tsunami waves on March 11, 2011. To capture such meso level movement dynamics - which so far have played only a minor role in research on social movement mobilization - the study presents an analytical model based on premises from political process theory, network theory, and relational sociology. This model is then applied to the case of the Japanese anti-nuclear movement after Fukushima by looking at the relational dynamics of two coalitional movement networks engaged in advocacy-related activities in Tōkyō. The first case study is e-shift, a network-coalition working for nuclear phase-out and the promotion of renewable energy; the other is SHSK (Shienhō Shimin Kaigi), a coalition pushing for the rights of people affected by radioactive contamination and/or evacuation from contaminated areas. The study traces the mobilization processes of these two networks by analyzing data gathered in 2013 and 2014 in the form of participant observation of movement events, semi-structured interviews with movement organization representatives, and documentary data.

Idology in Transcultural Perspective Aoyagi Hiroshi,Patrick W. Galbraith,Mateja Kovacic,2021-12-10 This edited volume expands on what Aoyagi Hiroshi intended in the first decade of the new millennium to establish as a subfield of symbolic anthropology called "ideology." It brings together case studies of popular idolatry in Japan, but goes further to provide a transcultural perspective to guide anthropological investigations in different places and times. In proposing an integrated paradigm for the growing body of literature on idols, the volume redirects recurrent questions to more fundamental points of sociocultural inquiry. Contributions from scholars conducting ethnographic fieldwork, as well as those engaged in theoretical and historical analyses, facilitate comparative reading and critical thought. Exceeding a narrow focus on human idols, the chapters shed new light on virtual idols and YouTubers, cartoon characters and voices, robot idols and cybernetic systems. Science and technology studies thus comes together with theories of animation and anthropological work on life in more-than-human worlds.
