Proceedings of the 21st International Symposium on High Voltage Engineering Bálint Németh,2019-11-27 High voltage engineering is extremely important for the reliable design, safe manufacture and operation of electric devices, equipment and electric power systems. The 21st International Symposium on High Voltage Engineering, organized by the 90 years old Budapest School of High Voltage Engineering, provides an excellent forum to present results, advances and discussions among engineers, researchers and scientists, and share ideas, knowledge and expertise on high voltage engineering. The proceedings of the conference presents the state of the art technology of the field. The content is simultaneously aiming to help practicing engineers to be able to implement based on the papers and researchers to link and further develop ideas.

Towers, Turbines and Transmission Lines Sandy Bond,Sally Sims,Peter Dent,2013-02-20 From the Foreword by Dr Valmond Ghyoot, Emeritus Professor of Real Estate, University of South Africa: 'The valuation profession, the legal profession, property industry participants in general and students will welcome publication of this book. Investors, environmental groups and affected property owners will find essential information for use in their decision-making, development objections and claims. My hope is that [it] will provide answers where required and that it will help to improve the professional standard of valuations and appraisals internationally. I trust that it will also raise the standard of testimony in damages cases. If so, the editors and contributors will have succeeded in documenting the state of the art in this relatively unexplored terrain.' As a reference source, this book will help quantify the negative impacts on property values of high voltage overhead transmission lines, cell phone towers, and wind turbines. It gives a modern perspective of the concerns property owners have about the siting of industrial structures used to transmit or generate various forms of energy and how these concerns impact on property values. Studies reveal concerns the public have about devices and structures that emit electromagnetic fields (EMFs) due to their potential health hazards. . Despite some research reports suggesting there are no potential adverse health hazards from high voltage overhead transmission lines (HVOTLs) and towers, there is still on-going concern about the siting of these structures due to fears of health risks from exposure to EMFs, changes in neighbourhood aesthetics and loss in property values. The siting of wind turbines is also receiving community opposition due to noise, light flicker, aesthetic concerns, and loss in property values. The extent to which such attitudes are reflected in lower property values is not well understood. *Towers, Turbines and Transmission Lines: Impacts on Property Value* outlines results of studies conducted in the US, the UK, Australia and New Zealand and offers guidance to valuers as well as to property/real estate appraisal students and property owners around the world. The book provides defensible tools that are becoming widely accepted to assess the effect that these environmental detriments have on property prices.

Building Knowledge, Constructing Histories Ine Wouters,Stephanie van de Voorde,Inge Bertels,Bernard Espion,Krista de Jonge,Denis Zastavni,2018-09-05 Building Knowledge, Constructing Histories brings together the papers presented at the Sixth International Congress on Construction History (6ICCH, Brussels, Belgium, 9-13 July 2018). The contributions present the latest research in the field of construction history, covering themes such as: - Building actors - Building materials - The process of building - Structural theory and analysis - Building services and techniques - Socio-cultural aspects - Knowledge transfer - The discipline of Construction History The papers cover various types of buildings and structures, from ancient times to the 21st century, from all over the world. In addition, thematic papers address specific themes and highlight new directions in construction history research, fostering transnational and interdisciplinary collaboration. Building Knowledge, Constructing Histories is a must-have for academics, scientists, building conservators, architects, historians, engineers, designers, contractors and other professionals involved or interested in the field of construction history.

Cocos2d-x Game Development Blueprints Karan Sequeira,2015-07-27 Packed with comprehensive projects, this book takes a detailed look at a few of the industry's most popular games. This book will show you how to use Cocos2d-x to build games using its core components. You will learn how to incorporate game physics, and import custom models and animations. Next, you will see how to include effects such as particles and sounds. With a brief introduction to the upcoming HTML5 platform using Cocos2d-html5, the book goes on to tackle the many different concepts that comprise game development today. You will learn how to build worlds with meshes, a terrain, user interaction, physics, and more. You will start by developing a puzzle game, and then progress on to games that are increasingly complex. Along the way, you'll learn how to build gaming favorites similar to games such as Flappy Bird, Tilt to Live, Jumpy Clown, Angry Birds, and Tower Defense.

Computer Science and Engineering Technology (CSET2015), Medical Science and Biological Engineering (MSBE2015) Jiamei Deng,Qingjun Liu,2015-12-08 This book brings together 106 papers presented at the Joint Conferences of 2015 International Conference on Computer Science and Engineering Technology (CSET2015) and 2015 International Conference on Medical Science and Biological Engineering (MSBE2015), which were held in Hong Kong on 30-31 May 2015. The joint conferences covered a wide range of research topics in new emerging technologies, ranging from computing to biomedical engineering. During the conferences, industry professionals, scholars and government agencies around the world gathered to share their latest research results and discuss the practical challenges they encountered. Their research articles were reviewed and selected by a panel of experts before being compiled into this proceedings. Combining research findings and industry applications, this proceedings should be a useful reference for researchers and engineers working in computing and biomedical science. Fight the Tower Kieu Linh Caroline Valverde,Wei Ming Dariotis,2019-10-11 Asian American women scholars experience shockingly low rates of tenure and promotion because of the ways they are marginalized by intersectionalities of race and gender in academia. *Fight the Tower* shows that Asian American women stand up for their rights and work for positive change for all within academic institutions. The essays provide powerful portraits, reflections, and analyses of a population often rendered invisible by the lies sustaining intersectional injustices to operate an oppressive system.

Fundamentals of Wastewater Treatment and Engineering Rumana Riffat,Taqsim Husnain,2022-04-27 The 2nd edition of *Fundamentals of Wastewater Treatment and Design* introduces readers to the fundamental concepts of wastewater treatment, followed by engineering design of unit processes for sustainable treatment of municipal wastewater and resource recovery. It has been completely updated with new chapters to reflect current advances in design, resource recovery practices and research. Another highlight is the addition of the last chapter, which provides a culminating design experience of both urban and rural wastewater treatment systems. Filling the need for a textbook focused on wastewater, it covers history, current practices, emerging concerns, future directions and pertinent regulations that have shaped the objectives of this important area of engineering. Basic principles of reaction kinetics, reactor design and environmental microbiology are introduced along with natural purification processes. It also details the design of unit processes for primary, secondary and advanced treatment, as well as solids processing and removal. Recovery of water, energy and nutrients are explained with the help of process concepts and design applications. This textbook is designed for undergraduate and graduate students who have some knowledge of environmental chemistry and fluid mechanics. Professionals in the wastewater industry will also find this a handy reference.

Building the Ivory Tower LaDale C. Winling,2018 *Building the Ivory Tower* examines the role of American universities as urban developers and their changing effects on cities in the twentieth century. LaDale C. Winling explores philanthropy, real estate investments, architectural landscapes, and urban politics to reckon with the tensions of university growth in our cities.

Renovating the Ivory Tower Canadian Economics Association,C.D. Howe Institute,2002 This volume brings together papers presented at two sessions dealing with the current state of affairs at Canadian universities. The papers discuss some of the challenges that these institutions face and their success in meeting them, and also offer suggestions about public policies that might make their contributions to Canadian life more effective. The introduction outlines historical background, institutional factors, the role of universities, and the substantive findings of the other papers in this volume. Paper two reviews university education in the knowledge economy and the challenges of accessibility & quality. The third paper discusses the change in enrollment structure toward greater numbers of women and the fourth covers the global hunt for talent and the growth of Internet-based recruiting in Canada. Paper five examines research performance at the top Canadian universities relative to those in the United States. Paper six uses data from the National Graduates Survey to present new evidence on earnings differences by discipline among three cohorts of recent Canadian university graduates. The final two papers estimate economic returns to university education and discuss the implications for tuition policy. Critical commentary on the papers is also included in two separate sections.

Cracks in the Ivory Tower Jason Brennan,Phillip Magness,2019-04-01 Academics extol high-minded ideals, such as serving the common good and promoting social justice. Universities aim to be centers of learning that find the best and brightest students, treat them fairly, and equip them with the knowledge they need to lead better lives. But as Jason Brennan and Phillip Magness show in *Cracks in the Ivory Tower*, American universities fall far short of this ideal. At almost every level, they find that students, professors, and administrators are guided by self-interest rather than ethical concerns. College bureaucratic structures also often incentivize and reward bad behavior, while disincentivizing and even punishing good behavior. Most students, faculty, and administrators are out to serve themselves and pass their costs onto others. The problems are deep and pervasive: most academic marketing and advertising is semi-fraudulent. To justify their own pay raises and higher budgets, administrators hire expensive and unnecessary staff. Faculty exploit students for tuition dollars through gen-ed requirements. Students hardly learn anything and cheating is pervasive. At every level, academics disguise their pursuit of self-interest with high-faluting moral language. Marshaling an array of data, Brennan and Magness expose many of the ethical failings of academia and in turn reshape our understanding of how such high power institutions run their business. Everyone knows academia is dysfunctional. Brennan and Magness show the problems are worse than anyone realized. Academics have only themselves to blame.

Into the Tower Hari Conner,2023-09-19 Full of winding tunnels and fearsome magical traps for intruders, the tower of the reclusive spellbinder princess is usually impossible to breach—apart from tonight. Once every ten years the gates of the Locked Keep open for the masquerade ball, and it's your one chance to get inside. Choose to sneak, charm or fight your way up to the room of confiscated magical objects at the top of her tower, where there is something you desperately want... Welcome to *Into the Tower*, a fantasy heist where the reader chooses their path, trying to make their way through magic, monsters, and perils to the top of the mysterious spellbinder princess's tower. *Into the Tower* expands on the world of *Into the Dungeon*, bringing even more excitement and adventure from award-winning writer and artist Hari Conner. If you survive your journey up the tower, you can find out the secrets of the princess's past and why she locked herself away, become one of the monsters slowly consuming humanity, lose yourself forever in the source of all magic, destroy the world—or even, on the right path, change it for the better.

Lets delve into the realm of top-selling books, exploring the engaging narratives that have captivated audiences this year. **Twr Health Calculator : Colleen Hoover "It Ends with Us"** This poignant tale of love, loss, and resilience has gripped readers with its raw and emotional exploration of domestic abuse. Hoover masterfully weaves a story of hope and healing, reminding us that even in the darkest of times, the human spirit can triumph. **Twr Health Calculator : Taylor Jenkins Reids "The Seven Husbands of Evelyn Hugo"** This spellbinding historical fiction novel unravels the life of Evelyn Hugo, a Hollywood icon who defies expectations and societal norms to pursue her dreams. Reids absorbing storytelling and compelling characters transport readers to a bygone era, immersing them in a world of glamour, ambition, and self-discovery. **Discover the Magic : Delia Owens "Where the Crawdads Sing"** This evocative coming-of-age story follows Kya Clark, a young woman who grows up alone in the marshes of North Carolina. Owens spins a tale of resilience, survival, and the transformative power of nature, captivating readers with its evocative prose and mesmerizing setting. These popular novels represent just a fraction of the literary treasures that have emerged in 2023. Whether you seek tales of romance, adventure, or personal growth, the world of literature offers an abundance of compelling stories waiting to be discovered. The novel begins with Richard Papen, a bright but troubled young man, arriving at Hampden College. Richard is immediately drawn to the group of students who call themselves the Classics Club. The club is led by Henry Winter, a brilliant and charismatic young man. Henry is obsessed with Greek mythology and philosophy, and he quickly draws Richard into his world. The other members of the Classics Club are equally as fascinating. Bunny Corcoran is a wealthy and spoiled young man who is always looking for a good time. Charles Tavis is a quiet and reserved young man who is deeply in love with

Henry. Camilla Macaulay is a beautiful and intelligent young woman who is drawn to the power and danger of the Classics Club. The students are all deeply in love with Morrow, and they are willing to do anything to please him. Morrow is a complex and mysterious figure, and he seems to be manipulating the students for his own purposes. As the students become more involved with Morrow, they begin to commit increasingly dangerous acts. The Secret History is a exceptional and suspenseful novel that will keep you guessing until the very end. The novel is a cautionary tale about the dangers of obsession and the power of evil.
