Txt Me 6y Yevve Eell,2009-05-16 The wait is over! Txt Me 6y (Text Me Sexy) is the world's first complete texting dictionary with acronyms and English-language coded and translated. This reference guide is also the first 'entertainment' dictionary with quizzes, games, tips, tricks, illustrations and pictures on every page, including the very first text story ever written completely in 'text language' with translations to practice new texting skills. This book makes it easy to learn an entirely new, yet evolving language that every person in the household will enjoy. Teens, tweens and college students wonder why the book hasn't come out sooner, adults say they'll use the acronyms to speak to spouses so younger kids won't understand and grandparents want to seem cool when they're texting their grandkids. Txt Me 6y is recommended by the FBI and Police Departments as a safety resource to protect all kids and teens from internet predators. To become a texting genius, this is the only book you'll need.

Multiple Voices in the Translation Classroom Maria González Davies,2004-07-15 The main aim of this book is to provide teaching ideas that can be adapted to different learning environments and that can be used with different language combinations. The pedagogical approach and the activities, tasks and projects are based on Communicative, Humanistic and Socioconstructivist principles: the students are actively involved in their learning process by making decisions and interacting with each other in a classroom setting that is a discussion forum and hands-on workshop. Clear aims are specified for the activities, which move from the most rudimentary level of the word, to the more complicated issues of syntax and, finally, to those of cultural difference. Moreover, they attempt to synthesize various translation theories, not only those based on linguistics, but those derived from cultural studies as well. This volume will be of interest to translation teachers, to foreign language teachers who wish to include translation in their classes, to graduates and professional translators interested in becoming teachers, and also to administrators exploring the possibility of starting a new translation programme.

The task of the translator here is to maintain a delicate balance between the source language and the language of translation. Thing translator is using Google's Translate API's and cloud vision as it was developed by Google as a part of AI experiment. The main reason behind building this application is to help each and every person to know different things in many languages and understand them better.
