High-Speed Networks Jorge Crichigno,Elie Kfoury,Elias Bou-Harb,Nasir Ghani,2022-04-18 This book provides practical knowledge and skills on high-speed networks, emphasizing on Science Demilitarized Zones (Science DMZs). The Science DMZ is a high-speed network designed to facilitate the transfer of big science data which is presented in this book. These networks are increasingly important, as large data sets are now often transferred across sites. This book starts by describing the limitations of general-purpose networks which are designed for transferring basic data but face numerous challenges when transferring terabyte- and petabyte-scale data. This book follows a bottom-up approach by presenting an overview of Science DMZs and how they overcome the limitations of general-purpose networks. It also covers topics that have considerable impact on the performance of large data transfers at all layers: link layer (layer-2) and network layer (layer-3) topics such as maximum transmission unit (MTU), switch architectures, and router's buffer size; transport layer (layer-4) topics including TCP features, congestion control algorithms for high-throughput high-latency networks, flow control, and pacing; applications (layer-5) used for large data transfers and for maintenance and operation of Science DMZs; and security considerations. Most chapters incorporate virtual laboratory experiments, which are conducted using network appliances running real protocol stacks. Students in computer science, information technology and similar programs, who are interested in learning fundamental concepts related to high-speed networks and corresponding implementations will find this book useful as a textbook. This book assumes minimal familiarity with networking, typically covered in an introductory networking course. It is appropriate for an upper-level undergraduate course and for a first-year graduate course. Industry professionals working in this field will also want to purchase this book.

Leading from the Emerging Future C. Otto Scharmer,Katrin Kaufer,2013-07-08 Our Time Is Now We have entered an age of disruption. Financial collapse, climate change, resource depletion, and a growing gap between rich and poor are but a few of the signs. Otto Scharmer and Katrin Kaufer ask, why do we collectively create results nobody wants? Meeting the challenges of this century requires updating our economic logic and operating system from an obsolete "ego-system" focused entirely on the well-being of oneself to an eco-system awareness that emphasizes the well-being of the whole. Filled with real-world examples, this thought-provoking guide presents proven practices for building a new economy that is more resilient, intentional, inclusive, and aware. "A watershed! An inspiring, practical weaving of the inner and outer dimensions of the systemic changes so many around the world are now working toward." —Peter Senge, Senior Lecturer, MIT Sloan School of Management; Founding Chair, Society for Organizational Learning; and author of The Fifth Discipline "Scharmer and Kaufer have succeeded in writing the book that has the potential to transform civilization from one based on a rapacious, ego-driven economics to a viable, ecological, awareness-based model. This is a must-read for anyone who cares. It may well be the single most important book you ever read." —Arthur Zajonc, President, Mind and Life Institute, and author of Meditation as Contemplative Inquiry "Scharmer and Kaufer provide a creative and practical approach to shifting our economies. I see business as a movement, and this book shares that movement with the world, offering us inspiration to tap into the deeper levels of our humanity and urging us to transform the crises of our times." —Eileen Fisher, founder, Eileen Fisher, Inc. "The shift to an eco-system economy is emerging everywhere around us. Otto's and Katrin's clarity in identifying that this shift requires change-makers to expand our thinking from the head to the heart has helped me to be more intentional in designing processes to awaken the hearts of entrepreneurs everywhere. This is a necessary condition for the emergence of the new economy." —Michelle Long, Executive Director, Business Alliance for Local Living Economies "The purpose of business is to enhance the well-being of society. The 4.0 framework for transforming capitalism matters because it addresses a blind spot in our current discourse: how to create institutional innovations that could shift our economy from ego- to eco-system awareness at the scale of the whole." —Guilherme Peirão Leal, founder and Cochairman, Natura Cosméticos

From the second WSS in Las Vegas in 1995, the -rum was held biennially, at Santa Barbara(1997),Austin (1999), Lisbon (2001), San Francisco (2003) and Barcelona (2005). The title of the forum changed to the Symposium on Self-Stabilizing Systems (SSS) in 2003. Since 2005, SSS was run annually, and in 2006 (Dallas) the scope of the conference was extended to cover all safety and security-related aspects of self-* systems. This extension followed the demand for self-stabilization in various areas of distributed c- puting including peer-to-peer networks, wireless sensor networks, mobile ad-hoc networks, robotic networks. To re?ect this change, the name of the symposium changed to the International Symposium on Stabilization, Safety, and Security of Distributed Systems (SSS). This year we received 43 submissions from 13 countries. Most submissions were from the USA and France.
