**The Impact of Tablet PCs and Pen-based Technology on Education** Dave A. Berque, Jane Prey, Robert H. Reed, 2006 The tablet PC and similar pen-based devices are being embraced by a wide variety of disciplines as tools for the radical enhancement of teaching and learning. Deployments of Tablet PCs span all the K-12, higher education, and graduate levels and deal with an amazingly diverse range of subject areas, including geology, writing, mathematics, computer science, Japanese language, physics, engineering, business, economics, and technical communications. Despite the diversity of content areas, many deployments generate a singular passion among students and teachers. In April of 2006, a group of educators gathered to exchange ideas at the First Workshop on the Impact of Pen-based Technology on Education (WIPTE). The editors have selected a subset of papers that were presented at WIPTE for inclusion in this book. The papers have been selected for their broad appeal, diverse content, and insightful evaluations. The collective experiences of these authors will help the reader to identify best practices with regard to the educational use of pen-based computing.

**Tablet Computers in the Academic Library** Rebecca K. Miller, Heather Moorefield-Lang, Carolyn Meier, 2014-02-15 This roundup of the latest discussions on the topic is a relevant prism through which readers can discover ways to improve reference and instructional services at all academic libraries.

**UC Riverside** Cynthia Wild, 2005 Provides a look at the University of California, Riverside from the students' viewpoint.

**Subsurface Utility Engineering Information Management for Airports** James H. Anspach, 2012 This synthesis study is intended to provide airport operators, airport service providers, and utilities/infrastructure owners with ways in which information on subsurface utilities is collected, maintained, and used by airports, their consultants, and the Federal Aviation Administration (FAA) to increase the effectiveness of and enhance safety during infrastructure development programs at airports. It compares the current state of technology and effective processes from other industry sectors with what airports do today, allowing airports to consider areas for improvement. To gather relevant information on current practices, literature was reviewed and 16 airports were surveyed.

**The Impact of Tablet PCs and Pen-based Technology on Education** Robert H. Reed, Dave A. Berque, 2010 A wide variety of disciplines are embracing Tablet PCs and similar pen-based devices as tools for the radical enhancement of teaching and learning. The Workshop on the Impact of Pen-based Technology on Education (WIPTE) was first held in 2006 to leverage this shared passion and to identify best practices in the educational use of pen-based computing. --

**Human Computer Interaction** Cesar Collazos, Andréia Liborio, Cristian Rusu, 2013-11-18 This book constitutes the refereed proceedings of the 6th bi-annual Latin American Conference on Human-Computer Interaction, CLIHC 2013, held in Guanacasta, Costa Rica, in December 2013. The 11 full papers and 14 short papers were carefully reviewed and selected from 32 submissions. The papers address all current topics in HCI such as: cultural issues, assistive technologies, usability, accessibility, multimodal inter-faces, design issues, HCI education, and visualization and evaluation techniques, among others.

**Global Medicine in China** Wayne Soon, 2020-10-20 In 1938, one year into the Second Sino-Japanese War, the Chinese military found itself in dire medical straits. Soldiers were suffering from deadly illnesses, and were unable to receive blood transfusions for their wounds. The urgent need for medical assistance prompted an unprecedented flowering of scientific knowledge in China and Taiwan throughout the twentieth century. Wayne Soon draws on archives from three continents to argue that Overseas Chinese were key to this development, utilizing their global connections and diasporic links to procure much-needed money, supplies, and medical expertise. The remarkable expansion of care and education that they spurred saved more than four million lives and trained more than fifteen thousand medical personnel. Moreover, the introduction of military medicine shifted biomedicine out of elite, urban civilian institutions and laboratories and transformed it into an adaptive field-based practice for all. Universal care, practical medical education, and mobile medicine are all lasting legacies of this effort.

**Roman Coins and Their Values Volume 2** David Sear, 2002-12-31 Volume II now extends coverage of the Imperial series from Nerva, the 'thirteenth Caesar' and first of the 'Adoptive' emperors, down to the overthrow of the Severan dynasty in 235. It encompasses what may justifiably be termed the 'golden age' of the Roman imperial coinage. The full development of the Augustan system of coin denomination and perfection of the method by which government propaganda was communicated to the citizenry through the medium of coinage both reached their peak during these fourteen decades.

**Sisyphus No More** Roger C. Byrd, Harvey McCloud, 2021-01-14 Prisoners released from our bloated American correctional institutions return to a mostly unwelcoming society where they face onerous post-release challenges. No wonder recidivism is near fifty percent, adding tens of billions of dollars annually to the cost of American prisons. Sisyphus No More is a multifaceted argument for increasing prisoner education and training programs to promote the reintegration into society of returning prisoners and increase the likelihood of their securing living-wage jobs. By greatly reducing recidivism, the programs will pay for themselves several times over. Such programs also humanize the treatment of prisoners and help them escape the

fate of Sisyphus, the mythological king condemned to a bitterly repetitive fate. The book has two parts. The first provides background on the American prison system and enumerates the tolls incarceration takes on prisoners, their families, and their communities and the costs released prisoners continue to pay that severely hinder their reintegration. In the second part, the authors set forth compelling psychological, sociological, ethical, and financial grounds for increasing education and training to support the reintegration of released prisoners. The final two chapters report on innovative prison education programs and identify steps toward making education and training a priority in our prisons.

**Confederate Veterans in Northern California** Jeff Erzin,2020-05-26 Drawing on six years of research, this book covers the military service and postwar lives of notable Confederate veterans who moved into Northern California at the end the Civil War. Biographies of 101 former rebels are provided, from the oldest brother of the Clanton Gang to the son of a President to plantation owners, dirt farmers, criminals and everything in between.

**A History of University College, Oxford** Robin Darwall-Smith,2008-06-19 This is the first history in over a century of what is arguably Oxford's oldest College. As one of the few organizations in the UK whose history goes back so far, this is an account of the College from its origins over seven and a half centuries ago to the present day.

**When Judaism Meets Science** Roger L. Price,2019-04-22 This book seeks to confront the challenge that science presents to the traditional pillars of Judaism. It identifies and analyzes a wide variety of issues, including some contemporary sacred cows. First, the book considers what is fact and what is fiction in the primary stories contained in Judaism's foundational texts. Then, drawing on Jewish ethical teachings, it seeks to determine how Judaism and science can inform each other with respect to a broad range of contemporary issues, from abortion and allergies to vaccinations and violence with firearms. Finally, it peeks into the future to address issues that Judaism and science are just now beginning to discuss, such as an exotheology for aliens on distant planets, a Jewdroid who seeks acceptance in a shul, and even the fate of the universe itself. When Judaism Meets Science addresses readers of all persuasions--regardless of denomination and whether a believer or not--as the author builds a case, with specific recommendations, for the value of a reality-based Judaism, one grounded on both traditional ethics and empirical evidence that can resonate with the educated adults of Israel.

**Online Engineering and Society 4.0** Michael E. Auer,Kalyan Ram Bhimavaram,Xiao-Guang Yue,2021-09-19 This book presents the general objective of the REV2021 conference which is to contribute and discuss fundamentals, applications, and experiences in the field of Online and Remote Engineering, Virtual Instrumentation, and other related new technologies like Cross Reality, Data Science & Big Data, Internet of Things & Industrial Internet of Things, Industry 4.0, Cyber Security, and M2M & Smart Objects. Nowadays, online technologies are the core of most fields of engineering and the whole society and are inseparably connected, for example, with Internet of Things, Industry 4.0 & Industrial Internet of Things, Cloud Technologies, Data Science, Cross & Mixed Reality, Remote Working Environments, Online & Biomedical Engineering, to name only a few. Since the first REV conference in 2004, we tried to focus on the upcoming use of the Internet for engineering tasks and the opportunities as well as challenges around it. In a globally connected world, the interest in online collaboration, teleworking, remote services, and other digital working environments is rapidly increasing. Another objective of the conference is to discuss guidelines and new concepts for engineering education in higher and vocational education institutions, including emerging technologies in learning, MOOCs & MOOLs, and Open Resources. REV2021 on Online Engineering and Society 4.0 was the 17th in a series of annual events concerning the area of Remote Engineering and Virtual Instrumentation. It has been organized in cooperation with the International Engineering and Technology Institute (IETI) as an online event from February 24 to 26, 2021.
