Today's London Buses Reiss O'Neill,2021-04-28 Filled with color photos, a look at the variety of London's buses in recent years. Today's London Buses covers the London bus scene of recent years, including pictures of bus types used in the capital on its major services. This volume looks at various routes across London during this period and the variety of vehicles that have been used in that time frame. Some of the services depicted in this book have already changed, or ceased to operate, during the period covered. The author has set out to illustrate, in broad terms, the color and variety of London bus operation during this time of great change to bus services.

Bus services after the Spending Review Great Britain: Parliament: House of Commons: Transport Committee,2011-08-11 The Transport Committee reports that extensive cuts to rural, evening and weekend bus services are damaging the ability of many people - especially the old, young or disabled - to participate in employment, education or voluntary work and to access vital services such as healthcare and retail facilities. In a review of England's bus services (outside London) after the Spending Review, the Committee warns that even deeper cuts in bus services are likely in 2012-13, as local authorities struggle to deal with budgetary reductions, and calls for the concessionary travel scheme to be preserved so that the elderly and disabled continue to enjoy free bus travel. The Committee also concludes that the concessionary fares scheme was 'discriminatory' because it did not apply to most community transport providers - usually independent charities that provide transport such as dial-a-ride bus services. It calls on the Department for Transport to monitor the extent of service cutbacks made this year and to review service provision again after BSOG (Bus Service Operator Grant) grant cuts take effect in 2012 - 13 so that it can analyse and draw conclusions about the wider costs and benefits of its policy changes to the country as a whole. The Local Government Association should identify and disseminate information about good and bad practice in the delivery of cost effective, flexible services including community transport and/or area-based transport integration. And local authorities and commercial operators must consult more widely where services are being changed

The London Bus Guide ,2012

Bus Services Across the UK Great Britain: Parliament: House of Commons: Transport Committee,2006-10-26 Buses are a key local service, but usage has been in decline since the 1950s. The Transport Act 1985 introduced deregulation, but that has failed to reverse that decline. The report examines the particular problems local authorities face in developing and implementing effective bus strategies. It is clear to the Committee that, for many areas, including all major metropolitan areas outside London, the current regime is not working. The Committee recommends more flexibility, and is particularly attracted by Quality Contracts. These would replace open competition with a licensed regime. Operators bid for exclusive rights to run bus services on a route or group of routes, on the basis of a local authority service specification. Independent Traffic Commissioners are another development that the Committee welcomes, and would like to see them have a higher profile and more resources and powers, especially to enforce Quality Contracts and penalise operators who do not meet their obligations. Others areas covered in the report are: securing socially necessary services outside the PTAs; congestion and bus priority; concessionary fares; and the image of the bus.

Airport Marketing Nigel Halpern,Anne Graham,2013-06-19 In recent years, the airport sector has moved from an industry characterised by public sector ownership and national requirements, into a new era of airport management which is beginning to be dominated by the private sector and international players. Airports are now complex enterprises that require a wide range of business competencies and skills to meet the needs of their users, just as with any other industry. Moreover, deregulation of air transport markets has made the airport sector much more competitive and given airports greater incentives to develop innovative, proactive and aggressive marketing strategies so that they can reap the benefits from these developments. New types of airline business model, such as low cost carriers, have emerged through deregulation, which in many cases require a completely different approach to be adopted by airport marketers and have encouraged a further deviation from past practice. The travelling public is also becoming more experienced and is generally placing greater demands on the airport operator to deliver a quality product at a time when more stringent controls, especially as regards security, have been introduced. This accessible book fills an important need for an up-to-date, comprehensive and in-depth textbook that introduces students and practitioners to the principles and practice of airport marketing as well as the major changes and future marketing challenges facing the airport sector. It applies principles of marketing within the airport industry, and examines airport marketing and its environment, how to define and measure the market for airport services, airport marketing planning, and individual elements of the airport marketing mix (product, price, promotion and distribution). The book integrates key elements of marketing theory with airport marketing in practice. Each chapter contains extensive industry examples for different types of airports from around the world to build on the theoretical base of the subject and show real-life applications. The dynamic nature of the airport industry requires students and practitioners to have a thorough, up-to-date and contemporary appreciation of airport marketing issues and challenges. This comprehensive, accessible textbook written by two airport marketing experts satisfies this need and is essential reading for air transport students and future managers.
