Clinical Teaching Made Easy Judy McKimm, Tim Swanwick, 2013-02-26 Increasingly, nurses and other health professionals are required to teach doctors, trainees and medical students. This book also helps to contextualise learning and provide practical tips for teaching in the clinical context for all health professionals. The book will be useful for clinical teachers at whichever stage of career as it covers all areas of health professions' education in an easy to follow style. It provides a theoretical basis to how clinical teaching and learning might be carried out and draws on the experience of well-regarded clinical teachers to highlight practice points. All aspects of clinical teaching and learning, appraisal, supervision and career development are included. This book is written in an easy to follow format with short chapters, sections, diagrams and practice points. The theory is always related to teaching practice in the clinical context.

Teaching Made Easy Kay Mohanna, David Wall, Elizabeth Cottrell, Ruth Chambers, 2023-05-22 The fourth edition of this highly respected book builds on the excellent reputation of its predecessors. Fully revised and updated throughout, it continues to provide essential structure, support, guidance and tips for both beginning and experienced teachers and their managers, both in the UK and internationally. Pitched at an introductory level with an emphasis on practical tips and application of theory, rather than focussing heavily on scholarly research, its content is designed to be relevant and inclusive to all healthcare disciplines. Key points are highlighted

by the inclusion of tips from experienced teachers in each chapter, while throughout chapters reflect contemporary concepts and key approaches, including teaching styles, curriculum development, e-learning, virtual learning environments, leadership and professionalism. Teaching Made Easy, 4E will continue to benefit everyone teaching health professionals at all levels, from general practitioners and hospital doctors, nurses in primary and secondary care, and professionals allied to medicine and health service managers, and will also support the development of colleagues in new roles such as physician associates, FCPs and newer nursing associates.

The Tailored Brain Emily Willingham, 2021-12-14 A candid and practical guide to the new frontier of brain customization. Dozens of books promise to improve your brain function with a gimmick. Lifestyle changes, microdosing, electromagnetic stimulation: just one weird trick can lightly alter or dramatically deconstruct your brain. In truth, there is no one-size-fits-all shortcut to the ideal mind. Instead, the way to understand cognitive enhancement is to think like a tailor: measure how you need your brain to change and then find a plan that suits it. In *The Tailored Brain*, Emily Willingham explores the promises and limitations of well-known and emerging methods of brain customization, including prescription drugs, diets, and new research on the power of your “social brain.” Packed with real-life examples and checklists that allow readers to better understand their cognitive needs, this is the definitive guide to a better brain.

Changing Contexts in Spatial Planning Janice Morphet, 2018-12-07 This book considers the major forces that have emerged to reshape planning following 2010, including national infrastructure project delivery, the Localism Act (2011) and neighbourhood planning. This period also saw the introduction of the replacement of regional plans by new strategic sub-regional approaches in combined local authorities for functional economic areas. All of this is set within the UN’s New Urban Agenda, Brexit, the changing programme for the EU post 2021 and the likely effects that these will have on UK planning practice. There is also a discussion on the evolving planning policies in Scotland, Wales and Northern Ireland and the ways in which the UK nations are beginning to work together more closely and with Ireland, Jersey, Guernsey and the Isle of Man through the spatial planning group in the British-Irish Council. Although primarily focused on the UK, the text sets some of the policy discussions in a wider international context including agreements on the environment and the emerging alignment of governance and economies in newly recognised sub-regional spaces. It follows *Effective Practice in Spatial Planning* (2011), which addressed the developments in planning in the UK between 2004 and 2010, and discusses the major changes in all aspects of planning policy in the following period.

Leading and Managing Healthcare Neil Gopee,2022-03-02 This textbook has been created to support the journey from emerging registered healthcare professional through to becoming a competent frontline care setting manager. It considers the seminal theories and research into leadership and management and places them firmly into the healthcare context providing the reader with thorough and robust guidance in the application of the knowledge base in the subject area. Key features: Integration of theory and practice using Action Points and case studies throughout Includes perspectives from a wide range of healthcare settings and professional groups Each chapter includes 'Guidance on good practice' showing what high-quality care and effective change looks like Written by a vastly experienced author, practitioner and educator, this latest book from Neil Gopee is essential reading for nursing, health and social care students taking modules on leadership, management and transition to practice in their final year. It is also ideal for newly qualified professionals or those moving into band 5 or 6 roles with managerial responsibilities.

Integrative Wellness Coaching Laurel Alexander,2022-09-21 By presenting a holistic and integrated health and wellbeing approach to personalised care through wellness coaching, this handbook provides theory, insights, best practice, case studies and CPD activities in order to deepen practitioners' knowledge and experience. Integrative wellness is about working in collaboration and is a partnership between the professional and the patient with the latter understanding that they can take as much control as is possible for their own health and wellbeing. This book helps form this collaboration by exploring the co-creation of personalised care plans, effective coaching skills and cognitive-behavioural interventions including motivational coaching for patient activation, as well as flexible ways to provide wellness coaching. Exploring how the mind-body connection can improve the patient's journey, Integrative Wellness Coaching is an invaluable guide for any healthcare practitioner who wants to embrace their patients' lifestyle choices and mindsets towards their own health.

Case II October 2021 David Gomadza/Tomorrow's World Order vs NHS and its doctors David Gomadza,2021-10-16 When the system is so crooked and injustice runs rampant. When fierce nationalism obstructs the course of justice. But its only a matter of time before logic sets in. Fighting secret evil systems still rooted in slavery and oppression. Part II But just the beginning of Tomorrow's World Order.

Revalidation Ruth Chambers,Gill Wakley,Alison Magnall,2018-04-19 This won't hurt a bit...How do you show that you consistently provide high quality clinical care both as an individual doctor and member of a team? How do you provide convincing evidence of your performance that justifies you as being fit to practise? And how do you achieve this in a way that is not too burdensome?Revalidation will now be more stringent than ever. You might need help gathering information so that your evidence is sufficiently robust and objective, presenting it so that addresses the fields in the General Medical Council's document. You'll need to make sure you match your portfolio with what is expected in your specialty area.This book helps you to sustain your energy in gathering and reviewing evidence of your day-to-day performance at work so that you are recertified and relicensed with ease, whatever future revisions are made to the revalidation process. By suggesting proactive and structured methods, this book offers easy to comprehend ways to guide you through the evidence cycle, with many examples in both clinical and non-clinical fields. It is ideal for primary care and hospital doctors preparing for revalidation, including trainee doctors. Appraisers, and trainee appraisers in trusts, deaneries or general practice will find the guidance invaluable, as will appraisal leads in healthcare organisations and those with responsibility for quality assurance of appraisal as part of clinical governance or regulation.

Foundations of Adult Nursing Dianne Burns,2023-11-29 Covering the issues, themes and principles that explain what it means to be a nurse today, this book provides the theory you need to know and applies it to the diverse patient groups and settings that you will encounter on your placements. Key features of the book are: · Introduces the core aspects of adult nursing · An evidence-based approach with discussion of literature, policy and research and suggested further reading for every chapter · Over 30 case scenarios to help you understand the realities of practice across a range of settings including primary care and the community · Activity boxes which challenge assumptions and encourage reflection The book has been closely developed in line with the latest NMC Standards and Essential Skills Clusters and supports you across your entire degree programme as you develop into nurses of the future ready to deliver and lead care.

Clinical Surgery Made Easy Mohan de Silva,2008-09-01 This book aims to supplement the reader's clinical experience with a carefully designed series of commonly encountered clinical problems in general surgery to simulate the clinical decision-making approach. Each clinical topic includes: a problem-solving approach; system-based essential core knowledge; concise explanations of relevant basic sciences; management pathways (based on the most up-to-date guidelines); FAQs; self-assessment (EMQs, SBAs, T/F). This book, primarily aimed at undergraduates and junior doctors, will guide and stimulate the reader to recognise, recall and apply the relevant facts to given clinical situations and also enhance success at clinical examinations. Standard textbooks can be daunting. This book is different. I believe that students and young doctors will find this an easy read and will be able to translate the scenarios into an understanding of how clinical pathways are constructed. By asking questions through the pathways students are encouraged to develop their own ideas - a form of problem-based learning rather than learning by rote. Retention of facts is so much easier when they form part of a story. David Cade FRCS, Consultant Surgeon

Addressing the Environmental Impact of Government Procurement Great Britain. National Audit Office,2009 In 2005 the government set a target to be recognised by 2009 as one of the leaders in the EU in sustainable procurement, and this report finds that government has strengthened its drive to purchase more environmentally sustainable goods and services. The NAO reviewed actions taken by the Office of Government Commerce (OGC) and five of the largest spending departments and finds that some have introduced initiatives which are reducing environmental impact and in some cases also saving money. Government has yet to set quantifiable targets for departments, who instead assess their progress in embedding sustainable procurement practices against the Flexible Framework model. According to their self-assessments for 2007-08, 8 out of 22 departments reported that they are only at level one of the Framework (out of five) indicating that they have laid only the foundations of good practice. Of the departments that the NAO examined, only the NHS Purchasing and Supply Agency (NHS PASA) reported that it is practising sustainable procurement across its business, although the DWP is close to achieving the same level. The government has also set itself mandatory minimum environmental standards for the procurement of goods - Quick Wins. In 2007-08, 15 out of 21 departments reported that they were compliant with these standards, although six of these 15 did not have systems to measure their compliance. Methods of assessing environmental costs and benefits are complex and hence expensive, and are not being used frequently by departments. The Office of Government Commerce needs to clarify how these evaluation methods should be used.

Supporting Self Care in Primary Care Ruth Chambers, Gill Wakley, Alison Blenkinsopp, 2018-08-08 Self care is about people's attitudes and lifestyle, as well as what they can do to take care of themselves when they have a health problem. Supporting self care is about increasing people's confidence and self esteem, enabling them to take decisions about the sensible care of their health and avoiding triggering health problems. Although many people are already practising self care to some extent, there is a great deal more that they can do. - Ruth Chambers, Gill Wakley and Alison Blenkinsopp, in the Preface. Designed around the Department of Health's Working in Partnership Programme, this book is full of easy-to-implement advice for everyday use, promoting a positive approach to self care and demonstrating how smoothly it can be introduced and undertaken. Supporting Self Care in Primary Care encourages interactive professional learning and development, both individually and within a team, and highlights the importance and benefits of self care in the workplace. It is a self-contained text with tools and illustrative examples to aid comprehension, and includes a complementary web resource containing further tools and a training package. All healthcare professionals involved in commissioning or providing primary care to patients will find this practical guide invaluable, as will healthcare managers and health promotion specialists.

Easy Paediatrics Rachel U Sidwell, Mike A Thomson, 2011-05-27 Written by the same author team as the successful and well-regarded Concise Paediatrics for postgraduates, Easy Paediatrics is a textbook specifically written for medical students. Easy Paediatrics is structured in a systems-based fashion, with additional chapters on subjects such as history and examination, development, genetics, emergencies and surgery. The material is presented logically with presentations, clinical findings, investigations and management options, and useful boxes covering differential diagnoses, causes and complications are also included to complete the picture. Clinical photographs and illustrative diagrams are provided throughout to help the student visualise what they are reading about, and the book is enhanced by a companion website, which contains OSCE-style clinical scenarios and MCQs for all the body systems, so the reader can test what they have learned. Presented in an easy-to-remember style, Easy Paediatrics gives the medical student everything they need to succeed in their paediatrics modules, without bombarding them with excess knowledge that will not be covered in their exams.

Self-Evaluation in the Global Classroom John MacBeath, Hidenori Sugimine, 2003-09-02 Self-evaluation is going global. This book describes what happened when teams of school students from across the world embarked on the trip of a lifetime to explore the school lives of their international contemporaries. The students involved in The Learning School project used a variety of tools to evaluate the learning, motivation and self-evaluation abilities of school students in the UK, Sweden, Japan, Germany, the Czech Republic, South Africa and South Korea. From the easy freedom of the Swedish school to the highly structured day in the Czech Republic, this study shows that success and effectiveness in education really is in the eye of the beholder. The results of this study have significant

implications for school leaders and managers, policy makers and academics, and all those concerned with school improvement. This lively and accessible book makes intriguing and important reading, raising fundamental questions about how we judge quality and effectiveness in teaching and learning.
