International Financial Statistics provides a complete library of continuously updated international statistics on all aspects of international and domestic finance. The monthly print edition contains over 1,000 pages of statistical data in each issue. It reports, for most countries of the world, current data needed in the analysis of problems of international payments and of inflation and deflation, i.e., data on exchange rates, international liquidity, money and banking, interest rates, prices, production, international transactions, government accounts, and national accounts. Information is presented in country tables and in tables of area and world aggregates.

IFS Supplement on Monetary and Financial Statistics

International Monetary Fund. Statistics Dept.,2014-07-01

In this special quarterly supplement to the International Financial Statistics, the IMF is publishing the monetary statistics for those member countries that have commenced the reporting, on a regular basis, of monetary data that accord with the methodology in the IMF's Monetary and Financial Statistics Manual (MFSM), 2000. The format of monetary data reported in the European Central Bank's (ECB) framework, though like the Standardized Report Forms (SRF) format, is designed to accommodate the additional disaggregation required by the ECB. Countries implementing the ECB's monetary data framework include those that belong to European Economic and Monetary Union (Euro Area), several other

members of the European Union, and other European countries that have adopted the ECB's framework. Additional countries will be included in future issues of this Supplement, as more countries implement the reporting of SRF-based data. The Supplement will continue to be published until implementation of the SRF-based reporting has been completed by most member countries.
