This guide tells you where to look, how to buy from different sources and, perhaps most interesting of all, how to use eBay as a source of goods. New for the fourth edition: -- Understand and work with the new seller defect process. -- Take best advantage of recent developments and turn them into hard cash. -- Maximise your selling potential across all media, including mobile. -- How to work with the latest eBay fee structure, so you retain the most of your revenue. -- Share in the knowledge gleaned from over 100,000 eBay transactions. Discover how the author went from zero to over 53,000 positive feedbacks (and counting). From the very first LP record to the family car, he has sold items into almost every corner of the globe and taken every form of payment known to man. Anybody can do this, just follow the

simple steps in this guide, dedicate the time, and soon you too could be living the eBay dream.

Reforming the Postal Sector in the Face of Electronic Competition Anheuser-Busch,2013-01-01 'Professors Crew and Kleindorfer have once again assembled a valuable collection of essays that address timely and important issues in postal sectors throughout the world. The essays employ diverse methodologies to provide useful insights about recent and likely future developments in the postal industry. This book will be a valuable resource for researchers, industry practitioners, and policymakers alike.' – David E.M. Sappington, University of Florida, US In our increasingly technology-focused world, demand for traditional postal services is steadily shrinking. This timely volume examines the many challenges that the worldwide postal sector is facing as a result of growing electronic competition, and offers expert recommendations for reshaping postal structures to strengthen their competitiveness in an electronic age. Drawn from a selection of papers presented at the 20th Conference on Postal and Delivery Economics in Brighton, UK, this book showcases expert contributions on the rapidly changing postal sectors in both the United States and Europe. Topics discussed include the various financial challenges posed by decreasing demand for postal services, recent changes in how postal services are provided, and new structures and modes of operation, such as privatization, that are currently affecting the industry. Contributors offer a thorough breakdown of the issues as well as ideas for keeping the postal sector alive in a world that is growing ever more reliant on purely electronic means of communication. Economists with an interest in regulatory economics, innovation and public sector economics will find this volume useful and informative, as will institutional libraries and industry professionals.

Reducing CO2 and other emissions from shipping Great Britain: Parliament: House of Commons: Environmental Audit Committee, 2009-06 The emission of greenhouse gases from shipping is a serious problem for international climate change policy and they cannot be allowed to grow uncontrolled. The International Maritime Organization (IMO) has estimated that international shipping was responsible for annual emissions of around 843 million tonnes of carbon dioxide (MtCO2) in 2007, or around 3 per cent of total man-made carbon emissions. This report follows up an earlier inquiry (Reducing carbon emissions from transport, HC 981-I, 9th report of session 2005-06, ISBN 9780215030412) and examines what efforts the Government is making in three main respects: (a) negotiations to tackle shipping emissions at an international level (within the IMO, the UN Framework Convention on Climate Change and the EU); (b) measures by which the UK is to take into account its share of international shipping emissions in domestic carbon budgets (through the Climate Change Act 2008); and (c) support in the UK for operational improvements and technological R&D aimed at reducing emissions from shipping. Very little progress has been made at the international level. A lack of urgency shown by industrialised nations and blocking actions by developing economies share the blame. The Government admits that the current calculation of the UK's share of international shipping emissions is an underestimate and should consult on how to improve the methodology it uses to calculate the UK's share of international shipping emissions. Government support for research and development should focus on technologies that can be retrofitted to existing ships, and offer a genuine alternative to fossil fuels, such as hydrogen fuel cells. There should be drastic acceleration of R&D into low- and zero-carbon propulsion systems.

Postal Strategies Pier Luigi Parcu, Timothy J. Brennan, Victor Glass, 2023-04-25 This edited book includes original essays by prominent researchers and practitioners in the field of postal and delivery economics, originally presented at the 30th Conference on Postal and Delivery Economics held in Rimini, Italy, May 25–27, 2022. The central foci of the book are the role of digital platforms in the postal sector and the impact of vertically integrated firms in delivery markets. Other important topics include the regulation of parcels and their environmental footprint, in light of the innovations affecting the so-called last mile, and the effects of the COVID-19 pandemic on the postal sector, on both the global and local levels. Chapters also discuss traditional topics for postal and delivery sectors, including postal costs, the funding of Universal Service Obligation (USO) and the related role of Universal Service Providers. This book is a useful tool not only for graduate students and professors interested in postal and regulatory economics but also for postal administrations, consulting firms, and federal government departments.
