Guidebook for Evaluating Airport Parking Strategies and Supporting Technologies ,2009 This guidebook presents various parking strategies and technologies that are employed, or have potential applications, at airports in the United States. This guidebook will assist airport operators in (1) determining their specific goals as they relate to public parking and their customer needs; (2) gaining an understanding of the parking strategies and technologies that correspond to their goals; and (3) evaluating benefits, costs, and implementation. With parking as the primary source of non-airline revenue at airports, and usually the customer's first and last experience with the airport, it is an important focus in an airport's overall strategic plan. ACRP Report 24 provides - in a single source - a buffet of parking strategies and technologies to complement and achieve airport operators' long-term goals and objectives. This guidebook will be useful to airport parking owners and operators, and their consultants, as they strive to better accommodate the needs of their customers, improve customer service, increase operational efficiency, and enhance net revenues.

Handbook to Assess the Impacts of Constrained Parking at Airports Ricondo & Associates,2010 TRB's Airport Cooperative Research Program (ACRP) Report 34: Handbook to Assess the Impacts of Constrained Parking at Airports explores different types of parking constraints that airports experience and highlights tools to assess the impacts of the constraints and strategies to deal with them. The handbook includes a predictive modeling tool in a CD-ROM format designed to help determine the effects of implementing various parking strategies. The CD is also available for download from TRB's website as an ISO image.

Exploring Airport Employee Commute and Parking Strategies Diane M. Ricard,2012 Airport employees are vital to the operation of an airport. They staff the airport on a daily basis from well before the first flight operation until after the last flight operation, which at many airports is 24 hours a day, 365 days a year. Airport employees generate a significant number of vehicle trips to and from the airport each day, which impacts air quality, airport traffic conditions, and traffic in the communities surrounding the airport and on the freeway system. The purpose of this report was to determine what is known about airport employee commute patterns and commute modes, what programs are being offered to airport employees by the airport operator or a transportation management association (TMA) to provide them with alternatives to the drive alone commute to work, how progress is being monitored, what is known about the effectiveness of airport employee commute options (ECO) programs, what the challenges are for the providers of such programs, and to research some ECO programs offered by non-airport employers for program elements that may have applicability in the airport environment. This report was accomplished through a literature search of airport employee commute programs, commute programs offered by non-airport employers that may have applicability in the airport environment, and through interviews with four U.S. and one U.K. airport operators (of 16 airports and 3 TMAs identified, 84 percent interviewed) that offer comprehensive airport ECO programs. Each of the five case studies provides an example of how ECO strategies are applied in the airport environment.

Repairing and Maintaining Airport Parking Structures While in Use K. Nam Shiu,Kurt L. Salm,Jonathan Beckstrom,2013 TRB's Airport Cooperative Research Program (ACRP) Synthesis 47: Repairing and Maintaining Airport Parking Structures While in Use provides information on developing and implementing successful maintenance and repair strategies for in-use airport parking structures that involve the least impact on the airport patrons, revenue stream, and facility operations-- Publisher's description.

Green and Intelligent Technologies for Sustainable and Smart Asphalt Pavements Xueyan Liu,Kumar Anupam,Sandra Erkens,Lijun Sun,Jianming Ling,2021-11-25 Green and Intelligent Technologies for Sustainable and Smart Asphalt Pavements contains 124 papers from 14 different countries which were presented at the 5th International Symposium on Frontiers of Road and Airport Engineering (IFRAE 2021, Delft, the

Netherlands, 12-14 July 2021). The contributions focus on research in the areas of Circular, Sustainable and Smart Airport and Highway Pavement and collects the state-of-the-art and state-of-practice areas of long-life and circular materials for sustainable, cost-effective smart airport and highway pavement design and construction. The main areas covered by the book include: • Green and sustainable pavement materials • Recycling technology • Warm & cold mix asphalt materials • Functional pavement design • Self-healing pavement materials • Eco-efficiency pavement materials • Pavement preservation, maintenance and rehabilitation • Smart pavement materials and structures • Safety technology for smart roads • Pavement monitoring and big data analysis • Role of transportation engineering in future pavements Green and Intelligent Technologies for Sustainable and Smart Asphalt Pavements aims at researchers, practitioners, and administrators interested in new materials and innovative technologies for achieving sustainable and renewable pavement materials and design methods, and for those involved or working in the broader field of pavement engineering.

ACRP Report 24 Transportation Research Board, 2010

Achieving Airport-compatible Land Uses and Minimizing Hazardous Obstructions in Navigable Airspace Jocelyn Waite, 2012 This report discusses airport compatible land use requirements, the legal issues related to achieving airport compatible land use, and legal issues particular to eliminating hazardous obstructions to airspace. The report concludes by reviewing the major legal issues of concern in achieving airport-compatible land use. While general legal principles relevant to airport land use are well established, they are often applied on a case by case basis, particularly in the context of regulatory takings and inverse condemnation. This ad hoc analysis introduces, if not an element of unpredictability, at least some variation in the law by jurisdiction. The need for greater predictability highlights the significance of including airport zoning as part of comprehensive land use planning. This report should be helpful to airport administrators, attorneys, board members, financial officers, community members in the vicinity of airports, realtors, and city and county zoning officials.

Rethinking Airport Parking Facilities to Protect and Enhance Non-aeronautical Revenues InterVISTAS Consulting Inc, Walker Consultants, Jones Lang LaSalle (Firm), Innovat International, DWU Consulting, 2021 Ongoing and emerging shifts in customer ground access behavior, resulting from the growing use of transportation network companies (TNCs) and the eventual adoption of emerging technologies, are posing a significant challenge to the reliance of airports on parking revenue. The TRB Airport Cooperative Research Program's ACRP Research Report 225: Rethinking Airport Parking Facilities to Protect and Enhance Non-Aeronautical Revenues is a guidance document that identifies near-term and long-term solutions to help airports of all types and sizes repurpose, renovate, or redevelop their parking facilities to address the loss of revenue from airport parking and other ground transportation services.

Wireless Networking and Mobile Data Management R.K. Ghosh, 2017-04-20 This book examines two main topics, namely, Wireless Networking and Mobile Data Management. It is designed around a course the author began teaching to senior undergraduate and master's students at the Department of Computer Science & Engineering of the Indian Institute of Technology Kanpur. The first part of the book, consisting of eight chapters, including the introduction, focuses exclusively on wireless networking aspects. It begins with cellular communication systems, which provided the foundation of wireless networking principles. Three subsequent chapters are devoted to the Global System for Mobile communication (GSM), Wireless Local Area Network (WLAN), Bluetooth, infrared (IR), ZigBee and 6LoWPAN protocols. There is also a chapter on routings in ad hoc networks, an area that is currently being intensively researched due to its potential applications in areas of vehicular network, traffic management, tactical and military systems. Furthermore, the book discusses mobile operating systems and wireless network application level protocols such as Wireless Application Protocols (WAP), Mobile IP and Mosh. The second part highlights mobile data management. It addresses the issues like location

management, the importance of replication and caching in mobile environments, the concept of broadcast disk and indexing in air, storage systems for sharing data in mobile environments, and building smart environments. Given that the design of algorithms is the key to applications in data management; this part begins with a chapter on the type of paradigm shift that has been introduced in the design of algorithms, especially due to asymmetry in mobile environments. Lastly, the closing chapter of the book explores smart environments, showing the readers how wireless technology and mobile data management can be combined to provide optimum comfort for human life. Though the book has been structured as a monograph, it can be used both as a textbook and as a reference material for researchers and developers working in the area.

Limited Liability Entities Bradley T. Borden, Robert J. Rhee, 2012-05-17 The foremost authority on state laws governing limited liability companies, limited partnerships, and limited liability partnerships. This resource covers choice of entity, formation, admission, dissociation, dissolution, wind up, tax treatment; statutory and case sources are brought together in an accessible manner. By Bradley T. Borden, Robert J. Rhee *Limited Liability Entities: State by State Guide to LLCs, LPs and LLPs* is the country's foremost authority on the state laws governing limited liability companies, limited partnerships, and limited liability partnerships. It contains expert analysis and commentary by two of the nation's most renowned experts in this area of the law and compiles statutory and case sources in an accessible manner. Authors Bradley Borden and Robert Rhee provide seven annual updates to this product, making it the most timely and comprehensive work of its kind. Volume 1 provides a comprehensive overview of limited liability entities. It begins with a detailed review of the history and evolution of limited liability entities. It then provides an in-depth examination of the general state-law principles that govern limited liability entities, using the uniform limited liability entity laws as a basis for the discussion. Volume 1 also provides comprehensive coverage of the tax treatment of limited liability entities. Starting with Volume 2, the treatise provides in-depth coverage of the respective state laws that govern limited liability entities. For each state, the treatise provides commentary about the state law, including discussion of relevant case rulings. In these commentaries and when appropriate, comparisons are made to other state law and the uniform laws. These volumes also reproduce the relevant state laws that govern limited liability entities. Volume 2 covers the states of Alabama through Colorado Volume 3 covers the states of Connecticut through Hawaii Volume 4 covers the states of Idaho through Kentucky Volume 5 covers

the states of Louisiana through Minnesota Volume 6 covers the states of Mississippi through New Hampshire Volume 7 covers the states of New Jersey through Ohio Volume 8 covers the states of Oklahoma through South Dakota Volume 9 covers the states of Tennessee through Vermont Volume 10 covers the states of Virginia through Wyoming
