Proceedings of the XVII International symposium Symorg 2020 Dušan Starčević, Sanja Marinković, 2020-06-30 Ever since 1989, the Faculty of Organizational Sciences, University of Belgrade, has been the host of SymOrg, an event that promotes scientific disciplines of organizing and managing a business. Traditionally, the Symposium has been an opportunity for its participants to share and exchange both academic and practical knowledge and experience in a pleasant and creative atmosphere. This time, however, due the challenging situation regarding the COVID-19 pandemic, we have decided that all the essential activities planned for the International Symposium SymOrg 2020 should be carried out online between the 7th and the 9th of September 2020. We are very pleased that the topic of SymOrg 2020, "Business and Artificial Intelligence", attracted researchers from different institutions, both in Serbia and abroad. Why is artificial intelligence a disruptive technology? Simply because "it significantly alters the way consumers, industries, or businesses operate." According to the European Commission document titled Artificial Intelligence for Europe 2018, AI is a key disruptive technology that has just begun to reshape the world. The Government of the Republic of Serbia has also recognized the importance of AI for the further development of its economy and society and has prepared an AI Development Strategy for the period between 2020 and 2025. The first step has already been made: the Science Fund of the Republic of Serbia, after a public call, has selected and financed twelve AI projects. This year, more than 200 scholars and practitioners authored and co-authored the 94 scientific and research papers that had been accepted for publication in the Proceedings. All the contributions to the Proceedings are classified into the following 11 sections: Information Systems and Technologies in the Era of Digital Transformation Smart Business Models and Processes Entrepreneurship, Innovation and Sustainable Development Smart Environment for Marketing and Communications Digital Human Resource Management Smart E-Business Quality 4.0 and International Standards Application of Artificial Intelligence in Project Management Digital and Lean Operations Management Transformation of Financial Services Methods and Applications of Data Science in Business and Society We are very grateful to our distinguished keynote speakers: Prof. Moshe Vardi, Rice University, USA, Prof. Blaž Zupan, University of Ljubljana, Slovenia, Prof. Vladan Devedžić, University of Belgrade, Serbia, Milica Đurić-Jovičić, PhD, Director, Science Fund of the Republic of Serbia, and Harri Ketamo, PhD, Founder & Chairman of HeadAI ltd., Finland. Also, special thanks to Prof. Dragan Vukmirović, University of Belgrade, Serbia and Prof. Zoran Ševarec, University of Belgrade, Serbia for organizing workshops in fields of Data Science and Machine Learning and to Prof. Rade Matić, Belgrade Business and Arts Academy of Applied Studies and Milan Dobrota, PhD, CEO at Agremo, Serbia, for their valuable contribution in presenting Serbian experiences in the field of AI. The Faculty of Organizational Sciences would to express its gratitude to the Ministry of Education, Science and Technological Development and all the individuals who have supported and contributed to the organization of the Symposium. We are particularly grateful to the contributors and reviewers who made this issue possible. But above all, we are especially thankful to the authors and presenters for making the SymOrg 2020 a success!

Banking in the Age of the Platform Economy Giorgio Bou-Daher, 2023-05-22 The 2008 global financial crisis and the concurrent rise of the platform economy have had profound effects on the banking sector. Over the past decade and a half, banking leaders have had to contend with rapidly evolving regulatory, technological, and competitive forces. The pace of technological change has been formidable with advances in artificial intelligence, cloud computing, and blockchain technology. These forces have brought to the forefront new managerial imperatives that banking leaders have to make sense of as they strategise in light of these unfolding new realities. Banking in the Age of the Platform Economy explores the strategies that managers and leaders at banks and other financial institutions have adopted in response to the rise of the platform economy, the new forces of interdependence that it entails, and the risks/opportunities involved in cocreating value with external stakeholders. With its discussion of the strategies of interdependence and value cocreation that the top twenty banks in Europe adopted between 2008 and 2019, this book is essential reading for academics, banking and fintech professionals, and management consultants that advise banks and fintechs.

Encyclopedia of E-Commerce Development, Implementation, and Management Lee, In, 2016-03-31 The convenience of online shopping has driven consumers to turn to the internet to purchase everything from clothing to housewares and even groceries. The ubiquity of online retail stores and availability of hard-to-find products in the digital marketplace has been a catalyst for a heightened interest in research on the best methods, techniques, and strategies for remaining competitive in the era of e-commerce. The Encyclopedia of E-Commerce Development, Implementation, and Management is an authoritative reference source highlighting crucial topics relating to effective business models, managerial strategies, promotional initiatives, development methodologies, and end-user considerations in the online commerce sphere. Emphasizing emerging research on up-and-coming topics such as social commerce, the Internet of Things, online gaming, digital products, and mobile services, this multi-volume encyclopedia is an essential addition to the reference collection of both academic and corporate libraries and caters to the research needs of graduate-level students, researchers, IT developers, and business professionals. .

Challenges and Opportunities in the Digital Era Salah A. Al-Sharhan, Antonis C. Simintiras, Yogesh K. Dwivedi, Marijn Janssen, Matti Mäntymäki, Luay Tahat, Issam Moughrabi, Taher M. Ali, Nripendra P. Rana, 2018-10-23 This book constitutes the refereed conference proceedings of the 17th IFIP WG 6.11 Conference on e-Business, e-Services and e-Society, I3E 201, held in Kuwait City, Kuwait, in October/November 2018. The 65 revised full papers presented were carefully reviewed and selected from 99 submissions. Topics of interest include, amongst others, the following: social media; information systems; marketing and communications; management and operations; public administration; economics, sociology, and psychology; e-finance, e-banking, and e-accounting; computer science and computer engineering; and teaching and learning.

Beyond Multi-Channel Marketing Maria Palazzo, Pantea Foroudi, Alfonso Siano, 2020-06-17 Delving into the rapidly developing field of dual marketing, investigating the strategic alliances, multi-stakeholder perspectives and branding potential it holds, this book promotes the adoption of the multichannel approach which is fundamental to facing the challenges of marketing 4.0.

FinTech, BigTech and Banks Alessandra Tanda, Cristiana-Maria Schena, 2019-07-30 This Palgrave Pivot analyses the evolution of strategies and business models adopted by financial operators that employ technological solutions to deliver financial products and services. The analysis is performed on a proprietary dataset built on different

sources that highlight important differences in strategical approaches taken by FinTech companies, TechFin and BigTech, and banks (traditional and digital native). For each type, the authors underline their distinctive patterns, strengths and weaknesses. The main focus of the analysis is on the European market that is investigated also in the light of the difference and similarities with other markets (such as US and China). The unbundling and re-bundling of productive processes in finance, the treatment of information and the level of innovation in the customer relationship highlight the intense change that the banking activities of new financial services providers are currently dealing with, especially the retail segment. Despite the main international banks' implementation of innovative strategical approaches to take advantage of the digitalization of business and cope with competition, so far the level of the disruption brought by FinTech is not fully understood or widespread. This holds especially true for the smaller banks: the latter need to take a proactive approach to individuate a business model able to satisfy the new customer needs and the competitive pressure that are destined to increase and further evolve. This book addresses this and would appeal to academics, researchers and students of banking, FinTech and financial innovation alongside policy makers, regulatory authorities, FinTechs and banks.

AI*IA 2017 Advances in Artificial Intelligence Floriana Esposito, Roberto Basili, Stefano Ferilli, Francesca A. Lisi, 2017-11-03 This book constitutes the refereed proceedings of the 16th International Conference of the Italian Association for Artificial Intelligence, AI*IA 2017, held in Bari, Italy, in November 2017. The 37 full papers presented were carefully reviewed and selected from 91 submissions. The papers are organized in topical sections on applications of AI; natural language processing; knowledge representation and reasoning; knowledge engineering, ontologies and the semantic web; machine learning; philosophical foundations, metacognitive modeling and ethics; and planning and scheduling.

Knowledge Management in the Sharing Economy Elena-Mădălina Vătămănescu, Florina Magdalena Pînzaru, 2017-11-14 This volume explores the challenge of engaging knowledge management in a sharing economy. In a hyper-competitive business environment, everything tends to be digital, virtual and highly networked, which raises the issue of how knowledge management can support the decision whether or not to share strategic resources or capabilities. The book answers questions such as: to what extent does the sharing economy preserve or compromise the competitive advantage of organizations? And what are the knowledge-management strategies for competitive, yet cautious sharing dynamics?

Il marketing bancario Antonio Foglio, 2017-11-09T00:00:00+01:00 Finalmente una risposta a un'esigenza del settore bancario, quella di disporre di un completo, attuale, praticabile strumento di marketing che ben integri la tradizionale offerta bancaria offline di contatto, di filiale, di sportello con quella online (internet banking, home banking, mobile banking). Il volume analizza nel dettaglio il percorso che ogni banca deve praticare nel processo di marketing: dalla ricerca del mercato alla relativa segmentazione della clientela retail, corporate, private, istituzionale, wholesale. Dal posizionamento della banca e dei suoi prodotti/ servizi, al più idoneo marketing mix bancario, alla politica di multiprodotto, di prezzo, di distribuzione, di comunicazione, di promozione, di vendita, di web marketing. Non mancano il piano di marketing, l'organizzazione a supporto, il controllo e l'audit. Il libro è indirizzato a quanti lavorano nel settore bancario ai vari livelli centrali e periferici, in particolare per chi svolge funzioni di marketing, di ricerca, di comunicazione, di vendita e di promozione. È altresì una risorsa utile per consulenti, studiosi, studenti desiderosi d'intraprendere un'attività nel settore del marketing bancario.

Institutional Diversity in Banking Ewa Miklaszewska, 2016-12-20 This book offers a comparative analysis of how post-crisis restructuring has affected the evolution and prospects of small, locally-oriented banks. The discussion focuses specifically on "small" European countries; that is, countries with diversified banking systems, with a strong presence of cooperative and other forms of local banks. Such countries include highly developed economies like Italy and emerging European economies, such as Poland. The authors stress the unique importance of local banks in generating credit for both households and firms, and hence in contributing to overall economic growth. Chapters cohere around the argument that although smaller banks fared better than their larger counterparts the recent financial crisis, they have been directly and indirectly discriminated against in post-crisis restructuring schemes, and, as such, face many operational and strategic challenges today. The contributors are a distinguished group of researchers with expert knowledge of the competitive positions of and opportunities for locally oriented banks, who combine theoretical and empirical perspectives on these topics.

Sustainability in a Digital World Thomas Osburg, Christiane Lohrmann, 2017-05-17 This book offers a comprehensive introduction to the different emerging concepts in the innovative area of sustainability and digital technology. More than 20 leading thinkers from the fields of digitalization, strategic management, sustainability and organizational development share clearly structured insights on the latest developments, advances and remaining challenges concerning the role of sustainability in an increasingly digital world. The authors not only introduce a profound and unique analysis on the state-of-the art of sustainability and digital transformation, but also provide business leaders with practical advice on how to apply the latest management thinking to their daily business decisions. Further, a number of significant case studies exemplify the issues discussed and serve as valuable blueprints for decision makers.

The Future of FinTech Bernardo Nicoletti, 2017-03-02 This book provides an introduction to the state of the art in financial technology (FinTech) and the current applications of FinTech in digital banking. It is a comprehensive guide to the various technologies, products, processes, and business models integral to the FinTech environment. Covering key definitions and characteristics, models and best practice, as well as presenting relevant case studies related to FinTech and e-Business, this book helps build a theoretical framework for future discussion.

Digital Banking Tips Tolga Tavlas, 2015-06-06 Developing a digital banking presence is a daunting task, especially when you consider the financial resources and education needed to achieve telephone, online, mobile, and other digital banking capabilities. Where to start? That's where this book comes in. It's a quick and easy read, the tips are simple to implement, and you may even find a little banking humor to help you through the process. There are other books written on this subject, but what is missing is an execution guide. We need a quick and dirty manual that tells us how to implement digital banking services. This is a short, to the point, and action-oriented (rather than theoretical) book. Innovation is certainly required, but it's not always about

technology. Rather it is about using what you already have in different ways to create change. Not every bank or financial institution has huge resources, leadership that supports digital transformation, or fully engaged employees with a digital mindset. So the idea is to provide useful tips that you can execute easily in the current environment of your company - with or without significant investments. Even if your company has been offering digital banking services, this book can help you build out that part of your business further by assisting with areas such as: **NEW USERS:** How can you best encourage your existing customers to adopt online banking? **INCREASED USAGE:** How can you get your customers to take advantage of the full range of digital services you provide? **IMPROVED SYSTEMS:** Technology changes with remarkable speed, and users are always looking for ways to make their lives easier and their banking more secure. As the saying goes, Life moves pretty fast ... **MULTI-CHANNEL BUSINESS NEEDS:** How can you seamlessly incorporate your digital banking services with your business model? **EMPLOYEE BUY-IN:** How can you get your frontline staff to embrace systems they may view as replacing ... frontline staff? **Understanding Your System:** Most importantly, you need to feel comfortable with digital banking and have a strong sense of where the market is going, what's working, and what isn't. Digital banking is the future of financial institutions. This book will help you get there in simple, actionable steps. Whatever your position in your company, whether you're enthusiastic about sailing forward or still uncertain about stepping off the dock, let's take this journey together.

Digital Transformation of the Financial Industry Slađana Benković,Aleksandra Labus,Miloš Milosavljević,2023-01-29 This book presents a collection of state-of-the-art research findings on the digital transformation of financial services. Digitalization has fundamentally changed financial services and has a tendency to reshape the landscape of the financial industry in an unprecedented manner. Over the last ten years, the development of new financial technologies has contributed to the creation of new business and organizational models, along with new approaches to service delivery. By encompassing significant conceptual contributions, innovations in methods and techniques, and by delineating the main applications of digital transformation in Central and Eastern Europe (CEE), the volume extends current knowledge on digital transformation in the financial industry. The book is divided into two parts. The first part provides a social-science perspective on digital transformation in the financial industry. The second part provides the most recent evidence on how financial technologies are transforming financial services on the markets, and how the adoption of modern information technologies fosters setting up new financial services. Further, this part outlines new approaches to digital transformation in the financial industry. This book will appeal to students, scholars, and researchers of finance, monetary economics, and business, as well as practitioners interested in a better understanding of the digital transformation of financial services, new financial technologies, and innovations in finance.

Handbook of Business Communication Gerlinde Mautner,Franz Rainer,2017-07-24 In spite of the day-to-day relevance of business communication, it remains underrepresented in standard handbooks and textbooks on applied linguistics. The present volume introduces readers to a wide variety of linguistic studies of business communication, ranging from traditional LSP approaches to contemporary discourse-based work, and from the micro-level of lexical choice to macro-level questions of language policy and culture.

Banking 5.0 Bernardo Nicoletti,2021-07-06 Bill Gates' quote, "Banking is necessary, but banks are not," showcases the opportunity for financial services digital transformation. The next transition from industry 4.0 to 5.0 will impact all sectors, including banking. It will combine information technology and automation, based on artificial intelligence, person-robot collaboration, and sustainability. It is time to analyze this transformation in banking deeply, so that the sector can adequately change to the 'New Normal' and a wholly modified banking model can be properly embedded in the business. This book presents a conceptual model of banking 5.0, detailing its implementation in processes, platforms, people, and partnerships of financial services organizations companies. The last part of the book is then dedicated to future developments. Of interest to academics, researchers, and professionals in banking, financial technology, and financial services, this book also includes business cases in financial services.

Business Knowledge for IT in Global Retail Banking Corporation Essvale,2011 Deals with the convergence of business and IT in the retail banking industry. This work aims to introduce the concepts of retail banking from a global perspective. This book covers topics including: an overview of the major retail banking products; payments and lending practices in different continents; and, IT projects in retail banking.

Marketing and Mobile Financial Services Aijaz A. Shaikh,Heikki Karjaluoto,2018-12-21 Mobile financial services (MFS) are of major interest and importance to both researchers and practitioners. The role played by nonbanking actors including telecoms and FinTech firms as well as other participants, such as PayPal and Amazon, in developing and deploying innovative financial and payment services is undeniable. Peer2peer (P2P) payments from nonbank services are becoming increasingly commonplace and will shortly be codified by EC (EU?) regulations requiring banks to provide access to consumer data for third-party app developers and service providers. Three major mobile financial systems—mobile banking, mobile payments, and branchless banking—currently dominate the electronic retail banking sector. Although interconnected and interrelated, their business models, regulatory frameworks, and target markets are distinct. This book provides a unified perspective on MFS and discusses its evolution, growth, and future, as well as identifying the frameworks, stakeholders, and technologies used in financial information systems in general and MFS in particular. Academics and researchers in digital and financial marketing will find this book an invaluable resource, as will bank executives, regulators, policy makers, FinTech professionals, and anyone interested in how mobile technology, social media and financial services will increasingly intersect.
