Handbook on the Economics of Cultural Heritage Ilde Rizzo, Anna Mignosa, 2013-01-01 Cultural heritage is a complex and elusive concept, constantly evolving through time, and combining cultural, aesthetic, symbolic, spiritual, historical and economic values. The Handbook on the Economics of Cultural Heritage outlines the contribution of economics to the design and analysis of cultural heritage policies and to addressing issues related to the

conservation, management and enhancement of heritage. The Handbook takes a multidisciplinary approach, using cultural economics as a theoretical framework to illustrate how crucial and stimulating cross-disciplinary dialogue actually is. Contributors scrutinise the co-existence of cultural and economic values as well as the new challenges that arise from changes brought about by technology, and relationships between the different actors engaged in the production, distribution and consumption of heritage services. The roles of public, private and non-profit organizations are also explored. Case studies underpin the discussion, demonstrating the clear and vital link between theory and practice. This highly unique Handbook will prove a fascinating and informative read for academics, researchers, students and policymakers with an interest in cultural economics.

*Transmedia Narratives for Cultural Heritage* Nicole Basaraba, 2022-04-21 Transmedia Narratives for Cultural Heritage focuses on theoretical approaches to the analysis and creative practice of developing non-fiction digital transmedia narratives in the rapidly growing cultural heritage sector. This book applies a media-focused transdisciplinary approach to understand the conventions of emerging digital narrative genres. Considering digital media's impact on narrative creation and reception, the approach, namely remixed transmedia, can aid practitioners in creating strategic non-fiction narratives for cultural heritage. These creations also need to be evaluated and a digital-media focused 'ludonarrative toolkit' allows for the critical analysis of the composition and public participation in interactive digital narratives. This toolkit is applied and exemplified in genres including virtual museums, serious games, and interactive documentaries. The book also includes a seven-phase theoretical framework that can assist future creators (and project managers) of non-fiction transmedia 'mothership' narratives; and a methodology (based on 'big data analysis') for how to invent new cultural heritage narratives through bottom-up remixing that allows for public inclusion. Two transnational case studies on the 11 UNESCO World Heritage Australian Convict Sites and the Irish National Famine Way demonstrate the seven-phase framework's applicability. As many scholars across disciplines are increasingly creating digital narratives on historical topics for public consumption in various forms, the theoretical foundations and practical project management framework will be useful for scholars and project teams in the domains of transmedia studies, interactive narratives, cultural heritage, media studies, comparative literature, and journalism.

*The Oxford Handbook of Public Heritage Theory and Practice* Angela M. Labrador, Neil Asher Silberman, 2018-07-11  
The field of cultural heritage is no longer solely dependent on the expertise of art and architectural historians, archaeologists, conservators, curators, and site and museum administrators. It has dramatically expanded across disciplinary boundaries and social contexts, with even the basic definition of what constitutes cultural heritage being widened far beyond the traditional categories of architecture, artifacts, archives, and art. Heritage now includes vernacular architecture, intangible cultural practices, knowledge, and language, performances and rituals, as well as cultural landscapes. Heritage has also become increasingly entangled with the broader social, political, and economic contexts in which heritage is created, managed, transmitted, protected, or even destroyed. Heritage protection now encompasses a growing set of methodological approaches whose objectives are not necessarily focused upon the maintenance of material fabric, which has traditionally been cultural heritage's primary concern. The Oxford Handbook of Public Heritage Theory and Practice charts some of the major sites of convergence between the humanities and the social sciences, where new disciplinary perspectives are being brought to bear on heritage. These convergences have the potential to provide the interdisciplinary expertise needed not only to critique but also to achieve the intertwined intellectual, political, and socioeconomic goals of cultural heritage in the twenty-first century. This volume highlights the potential contributions of development studies, political science, anthropology, management studies, human geography, ecology, psychology, sociology, cognitive studies, and education to heritage studies.

*Heritage Tourism* Hyung Yu Park, 2013-11-20 Heritage tourism has become an increasingly significant component of the global tourism industry, particularly in countries striving to diversify away from sea, sand and sun. This growth has had profound influences on the presentation and representation of both tangible and intangible heritage within tourism context. The concept of heritage continues to evolve with its fast-changing political, economic and socio-cultural surroundings. Therefore it is essential that heritage tourism engages with the new form of globalised communities and societies, which have become more assimilated to each other but yet strive to sustain their own distinctive locality. This book aims to offer a thorough critical examination and systematic evaluation of the unique dynamics of heritage and tourism development from both social sciences and management perspectives. It incorporates both global and local perspectives in theorising and managing heritage tourism. While focusing on reviewing and analysing key academic concepts and debates including authenticity, commodification, globalisation and heritage interpretation, this book also discusses and evaluates topical issues such as sustainable development, marketing strategies and digital technologies including social media. It theoretically locates heritage discourses in the analysis of heritage tourism development and management drawing on various perspectives, from tourism, heritage studies, sociology, anthropology, politics and geography to management and marketing studies. Including case studies of topical concerns, controversies and challenges it will encourage readers to develop a new and insightful understanding of the dialectical relationship between heritage and tourism development. This book is essential reading for students studying tourism, heritage studies, cultural studies as well as related disciplines.
