*World Migration Report 2020* United  
Nations,2019-11-27 Since 2000, IOM has been  
producing world migration reports. The World  
Migration Report 2020, the tenth in the world  
migration report series, has been produced to  
contribute to increased understanding of migration  
throughout the world. This new edition presents  
key data and information on migration as well as  
thematic chapters on highly topical migration  
issues, and is structured to focus on two key  
contributions for readers: Part I: key information  
on migration and migrants (including migration-  
related statistics); and Part II: balanced,  
evidence-based analysis of complex and emerging  
migration issues.

Urban Climates T. R. Oke,G. Mills,A. Christen,J.  
A. Voogt,2017-09-14 Urban Climates is the first  
full synthesis of modern scientific and applied  
research on urban climates. The book begins with  
an outline of what constitutes an urban ecosystem.

It develops a comprehensive terminology for the subject using scale and surface classification as key constructs. It explains the physical principles governing the creation of distinct urban climates, such as airflow around buildings, the heat island, precipitation modification and air pollution, and it then illustrates how this knowledge can be applied to moderate the undesirable consequences of urban development and help create more sustainable and resilient cities. With urban climate science now a fully-fledged field, this timely book fulfills the need to bring together the disparate parts of climate research on cities into a coherent framework. It is an ideal resource for students and researchers in fields such as climatology, urban hydrology, air quality, environmental engineering and urban design.

**Disability and Development Report** United Nations Publications, 2019-08-16 Disability-inclusive development is an essential condition for a sustainable future. In 2015, the United Nations adopted the 2030 Agenda for Sustainable Development, pledging to leave no one behind in the global efforts to realize the 17 Sustainable Development Goals. Without the world's one billion persons with disabilities - 15% of the world population - being included as both agents and beneficiaries of development, these Goals will never be achieved. Yet, persons with disabilities are still invisible and often left behind. This United Nations flagship report is the first publication to address, at the global level, the nexus between disability and the Sustainable

Development Goals. It is also the first global analysis based on an unprecedented amount of data, legislation and policies from over 100 countries to understand the socio-economic circumstances of persons with disabilities and the challenges and barriers they face in their daily lives. This report examines new areas, like the role of access to energy to enable persons with disabilities to use assistive technology, for which no global research was previously available. And explores the linkages between the Sustainable Development Goals and the Convention on the Rights of Persons with Disabilities as well as other international relevant norms and standards relating to disability. Against the backdrop of all the available evidence, the report identifies good practices and recommends urgent actions to be taken for the achievement of the Sustainable Development Goals by, for and with persons with disabilities. The e-book for this publication has been converted into an accessible format for the visually impaired and people with print reading disabilities. It is fully compatible with leading screen-reader technologies such as JAWS and NVDA.
