Uno's Garden Graeme Base, 2013 When Uno arrives in the forest one beautiful day, there are many fascinating and extraordinary animals there to greet him. And one entirely unexceptional Snortlepig. Uno loves the forest so much, he decides to live there. But, in time, a little village grows up around his house. Then a town, then a city . . . and soon Uno realises that the animals and plants have begun to disappear . . . From the creator of the international bestsellers *Animalia*, *The Waterhole* and *Jungle Drums*, here is an illuminating blend of storybook, puzzle book and numbers book - a moving and timely tale about how we all unknowingly affect the environment around us, just by being there, and how we can always learn from our mistakes and find ways of doing things better. Join Graeme Base in this beautifully illustrated, funny and moving story about environment, ecology, and human's ability to affect the world around them - for better and for worse - and learn basic maths concepts along the way, as Uno learns that it's all a question of balance.

The Sound of the Wind Rebecca L. Copeland, Uno Chiyo, 1992-06-01 Fashion ingenue, magazine editor, kimono designer, femme fatale, prize-winning writer--Uno Chiyo has become one of twentieth-century Japan's most accomplished and celebrated women. In this two-part volume, Rebecca L. Copeland offers Western readers a fascinating portrait of Uno's life along with translations of three of her distinctive works of short fiction. Part One depicts Uno's sometimes turbulent passage from obscurity in a small village to national literary prominence. There are the early years under her father's stern tutelage; the first scandalous, failed romance which cost her her job as a schoolteacher; her apprenticeship at Enrakuken, the coffee shop of the literary elite whose ranks she later joined as a resident of the Magome Literati Village; her series of passionate and troubled relationships and marriages. Throughout, Dr. Copeland focuses on the evolution of Uno's art and discusses her major works, paying special attention to the effect being female had on Uno's development as a writer. The three stories in Part Two are examples of Uno's work at its finest. The Puppet Maker (1942), a much-admired reflection on art and life, describes an encounter with a venerable carver of puppets. The Sound of the Wind (1969) is the tale of a wife at the turn of the century who willingly denies her own needs. This Powder Box (1966) shows a progressive career woman coming to terms with an old love affair. At once compelling and lyrical, the stories are a masterful interpretation of tradition, of women, and of self-fulfillment. The Sound of the Wind: The Life and Works of Uno Chiyo will engage both specialists and general readers interested in twentieth-century Japan, literature, and women's issues.

This book demonstrates how our heart waves can be connected to a microcontroller. What kind of obstruction or change occurs in the wave according to the different changes of the atmosphere can be known from this book. The ECG Signal plays an important role in the diagnosis of heart diseases and disorders. An ECG is a significant physiological signal for diagnosis of cardiac disease. Modern usage of monitoring devices with electrocardiogram is increasing. Huge storage space and large quantities of data are that, and ECG compression is required for efficient storage and it has been extracted from a medical database. Aninteresting research line focuses on transforming the original one-dimensional waveforms of the ECG into two-dimensional information, followed by a processing stage using image processing tools. Many cardiac abnormalities can be observed with the aid of an ECG interpretation including inadequate blood flow, heart muscle death due to coronary thrombosis and heart muscle enlargement. Arduino can be used to for the development of interactive objects, taking inputs to control outputs. It is connected to the Arduino hardware to communicate and upload sketches. Arduino can read information from input devices such as Trimmer(potentiometer), Antenna, Sensors, e.t.c, and can also send data to the output devices such as Speakers, LED, DC motor, LCD Screen, e.t.c. User communities are groups of people using a given product, the Arduino in this case. So, the design has been enhanced, and it helps drive the Arduino board for direction to future.

Marx, Uno and the Critique of Economics Thomas T. Sekine, 2023-01-31 This unique book, written in a question and answer style, brings to life the work of the world's foremost Marxian economist Thomas T. Sekine on the scientificity of Marx's project in Capital, its applicability to navigating world-historic change across capitalist stages of development and what Marxian economics teaches us about building viable future historical societies. Sekine, a student and follower of Marxist Kozo Uno, argues that capitalism neither constitutes the end of history nor does its overthrow await socialist revolution. Rather, based upon its own historical delimitations capitalism, following World War I and the Great Depression of the 1930s, has entered a period of disintegration. Grounded on a scathing critique of bourgeois economics in all its forms, Sekine exposes the futility of bourgeois policy interventions attempting to revive capitalism. This book will be of interest to economists in both the mainstream and heterodox schools, and those broadly interested in the history of economic thought.
