**What If You Could Unscramble an Egg?** Robert Ehrlich,1996 A whimsical construction of an imaginary dialogue between two people intent on understanding esoteric topics that range from human sexuality to physics. Ehrlich (physics, George Mason U.) is dedicated to making the sciences fun and interesting, and though the conceit is cute, the information it contains is dynamic and scientifically sound, posing interesting questions and speculations on life in the universe, human behavior, perception, gravity, material properties, physics, time, space, and a sample list of What ifs? to pursue on one's own. The answer to the title's question (we were dying to know) is that, in part, it's all a matter of probabilities. The promotional material says the cartoons are humorous. Not. **Where the Suckers Moon** Randall Rothenberg,2013-02-20 For all the right reasons. Cars that can. What to Drive. The perfect Car for an Imperfect World. Only one of these slogans would be chosen by Subaru of America to sell its cars in the recession year of 1991. As six advertising agencies scrambled for the account and the winner tried to churn out the Big Idea that would install Subaru in the collective national unconscious, Randall Rothenberg was there, observing every nuance of the chaos, comedy, creativity, and egotism that made up an ad campaign. One can read Rothenberg's book as the behind-the-scenes chronicle of the brief and very troubled marriage between a beleaguered automobile company and Wieden & Kennedy, an aggressively hip ad agency whose creative director despised cars. One can read it as a history of advertising's journey from the conventionally upbeat slogan Helps Build Strong Bodies 12 Ways to the supercool nineties minimalism of Bo Knows. Either way, Where the Suckers Moon is a face-paced, insightful, and occasionally appalling look at an industry whose obsession with image has affected our entire culture.

**Underwater Medicine and Related Sciences** Margaret F. Werts,Charles W. Shilling,2012-12-06 This volume is the third annotated bibliography on this subject area to be compiled by these authors. The first, published by Gordon and Breach, Science Publishers, in 1971, was entitled AN ANNOTATED BIBLIOGRAPHY ON DIVING AND SUBMARINE MEDICINE. It covered material published during the 1960's. The second volume, entitled UNDERWATER MEDICINE AND RELATED SCIENCES: A GUIDE TO THE LITERATURE, published in 1973 by Plenum Press, covered primarily material published during 1970 and 1971, with some material from 1968 and 1969. The present volume covers material published during 1972 and 1973, but here again some earlier material has been included. The purpose of these annotated bibliographies is to make available a large proportion of the published material, in abstract form, indexed in such a manner as to make it possible to compile a reasonably complete annotated bibliography on any specific subject area in the field. It is possible thus to learn where the work is being done, by whom, and how extensively. Also, it becomes obvious what areas of research are lacking or inadequate. These specific searches can also form a background of reference material on which to base further research, or from which to write monographs or state-of-the-art surveys. Papers, articles and reports listed here are in most cases readily available.

And There Was Television Ellis Cashmore, 2002-09-09 Why all the fuss over television? It is blamed for an assortment of evils, including violence, shortened attention spans, the decline of literacy and political indoctrination. In this scintillating and approachable book, Ellis Cashmore weighs up the theories and evidence. He argues that much of the panic is without foundation and that the single most important danger posed by TV is that it encourages us to spend too much. Cashmore agrees with many writers that television is an elemental force in today's culture, but he offers us a completely different account of how and why this has come about. It is an evaluation that will surprise, provoke and delight. In essence, Cashmore argues that television is the central apparatus of consumer society and its success is measured not in terms of whether we enjoy programs, but how much we spend as a result of watching them. It is a book that should be read by anyone who watches television and wants to know what it is doing to them.
